VOLUME NUMBER XXXIII.

CANYON, TEXAS, THURSDAY, NOVEMBER 14, 1929.

NUMBER 34

Home Stuff

or otherwise

The Red Cross annual roll call is now in progress. That means a lot to the public schools of this county, as it is proposed to employ schools during the coming few months. Every citizen of Randall county can afford to pay one dollar to the Red Cross in order that this work may go on among the children. Someone wisely said that an ounce of prevention was worth a pound of cure. A dollar invested in a Red Cross nurse who will teach the children how to keep well is worth a hundred dollars paid to a nurse to take care of a sick child. Let's all join the Red Cross and help the children.

Trades Day will be held in Canyon November 25th. That will be just one month before Christmas. Bargains will be offered by all Canyon merchants on Trades Day, and the citizens of Randall county should make this day a great holiday buying event.

The West Texas Chamber of Commerce has a real president in W. B. Hamilton. He sees the needs of West Texas clearly. He doesn't bother about who does things, or who gets the credit just so the job is put over. In the past, the organization has had too many officials who were afraid that some one besides themselves received a little credit.

Incidentally, Mr. Hamilton-Plains Inc., for the purpose of advertising the advantages of this section. The West Texas Chamber of Commerce is too big to cover all of the needs of local communities, or to exploit the advantages of all sections.

The organization is to be congratulated upon the selection of a big man like W. B. Hamilton to direct its work for the coming year.

A movement has been started for a post-season football game between the Buffaloes and Tech. Ordinarily h. s. has little regard for post-season games of any kind. But in this instance the game should be played. W. T. and the Tech are the two greatest institutions of West Texas. More people would be interested in a game between the two schools than between any other two. A game could not be played during the season, therefore, a post-season game is a fine idea, and should be arranged for. But according to our thinking, it should be played in either Canyon or Lubbock, so that the two colleges should receive all of the financial benefits of the game.

The wheat is looking the best of any fall for a long while. The inch rain and snow this week was a fine thing. Already we hear talk that wheat is going to be too low to make the farmers any money next year. The grain market went on the bum together with the stock market, but this is hitting very largely the elevators and speculators rather than the farmers. Prediction has it that the Panhandle is going to be forced to cut its wheat acreage another year or suffer a real loss in price. We shall see.

Nothing new has developed about moving the stock pens. If the movement falls down, it will be a sad blow to civic development in Canyon. This is the first time that a definite proposal has been received to move the stock pens, and while the price may seem high to some, it is thought that a little money may be made on the deal, and that Canyon will be greatly improved by the removal of the unsightly stock pens.

For the present at least, the proposal of a city park in the middle of the tract of land seems to have met a stumbling block.

MRS. McQUEEN DIES

Mrs. J. W. McQueen of Amarillo died Friday after a lingering illness. She was formerly a citizen of Canyon. Mr. McQueen died several years ago. Mrs. McQueen is survived by two daughters, Mrs. Paul Johnson and Miss Hazel McQueen.

RETURNS FROM HUNT

John Schramm returned last week from an 8-day hunting trip to Old Mexico. Six other men from Amarillo went with him. They killed seven deer and lots of quail.

BUYS LAND HERE

J. W. Monroe of Silverton has closed a deal for a section of land southwest of Canyon near the J. J. Leavitt farm.

W. E. Lockhart spent Sunday visiting in Dalhart.

UNITY NEEDED IN COMMUNITY LIFE IN CITY

ROTARY CLUB FINDS MANY THINGS NEEDED IN CITY.

Having a Great Community Gathering to Discuss Problems—Hotel Project Was Outstanding Need.

Need for greater community interest was found Tuesday to be the greatest weakness in Canyon at the round table discussion of the Rotary Club. If this community interest prevailed, then it would be an easy matter to materialize and develop the other needs of the community.

Dr. R. P. Jarrett was the speaker for the day, and called attention to three needs of Canyon. The first he placed as a need of greater community spirit. Canyon people should for one time get together, every citizen, every boy and girl, every student—all come together in one great meeting to see each other, and to discuss the community needs. He called attention to the great community spirit which is shown in other towns, and the results which have been obtained from such spirit.

A second need was to have the sidewalks connected with the paving. On Fourth and Fifth Avenues many of the property owners failed to connect their sidewalks after the paving was completed. As a result there is a mud hole at all of these places just at the time the sidewalks are most needed. If the sidewalks were connected with the paving, homes would be greatly improved in looks, and property owners would feel more like beautifying their places.

The next thing needed is a good hotel. Mr. Jarrett stated that Canyon has acquired a very bad reputation over the country on account of its hotel facilities. More people from the outside visit Canyon annually than any town its size in the United States. Local pride demands that they be given better hotel facilities. It is one of the greatest needs so far as the College is concerned.

Other members expressed themselves as to Canyon's needs in a brief manner. Clyde W. Warwick told of the local interest in the hotel project and the various sites proposed.

Tom H. Knighton called attention to some of the problems that would confront the city commission next year, and that people should begin to think about the commission election in April.

J. W. Kleinschmidt believed that the hotel was the greatest local need.

W. H. Upchurch believed that the town could be improved more by having all of the old locust trees cut down. They were nothing more than incubators for the borers. The irrigation rate this summer had helped very much in beautifying the town.

Dr. D. M. Stewart believed that the hotel was the outstanding need, but he was interested in a good grain market here. Canyon always had the lowest prices on grain of any surrounding town, and consequently the farmers did not market their grain here.

Irby Carruth believed that the hotel problem was the most urgent.

Dr. H. A. Brown stated that if there was a unity of purpose all the other things would come. Farmers were asking why Canyon did not have a creamery, like other towns, and why the local produce market was not so good. He believed that the city water rate should be lowered very materially, as it is the highest in this section.

Lee Johnson was for a new hotel and did not see why it could not be put over.

President J. A. Hill believed that community unity was the keynote of all local problems. He hoped that before long a great public gathering would be planned when all of the citizens would come together and talk over public questions.

Jack Allen of Amarillo was a visiting Rotarian.

Miss Ocie Red of Wheeler spent the week end visiting with her sister and brother-in-law, Mr. and Mrs. Jim Cheyne.

Amarillo Seeks Aid Close Gap on the Highway

H. F. Mathews, assistant city engineer of Amarillo, was here Tuesday and appeared before the Commissioners Court regarding the gap on the highway within the city limits of Amarillo.

Owing to the fact that the highway goes through a forty-acre tract which has not been developed, the city officials of Amarillo are seeking state aid on this street. A petition was passed by the commissioners court of Potter county Tuesday morning asking the state highway commission to grant aid on this street. After explaining the proposal, a like petition was passed by the commissioners court of Randall county. Letters from individuals to the state officials were also directed seeking aid on the streets in order that the highway might be completed without further delay.

Mr. Mathews expressed the regret of the Amarillo city officials that the street had not been completed. It was reported some time ago that aid had been granted, but this was a mistake. The division engineer favors granting aid, owing to the fact that the property is vacant, and that aid will close the gap at once.

Canyon Girls Gets Write-Up in Syracuse Paper

In a recent issue of a newspaper of Syracuse, New York, Miss Fern Bowman, a Canyon girl who went to Syracuse University to teach this year, received a special write-up. The story was carried in a university column, called "March of Life on the Campus," and her picture accompanied the article which is quoted below:

Miss Fern Bowman, B. S., S. M., is a native of Canyon, Texas, the land of oil wells and natural gas. She is a graduate of West Texas State Teachers College, and earned her master's degree in Chicago.

She has taught in vocational high school, the Bradley Polytechnic in Illinois, and her alma mater. Here, in collaboration with Dr. Mason, she is teaching 'foods and nutrition,' a course for freshmen in the science and chemistry of food preparation. Also she is working out menus for the nursery school recently taken over by the university.

She is a Sigma Xi, honorary science; also a Kappa Omicron Phi, the home economics fraternity.

She is enthusiastic about the new possibilities opening up for home economics.

Mr. and Mrs. A. R. Walker and little daughter, Anne Marie, spent the week end in the home of her parents, Mr. and Mrs. A. A. Walker. They live in Amarillo.

Mr. and Mrs. Thos. Hill and Mr. and Mrs. George Enoch of Amarillo spent Sunday afternoon visiting with Mr. and Mrs. Jack Boutwell.

STATE PARK IS PROPOSED HERE BY OFFICIALS

PALO DURO CANYON SITE IS APPROVED BY MANY.

Short Visit Made Here Thursday With Trip to Canyons and Barbecue at Devil's Kitchen.

"All Texas wants a state park in Palo Duro Canyon and the Davis Mountains," said D. E. Colp, chairman of the state park committee Thursday afternoon, as he stood in the Devil's Kitchen of Texas' Grand Canyon and talked to some fifty people who had met for the purpose of seeing the canyon and discussing plans for the proposed state park. "Even the squirrel hunters of East Texas want it," continued Mr. Colp.

The Palo Duro Canyon was the destination of a four day Good Will Motorcade which left San Antonio early Monday morning and arrived at Canyon in the late afternoon Wednesday. The Motorcade was joined at various intervals by citizens from the towns who were interested in the work of the state park committee.

A state park booster banquet was held in honor of the motorcade at the Amarillo Hotel in Amarillo Wednesday evening with J. O. Guleke, a member of the board of regents of the college, as master of ceremonies. Mayor Ernest O. Thompson of Amarillo gave the address of welcome. Attorney General Robert L. Bobbitt and Ernest C. Cox, state commander of the American Legion, gave short talks in which they expressed their desire to see the Panhandle wonder added to the state park system.

D. A. Shirley and R. P. Jarrett of the college faculty were present at this banquet. The motorcade met at the college early Thursday morning and proceeded to the cooley canyon, northeast of town. The mist was heavy and rather disagreeable, but many of the party indulged in several "mountain climbs" and the photographers of the party made several shots of the canyon and the visitors.

The next place on the itinerary was Harding's ranch headquarters and the Devil's Kitchen. Hot barbecue was served for lunch near the ranch headquarters. Following this the group assembled at the Devil's Kitchen for the purpose of discussing tentative plans. Mr. O. V. Vernon, of the Chamber of Commerce in Amarillo, officiated on this occasion. Mr. H. C. Harding for seventeen years owner of the ranch, was introduced. His suggestion of building a highway all along the meandering stream was received with enthusiasm.

"There is seventy-five miles of beautiful driveway here," said Mr. Harding with pardonable pride.

Mr. Colp talked of the impracticability of waiting to make a national

(Continued on last page)

Rain and Snow With Cold Weather, Opens November-Inch Falls

An inch of moisture resulted from the snow and rain of Friday and Saturday, which was followed by the lowest temperature of the year. The wind has been in the north since Friday, and very cold. Warmer weather is predicted for the week end.

The moisture of this week puts the wheat in the best condition the Panhandle has enjoyed for several years.

Legion Wants Names of All Ex-Soldiers

Notice to All Ex-Service Men of Randall County: Buddies: The American Legion is anxious to get in touch with you. We have some important information for you. We help you get your adjusted compensation certificate if you do not have it. We help you get free hospitalization for any ailment you may have, whether you contracted it during your term of service or yesterday, and pay from the day you leave home until you return, with all expenses paid. We help you re-establish your war risk insurance if you so desire. These are only a few of the things that we do for you. Just drop me a card saying you are an ex-service man, and sign your name and I will explain in a personal letter the things we can help you get.

H. O. PRICE, Adjutant, Palo Duro Post, No. 97, American Legion.

Attended Meeting of West Texas C. of C.

President W. A. Warren of the Canyon Chamber of Commerce, Secretary O. W. Gano, Wallace R. Clark and R. A. Terrill attended the meeting Tuesday in Amarillo of officials of the West Texas Chamber of Commerce, together with secretaries of the local Chamber of Commerce on the Plains.

Mr. Warren states that the meeting was very highly harmonious. He was pleased with the address of President W. B. Hamilton of the West Texas Chamber of Commerce, in which he stated the policies of the organization, which will be based upon sound business practices.

Mr. Hamilton endorsed the idea of continuing the work of the Panhandle-Plains Inc. in order the agricultural and industrial advantages of this section may be thoroughly advertised.

At the meeting Saturday of the directors in Abilene, D. A. Bandeen of El Paso was elected manager for the coming year. Will O'Brien of Amarillo was elected director for this district.

CORRECTION MADE

Newman Scores Three Touchdowns For Victors; Bandy, Logan, and Powell Do Sensational Tackling and Running.

A Few Letters

The following are a few of the letters received this week by the News regarding the special edition of last week:

Amarillo, Tex., Nov. 11, 1929. Please allow me to extend congratulations to you and the News force for what I consider one of the best if not the best special editions ever printed by a weekly newspaper in West Texas. I have read it from cover to cover and find it worthwhile all the way through.

You are most certainly to be commended on the play you gave the farmers of your county. It was wonderful and I wish that every prospector ever interested in the Panhandle could read a copy of your paper, it would make them want to come to the Panhandle.

Plainview, Tex., Nov. 11, 1929. This is to acknowledge receipt of copy of your paper which I enjoyed reading. I appreciate your remembering me sufficiently to send me a copy.

A. B. TARWATER, State Representative.

Graham, Tex., Nov. 12, 1929. Please accept congratulations on the Randall County special edition of your paper. This issue alone is worth the price of a year's subscription.

The day of opportunity is not gone while there is land for sale in Randall County.

C. F. MARSHALL.

Amarillo, Tex., Nov. 12, 1929. I want to compliment you on the Special Edition that you have just gotten out on your paper. This is very fine, and I think shows a great deal of thought.

JAMES A. BUSH.

Hubbard, Tex., Nov. 12, 1929.

I am just in receipt of your special edition, showing photos and giving graphic write-ups of various interests of your splendid country. I enjoyed looking over the edition, reading about the different enterprises that go to make your vicinity worth while. I like the plains country, the people, the water, atmosphere and the "pep" that goes with and makes a part of every one. I see the Mug of old Sam B. McClure, and it recalls to my mind years long gone, that I used to see and be with him about Amarillo, in 1911 and later.

W. R. BOUNDS, State Representative.

Junction, Tex., Nov. 12, 1929.

I have just received a copy of the special edition of your excellent paper, The Canyon News. I enjoyed the articles and illustrations a great deal, but the main point about which I wish to write is the splendid achievement which the edition represents.

COKE R. STEVENSON, State Representative.

Austin, Tex., Nov. 12, 1929.

My heartiest congratulations to yourself and staff in turning out such a splendid issue as the Canyon News of Nov. 7th, and the very best wishes for your continued success in the forward movement of your community.

EUGENE V. GILES, State Representative.

Ft. Worth, Tex., Nov. 12, 1929.

I have just received the very splendid issue of your paper of November 7th, and wish to commend you highly for the very fine issue throughout.

I have read it with much interest and it is not only informative, educational and interesting, but reflects great credit on your fine city and section.

JULIAN C. HYER, State Senator.

CONFERENCE YEAR CLOSING

Rev. C. E. Jameson left Tuesday morning for Pampa to attend the annual conference of the Methodist church. The year's work of the local church closed Sunday. Rev. Jameson will report a very successful year's work here, with all obligations of the local church paid in full.

Miss Mattie Mae Swisher is attending the conference. Many Canyon citizens will likely attend the conference Sunday.

It is likely that Bishop Moore will return Rev. Jameson to the local church for the coming year.

By far the largest crowd that ever witnessed a football game in Canyon attended the battle between the New Mexico Military Institute and the West Texas Buffaloes at the Buffalo field yesterday. The mud was practically gone and a real clash was staged. Of course the American Legion, Hanson Post, of Amarillo was back of the game, and responsible for the large crowd.

The game ended exactly as it did last year, 27 to 0 in favor of the Buffs. As Canyon won last year it was really the Cadets' time to take home the winning score, but the Buffs refused to budge. These two schools have been winning vice versa ever since 1921 or according to records ever since Coach Burton came to this institution as head football coach.

The first thrill for the crowd came when a Roswell lad, Arthur Foley, made a pretty end run, but at that he failed to make as much as a first down. Then Gerald nabbed a punt and carried the ball within 25 yards of the goal line. Newman, after slapping a Cadet on the head for acting as if he might catch him, ran 22 yards for the first touchdown.

Newman ran hog wild several times for the victors, making three touchdowns and therefore coming out with the highest points.

Gerald, as usual brought the crowd to their feet on his punt returns. Once he caught the ball on his own 8 yard line and carried it to the Cadets' own 38 yard line.

Sensational tackling was seen when Bandy, practically blocked by a soldier boy, cast out his own hand and brought the runner down.

Bandy did some of the best tackling of the game.

Logan was again the stone wall for the Buffaloes; the Cadets failed to gain over his side of the line. Elkins was also a good tackler.

Powell, the flash from Wellington again proved to be an end runner. He has carried the ball for many yard gains in every game thus far in the season. Along with Powell was his co-partner from Wellington, none other than Red McInnis who was another end runner. Red also kicked one of the extra points.

The two Foley brothers were the stars of the Roswell bunch, and bore the burden of the defeat. A Foley did some real punting and his passing to his brother in the last 3 minutes of the game gave the Cadets one of their only three first downs. Although Newman beat Foley for an average of 1 yard on his punting, he failed to come up with him several times. The punting of Foley for the soldiers was the only strong feature for his side. His toe doubtless held the score down.

The fast man, McCommis, came into the game during the third quarter but he failed to get a break. Several times he attempted his long broken field runs but was downed before getting a good start.

It looked as if the vaunted overhead attack of the Cadets failed to work, they were held helpless before the Canyon defense. They failed to make a first down throughout the first three quarters and it was not until the last three plays of the game that they won their only three first downs. Then it gave them their greatest percent of their 76 yard gainage for the entire game.

This was Coach Reeds first visit from the Roswell Cadets and for fear that they might get the high point, he had his boys to put out all they had. Surely Coach Reeds has found his lineup. But the Cadets will be back next year and Coach Reeds will again have to be on the watchout.

STORK SPECIAL

Born to Mr. and Mrs. Homer T. Anderson, a son, Nov. 11, at Clayton, New Mexico. The baby has been christened, Kelly Bruce. Mr. and Mrs. Anderson are both ex-students of the College. She will be remembered as Miss Ethel Floyd.

A son was born to Mr. and Mrs. Ralph Eaton Oct. 30, at their home in the north part of Randall county.

Born to Mr. and Mrs. L. H. Crawford, Nov. 6, a girl. The baby's name is Johnnie Annie.

T. S. Farlow spent Sunday visiting in Washburn.

STATE PARK IS PROPOSED HERE BY OFFICIALS

PALO DURO CANYON SITE IS APPROVED BY MANY.

Short Visit Made Here Thursday With Trip to Canyons and Barbecue at Devil's Kitchen.

"All Texas wants a state park in Palo Duro Canyon and the Davis Mountains," said D. E. Colp, chairman of the state park committee Thursday afternoon, as he stood in the Devil's Kitchen of Texas' Grand Canyon and talked to some fifty people who had met for the purpose of seeing the canyon and discussing plans for the proposed state park. "Even the squirrel hunters of East Texas want it," continued Mr. Colp.

The Palo Duro Canyon was the destination of a four day Good Will Motorcade which left San Antonio early Monday morning and arrived at Canyon in the late afternoon Wednesday. The Motorcade was joined at various intervals by citizens from the towns who were interested in the work of the state park committee.

A state park booster banquet was held in honor of the motorcade at the Amarillo Hotel in Amarillo Wednesday evening with J. O. Guleke, a member of the board of regents of the college, as master of ceremonies. Mayor Ernest O. Thompson of Amarillo gave the address of welcome. Attorney General Robert L. Bobbitt and Ernest C. Cox, state commander of the American Legion, gave short talks in which they expressed their desire to see the Panhandle system added to the state park system. D. A. Shirley and R. P. Jarrett of the college faculty were present at this banquet.

The motorcade met at the college early Thursday morning and proceeded to the cooley canyon, northeast of town. The mist was heavy and rather disagreeable, but many of the party indulged in several "mountain climbs" and the photographers of the party made several shots of the canyon and the visitors.

The next place on the itinerary was Harding's ranch headquarters and the Devil's Kitchen. Hot barbecue was served for lunch near the ranch headquarters. Following this the group assembled at the Devil's Kitchen for the purpose of discussing tentative plans. Mr. O. V. Vernon, of the Chamber of Commerce in Amarillo, officiated on this occasion. Mr. H. C. Harding for seventeen years owner of the ranch, was introduced. His suggestion of building a highway all along the meandering stream was received with enthusiasm. "There is seventy-five miles of beautiful driveway here," said Mr. Harding with pardonable pride.

Mr. Colp talked of the impracticability of waiting to make a national park.

Rain and Snow With Cold Weather, Opens November-Inch Falls

An inch of moisture resulted from the snow and rain of Friday and Saturday, which was followed by the lowest temperature of the year. The wind has been in the north since Friday, and very cold. Warmer weather is predicted for the week end.

The moisture of this week puts the wheat in the best condition the Panhandle has enjoyed for several years.

Legion Wants Names of All Ex-Soldiers

Notice to All Ex-Service Men of Randall County: Buddies: The American Legion is anxious to get in touch with you. We have some important information for you. We help you get your adjusted compensation certificate if you do not have it. We help you get free hospitalization for any ailment you may have, whether you contracted it during your term of service or yesterday, and pay from the day you leave home until you return, with all expenses paid. We help you re-establish your war risk insurance if you so desire. These are only a few of the things that we do for you. Just drop me a card saying you are an ex-service man, and sign your name and I will explain in a personal letter the things we can help you get.

H. O. PRICE, Adjutant, Palo Duro Post, No. 97, American Legion.

Attended Meeting of West Texas C. of C.

President W. A. Warren of the Canyon Chamber of Commerce, Secretary O. W. Gano, Wallace R. Clark and R. A. Terrill attended the meeting Tuesday in Amarillo of officials of the West Texas Chamber of Commerce, together with secretaries of the local Chamber of Commerce on the Plains.

Mr. Warren states that the meeting was very highly harmonious. He was pleased with the address of President W. B. Hamilton of the West Texas Chamber of Commerce, in which he stated the policies of the organization, which will be based upon sound business practices.

Mr. Hamilton endorsed the idea of continuing the work of the Panhandle-Plains Inc. in order the agricultural and industrial advantages of this section may be thoroughly advertised.

At the meeting Saturday of the directors in Abilene, D. A. Bandeen of El Paso was elected manager for the coming year. Will O'Brien of Amarillo was elected director for this district.

In last week's paper cars sold to Theodore E. Elo and S. W. Cain were listed as used Ford Coupes. They should have read New Chevrolet Sport Coupes.

Record Crowd Sees Buff Herd Trim New Mexico Cadets 27-0; Last Year's Score Is Repeated

Newman Scores Three Touchdowns For Victors; Bandy, Logan, and Powell Do Sensational Tackling and Running.

A Few Letters

The following are a few of the letters received this week by the News regarding the special edition of last week:

Amarillo, Tex., Nov. 11, 1929. Please allow me to extend congratulations to you and the News force for what I consider one of the best if not the best special editions ever printed by a weekly newspaper in West Texas. I have read it from cover to cover and find it worthwhile all the way through.

You are most certainly to be commended on the play you gave the farmers of your county. It was wonderful and I wish that every prospector ever interested in the Panhandle could read a copy of your paper, it would make them want to come to the Panhandle.

HENRY ANSLEY.

Plainview, Tex., Nov. 11, 1929. This is to acknowledge receipt of copy of your paper which I enjoyed reading. I appreciate your remembering me sufficiently to send me a copy.

A. B. TARWATER.

State Representative.

Graham, Tex., Nov. 12, 1929. Please accept congratulations on the Randall County special edition of your paper. This issue alone is worth the price of a year's subscription.

The day of opportunity is not gone while there is land for sale in Randall County.

C. F. MARSHALL.

Amarillo, Tex., Nov. 12, 1929. I want to compliment you on the Special Edition that you have just gotten out on your paper. This is very fine, and I think shows a great deal of thought.

JAMES A. BUSH.

Hubbard, Tex., Nov. 12, 1929. I am just in receipt of your special edition, showing photos and giving graphic write-ups of various interests of your splendid country. I enjoyed looking over the edition, reading about the different enterprises that go to make your vicinity worth while. I like the plains country, the people, the water, atmosphere and the "pep" that goes with and makes a part of every one. I see the Mug of old Sam B. McClure, and it recalls to my mind years long gone, that I used to see and be with him about Amarillo, in 1911 and later.

W. R. BOUNDS.

State Representative.

Junction, Tex., Nov. 12, 1929. I have just received a copy of the special edition of your excellent paper, The Canyon News. I enjoyed the articles and illustrations a great deal, but the main point about which I wish to write is the splendid achievement which the edition represents.

COKE R. STEVENSON.

State Representative.

Austin, Tex., Nov. 12, 1929. My heartiest congratulations to yourself and staff in turning out such a splendid issue as the Canyon News of Nov. 7th, and the very best wishes for your continued success in the forward movement of your community.

EUGENE V. GILES.

State Representative.

Ft. Worth, Tex., Nov. 12, 1929. I have just received the very splendid issue of your paper of November 7th, and wish to commend you highly for the very fine issue throughout.

I have read it with much interest and it is not only informative, educational and interesting, but reflects great credit on your fine city and section.

JULIAN C. HYER.

State Senator.

CONFERENCE YEAR CLOSES

Rev. C. E. Jameson left Tuesday morning for Pampa to attend the annual conference of the Methodist church. The year's work of the local church closed Sunday. Rev. Jameson will report a very successful year's work here, with all obligations of the local church paid in full.

Miss Mattie Mae Swisher is attending the conference. Many Canyon citizens will likely attend the conference Sunday.

It is likely that Bishop Moore will return Rev. Jameson to the local church for the coming year.

By far the largest crowd that ever witnessed a football game in Canyon attended the battle between the New Mexico Military Institute and the West Texas Buffaloes at the Buffalo field yesterday. The mud was practically gone and a real clash was staged. Of course the American Legion, Hanson Post, of Amarillo was back of the game, and responsible for the large crowd.

The game ended exactly as it did last year, 27 to 0 in favor of the Buffs. As Canyon won last year it was really the Cadets' time to take home the winning score, but the Buffs refused to budge. These two schools have been winning vice versa ever since 1921 or according to records ever since Coach Burton came to this institution as head football coach.

The first thrill for the crowd came when a Roswell lad, Arthur Foley, made a pretty end run, but at that he failed to make as much as a first down. Then Gerald nabbed a punt and carried the ball within 25 yards of the goal line. Newman, after slapping a Cadet on the head for acting as if he might catch him, ran 22 yards for the first touchdown.

Newman ran hog wild several times for the victors, making three touchdowns and therefore coming out with the highest points.

Gerald, as usual brought the crowd to their feet on his punt returns. Once he caught the ball on his own 8 yard line and carried it to the Cadets' own 38 yard line.

Sensational tackling was seen when Bandy, practically blocked by a soldier boy, cast out his one hand and brought the runner down.

Bandy did some of the best tackling of the game.

Logan was again the stone wall for the Buffaloes; the Cadets failed to gain over his side of the line. Elkins was also a good tackler.

Powell, the flash from Wellington again proved to be an end runner. He has carried the ball for many yard gains in every game thus far in the season. Along with Powell was his co-partner from Wellington, none other than Red McInnis who was another end runner. Red also kicked one of the extra points.

The two Foley brothers were the stars of the Roswell bunch, and bore the burden of the defeat. A. Foley did some real punting and his passing to his brother in the last 3 minutes of the game gave the Cadets one of their only three first downs. Although Newman beat Foley for an average of 1 yard on his punting, he failed to come up with him several times. The punting of Foley for the soldiers was the only strong feature for his side. His toe doubtless held the score down.

The fast man, McCommis, came into the game during the third quarter but he failed to get a break. Several times he attempted his long broken field runs but was downed before getting a good start.

It looked as if the vaunted overhead attack of the Cadets failed to work, they were held helpless before the Canyon defense. They failed to make a first down throughout the first three quarters and it was not until the last three plays of the game that they won their only three first downs. Then it gave them their greatest percent of their 76 yard gainage for the entire game.

This was Coach Reeds first visit from the Roswell Cadets and for fear that they might get the high point, he had his boys to put out all they had. Surely Coach Reeds has found his lineup. But the Cadets will be back next year and Coach Reeds will again have to be on the watchout.

STORK SPECIAL

Born to Mr. and Mrs. Homer T. Anderson, a son, Nov. 11, at Clayton, New Mexico. The baby has been christened, Kelly Bruce. Mr. and Mrs. Anderson are both ex-students of the College. She will be remembered as Miss Ethel Floyd.

A son was born to Mr. and Mrs. Ralph Eaton Oct. 30, at their home in the north part of Randall county.

Born to Mr. and Mrs. L. H. Crawford, Nov. 6, a girl. The baby's name is Johnnie Annie.

T. S. Farlow spent Sunday visiting in Washburn.

THE STATE PARK

Good work resulted in the meeting of the State Park Board with citizens from a dozen or more Panhandle towns last week. It was proposed that action be started at once to create a state park in the Palo Duro Canyon. The proposal will be taken to the special session of the legislature in January, but it is hardly to be expected that anything will come of the proposal at this session. There will be a fight over education and penitentiary re-location, which will result in other matters being sidetracked. But the fact that something has been started, and that people are thinking of a state park in the Palo Duro will eventually result in some definite action being taken.

Let Panhandle citizens think and talk about a state park, and then something may be accomplished.

RESPECT FOR THE FLAG

Monday was Armistice Day, and the event was generally celebrated over the United States. It has been only eleven short years since the signing of the Armistice, and during that time the American Legion has been busy trying to instill patriotism in the hearts of the people.

During the Armistice Day football game at the College the American flag was displayed, and the band played The Star Spangled Banner. All of the 4,500 spectators rose to their feet. A hush fell over the great crowd; most of the men removed their hats, but it was easily noted that scattered thru the great crowd there were scores of men who did not remove their hats, or come to salute. During the war it would not have been wise for any citizen to show indifference toward the flag. Perhaps it was not indifference, but rather carelessness or ignorance of the propriety of the moment.

At any rate, the situation shows that there is work ahead for the American Legion in teaching our people proper respect for the flag. The program of education should go forward.

Earle B. Mayfield has virtually been announced as a candidate for governor by friends in Austin. The ex-senator has not repudiated the announcement, and he is expected to throw his hat in the ring at the right moment. In the meanwhile Jim Ferguson is continuing a program of "ifs"—if he should be a candidate, Ferguson is still a political power in Texas, and if not in the race himself, he will have a mighty weight in the campaign.

Higgins News: In speaking of the West Texas State Teachers' College at Canyon the Lynn County News says: "Our Teachers' Colleges, where our teachers are trained in the art of teaching, should have as generous support, in our opinion, as the colleges where boys are taught to raise cotton and cows." And so think we of the Higgins News. The more thorough a teacher is trained in the art of teaching, the better service may be given in actual school work, if the teacher is a teacher. Not all school teachers are real teachers. The men and women who occupy the important place next to the parent should not only be well equipped in every particular for the job, but should be teachers in spirit and in truth—born to the profession, not makeshifts. And the institutions in which our teachers receive instruction in the best ways to teach; who are given that insight and knowledge so necessary to every successful teacher, should be given generous support when funds are asked for and should not be skimmed for political reasons. In fact, our schools should be lifted out of politics. Not until that time comes will our schools be free and independent. But teaching boys to raise cotton and cows is also necessary. The head and the hands should be educated and not merely the head alone. If our educational system was cut down one half and the other half made

up of more practical things that would be of use to the human family, our boys and girls would be better fitted to make their way in the world and they would stay in school much longer than is the case today, when football and kindred sports are relied upon to furnish the pep school books do not have. The time is coming when schools will stop trying to teach everything and will find some method of putting the knowledge gained to practical use. Theory and Practice should go hand in hand.

Lakeside News

Sent in by the 4th and 5th grades.

The ground was covered with snow and sleet Friday and Saturday. We were disappointed when it began to melt for skating was fine.

Mr. and Mrs. L. T. Campbell and children were guests in the home of Mr. and Mrs. Albert Byars Sunday afternoon.

Our teacher's car is sick this week and she has been walking to school.

Fern and Harold Byars visited Lakeside school Monday.

Bonnie B. Dickinson visited Lorraine and Laura Lou Campbell Sunday morning.

Mr. and Mrs. Stallings were in Amarillo Monday morning.

Mr. and Mrs. Albert Byars attended to business in Canyon Saturday.

Margaret and Dannie Stewart of Canyon spent Sunday with Melba Morris.

Mrs. Dickinson and daughter were shopping in Amarillo Saturday.

Mr. and Mrs. Ford shopped in Canyon Saturday.

Mr. and Mrs. Johnnie Long have been visiting in the Stallings home.

We are starting our Red Cross drive this week and we hope to make our district one hundred per cent.

Due to bad weather the farmers are still working trying to get in their feed.

C. O. James and son Dryden were in Amarillo Thursday of last week.

Umbarger Items

Mr. and Mrs. Wieck and Mr. and Mrs. Conrad Westhoff have returned from Dodge City, Neb., where they attended the funeral of Mrs. Wieck's and Mrs. Westhoff's sister.

W. H. Erdman and daughter, Miss Katie Erdman, returned Saturday from an extended visit with relatives in Nebraska, Iowa, and Illinois.

The snow which fell the latter part of last week was a great benefit to the wheat.

The new St. Mary's church is progressing rapidly.

Miss Leah Teagler spent the week end with her grandmother, who lives in Amarillo.

Marie Batenhorst is back in school after a week's illness.

Henry Skypala spent Sunday in Amarillo.

The pupils are helping to put over the Red Cross Drive this week in Umbarger.

Mr. Upchurch visited our school last Tuesday and presented Albert Friemel his blue ribbon and first prize which he was awarded at the State Fair in Dallas, for the best ten heads of hygeria. As this contest included the state of Texas, the school is proud of Alfred. Louis Wieck was awarded the fifth prize in the same contest.

Mr. and Mrs. Anton Beckman spent Sunday at Mr. and Mrs. Becken's home.

Truth vs. Fiction

By Dr. John Joseph Gaines

I wonder if all of the beautiful, the true, the brave, the noble, the benevolent, the lovely in this world exists only in fiction? I wonder if all that is hard, rasping, disappointing, tragic, hateful, belongs to the stern reality of this life?

What foolish questions!

Yet, the successful novel-writer of today finds success and approval of the masses, by writing a tangled web of intricate plot, and clothing it with verbiage as far removed from the real as possible.

Take the characters in any good novel; set them free in any country, community, or neighborhood; they would never perform as the fiction-writer has made them do. I challenge the scholar—the thinker—to produce a personage who would do as the fiction-writer portrays.

Then, fiction as done today, is not "true to life." It is what the author and publisher thinks should happen under the chain of circumstances.

I myself have written . . . written . . . and again written . . . webs of intricacy . . . absolutely true to life and character. They have never been acceptable—they were too commonplace to sell!

Does this mean that truth cannot get anywhere?

I answer—no. For the reason that, I am not able to portray life in its real beauty. Fine, pulsating life is the most beautiful of creations; it takes a master to depict it in its glorious reality. A tyro can exaggerate—can place before us a cheap chromo—a daub, unworthy the name of a great painting.

My life—and yours—with the ins and outs—each day a page, scored with the symphony, the misere, the requiem, the sonnet, the allusion, the dead march! Only the master can arrange. And there are no masters today. And when somebody comes who can do a symphony in real life, jazz, the fabrication of today will be swept away; "Life is real—life is earnest."

AN INTERESTING PREDICTION

C. R. F. Smith, agricultural engineer of Iowa State College, makes an interesting prediction. In fifty years from now, he says, the American farmer will sit in an office before an electric switch-board and control automatic plows, cultivators and harvesters which will produce his crops for him without the aid of a single field laborer.

"The great revolution in agricultural methods of the last fifty years," says Mr. Smith, "will prove small in comparison with the revolution that will take place in the next fifty years.

"Automatic farm machinery which runs without constant human supervision will be widely used . . . the machines will be able to run night and day if necessary . . . the greatest aid to super-farming in the future, and one whose realization is near at hand, will be a soil-tilling machine, which will move over the field, mixing and pulverizing soil, organic material and plant food in a single operation."

The forerunner of these new machines, it may be pointed out

to the sceptical, is already in operation and proving successful. It is a manless plow used at Iowa State College, which, after being steered across the field to make the first furrow, guides itself automatically by a guide-wheel, which follows the latest furrow plowed until the field is completed.

PERFECT ALIBI

He was visiting the newlyweds at their home. Everything was fine, but—

"Why did you take an apartment with such a tiny kitchenette, Tom, old boy?"

"Well, you're the first man I've told, so keep it quiet. It's so small I can't get in there to help my wife when she is doing the dishes."—Pathfinder.

MUZZLED

"Just think! A man came in to the music room and said, 'Not a sound or I fire!'"

"Were you just going to sing?"—Fliegende Blätter (Munich).

CLEAN BILL OF HEALTH

"Has your husband any hobbies?" asked the neighbor who was calling.

"No," said Mrs. Tuggle, "he has rheumatiz a good deal, and hives now and then, but he ain't never had no hobbies."—N. Y. C. Magazine.

THREE TIMES AND OUT

Dear Doc: I don't go to church. The first time I went they threw water on me; the second time they tied me to a woman for life!—Woman Hater.

Yes, and the third time they will throw dirt on you.—St. Joseph News-Press.

DYNAMITE

"It is high time you were insured against accident, sir."

"Why?"

"You are sitting on the boxing champion's hat."—Lustige Blaetter.

Burton Says Buff-Tech Game Would Be In Order Now

Many fans of West Texas, followers of the West Texas Buffaloes and the Texas Tech Matadors, have wondered why these two leading

schools of this section of the state were not scheduled for football this season. These teams have met annually ever since the establishment of the Tech college and have always played to capacity crowds. An interview with Coach Burton, athletic director of the College, discloses the following facts which seem to place the blame for this on no one; just merely circumstances seem to have brought about the condition.

Athletic Director Burton says, "For four years we met Tech on a home and home basis, played on Thanksgiving. Last Thanksgiving our contract expired and the Tech authorities saw fit to enter a contract with Simmons university for a period of years for the Thanksgiving game; evidently they thought it would be a better game from a financial standpoint, this I doubt.

Schedules Conflict

"When we had our annual conference meetings at Dallas early in December last year, for the purpose of making schedules and attending to such other business as might come before the different organizations, Tech made application for admission into the Southwestern conference and until they heard from this they would not make schedules, as they were desirous of leaving all possible dates open in order to be in a position to accept any open dates tendered them by Southwestern conference teams.

"We could not hold our schedule

open for them as we felt that our conference games must be provided for. We did hold one date open, and thought that it was being held by them, but they had an opportunity to schedule Baylor university on that date and that left us without an open date to offer them."

Two Leading Schools

When asked what his attitude or the attitude of the athletic committee would be towards a post season game, Coach Burton said: "I can only speak for myself as I do not know just how the athletic committee feels at this time concerning a possible post season game. Personally I think it a shame that the two leading state institutions of all West Texas have not been scheduled for a game in the regular season. It should be the biggest game of all West Texas every year. As to a post season game I personally would favor it this one time under the right conditions; more to keep our relations with Tech than for any other reason. Unless I felt that the teams can get together regularly in the future I would not favor a post season game at this time."

No Friction

He continued, "I would not have any one believe that there is any friction between the athletic departments of the two institutions. Our dealings have always been amiable. I have heard nothing from Mr. Freeland regarding a post season game and do not know how his pulse is concerning the matter."

When asked if the proposed game of football would interfere in any way with the progress of basketball training, one would think that the big coach had been prodded with a hot iron. "Of course it would!" declared the basketball mentor. "Every man that gives much promise of making my basketball team with one exception is playing football. But for the good of the game and in order that our relations with Tech will remain unbroken we are willing to consider the proposition of a post season game."

Six College Men Are Employed on T-Anchor Ranch

Seven men, six of them college students, are employed on the farm which the college runs on the old T-Anchor Ranch one mile north of Canyon.

Nonnie Smith, of Coleman, is in charge of the dairy operations, with Garland Martin of Zybach and Woodrow Jamison of Silver Valley as his assistants.

The other farm activities are in charge of Newt Rough, a mature man, who, with his family, lives on the farm. L. N. George, formerly of Prescott, Arizona, A. G. Morris of Weatherford, and H. C. Johnson of Vigo Park, each spend one half of his time on the farm and attends classes at the college the other half of the time.

Besides a truck garden which was an eye-opener to many people in this region, the college farm has produced an excellent crop of corn and alfalfa. The fourth cutting of the alfalfa yielded between five and six tons from an eighteen

acre patch. Professor T. M. Moore who is general supervisor of the farm states that the alfalfa will be reseeded in the spring.

Six cows of the dairy herd which is maintained on the T-Anchor farm made the honor roll of the Randall-Deaf Smith County Herd Improvement Association during the month of September. One of these cows is known by Jersey breeders throughout the entire United States.

Buildings on the farm are being rebuilt, and an improvement program is in progress which will make the place much more attractive in appearance and more convenient as a place to work.

\$459 Is Added To D. A. R. Loan Fund Scholarship Here

Meeting at Beaumont this year the Daughters of the American Revolution added \$459.00 to the loan fund for West Texas State Teachers College, which was already a \$5,000.00 fund.

W. T. was chosen as the school in which scholarship funds would be given through the efforts of the D. A. R. Chapter in Amarillo. Mrs. J. L. Smith is working particularly hard in this undertaking according to members of the chapter. This loan fund is for women students only. In addition to the state fund, the Esther McCrory Chapter of Amarillo has a fund here.

The D. A. R.'s, as a national organization, spends most of its money on education. Its works are particularly concentrated in the mountainous states such as Kentucky, Tennessee, and states bordering these. The organization frequently presents flags, books and libraries, and other fixtures for schools.

Are You Ready

When your Children Cry for It

Baby has little upsets at times. All your care cannot prevent them. But you can be prepared. Then you can do what any experienced nurse would do—what most physicians would tell you to do—give a few drops of plain Castoria. No sooner done than Baby is soothed; relief is just a matter of moments. Yet you have eased your child without use of a single doubtful drug; Castoria is vegetable. So it's safe to use as often as an infant has any little pain you cannot pat away. And it's always ready for the crueler pangs of colic, or constipation, or diarrhea; effective, too, for older children. Twenty-five million bottles were bought last year.

MAJESTIC RADIO

NEARLY TWO MILLION PEOPLE CAN'T BE WPONG!

===and MAJESTIC Still Makes and Sells 6,000 Radio Sets Daily

Today from nearly every newspaper page you are being shouted at to "watch your step" in buying a radio set, to "look for this" or "look for that." You are being implored to "buy a strictly modern radio." You are being told that "no radio but the famous Gazoakis is up to the minute, because it has the new blah, blah, blah—something that no other radio manufacturer can equal.

Majestic has always said, "You cannot buy a better radio set than Majestic at any price." We rest our case on that statement. You are the judge. We do not need to tell

you that Majestic can make any sort of set, and can manufacture and use in that set, ANY TYPE OF TUBES THAT ARE KNOWN IN THE RADIO WORLD. Majestic has access to all the patents, has all the manufacturing facilities, has all the financial resources necessary to do the job.

Majestic is now making 6,000 sets each working day. Everything about a Majestic HAS to be good or we could not sell 6,000 a day. Is it too much to say that nearly two million people cannot be wrong?

President of Missionary Society Will Visit in Canyon on Tuesday, Nov. 19

MRS. NAT G. ROLLINS

Mrs. Nat G. Rollins, president of the Northwest Texas Woman's Missionary conference will visit in Canyon next Tuesday, November 19th.

Mrs. Rollins has been president of this great missionary conference for the past eleven years, and has held some office in the conference for thirty-two years, including the presidency. She has been and is now one of the greatest workers, and most enthusiastic supporters of the Methodist church in all of its institutions.

Mrs. Rollins was first to suggest

and lay the foundation for religious work of the Methodist church among the college students in state schools. She is interested in promoting the work of a Bible and religious educational teachers in all state institutions.

Mrs. Rollins will speak at chapel at the College Tuesday morning. There will be a luncheon in her honor. A reception at the Methodist church will be held in the afternoon from 3:00 to 5:00 o'clock to which all are invited. Members of the College and public school faculty together with the student bodies are especially invited.

Here's How

BY E. W. HOWE
"The Sage of Potato Hill"

GOOD BEHAVIOR. STRANGE HABITS. SHAKESPEARE.

Old Silius, the Roman who wrote his memoirs so candidly, said: "In early youth I was ordered to behave, and this command was enforced in manhood. I was resentful until I discovered there was reason in command, and that I could, in considerable measure, obey to my profit. As common soldier and officer I early discovered that the best behaved armies were most efficient; most frequently victorious. This was the rule, likewise, in households, neighborhoods, commonwealths, senates, individuals. So thereafter I did not resent the command, as many do; my observation has been that the ill-behaved are usually so because of rebellion; they do not understand that good behavior is for their interest as well as for the interest of the common wealth. . . . I as sincerely believe in good behavior as I believe in any other human policy that has turned out to be better than a bad one.

The delays, quibbles, expense, and corporation in our courts is disgraceful, compared with the courts of other countries; yet the people have taken no steps to reform the courts and the lawyers. . . . On

the other hand, our railroads are better in every way than the railroads abroad. Our service is better, and charges lower, our privately owned railroads are better than the government managed railroads elsewhere. Yet our attempt to reform the railroads amount to persecution; we are even willing to damage ourselves that we might cripple the railroads. . . . Of course we are the greatest and noblest people ever known, but I am coming to believe that even we have a lot of strange habits that need doctoring.

If Shakespeare's writings could be simplified, probably it would be found he originated more wit, more original and agreeable forms of expression, than any other hundred men of ancient or modern times. This man deserves his literary reputation; many others do not. But his writing is cast in such an ancient and difficult form that comparatively few are able to read him. With all his greatness, Shakespeare has been of little use to me; reading him gives me a headache. We all say Shakespeare's collected works is a Great Book. It is useful to only a few. A really great book should appeal to practically everybody. No such book has been written.

HINTS FOR THE HOME

BY NANCY HART

What is better in cold weather than corn-meal? It has such very valuable heat-supplying properties. Corn meal may be served in many delightful ways, and is very popular in so-called "Johnny Cake." To make this delicious repast scald one cupful (more if wished) of Indian meal with about one cupful of absolutely boiling water until not quite thin enough to spread, add one teaspoonful of sugar and one-half teaspoonful of salt and one-quarter cupful of milk; spread with a knife in a well-greased dripping pan, mark in squares, and brown in a hot oven of 450 degrees F. Serve hot and split and butter, as eaten. Or cover with a thin white sauce and serve with a little crisp bacon.

Woolen Stockings

If woolen stockings are dried on stocking stretchers, there is no need to worry about their shrinking. But suppose you have no stocking stretchers? Why, then, put shoe trees in the feet before drying the stockings and this will not only keep them from shrinking but will make them more comfortable next time you wear them.

Maple Frosting

To make maple frosting for cake the simplest way: Add maple syrup to confectioner's sugar until it is of the right consistency to spread on the cake.

Are You Sleepless?

Drink a glass of warm milk on retiring. It will help put you in sweet slumberland.

Oven Too Hot?

Put a basin of cold water in the oven if it is too hot and watch the temperature go down!

A Simple Autumn Dinner

Try this simple autumn dinner menu:
Deviled Eggs in Tomato Sauce
Mashed Potatoes
String Beans
Salad
Pie

Serving church suppers in cafeteria style adds a delightful touch of informality and at the same time insures hot food and quick service. Also it saves the women a good deal of work. The guests both serve themselves and clear their own places after the dinner, carrying their dishes to the serving shelf or whatever desired.

In the absence of a steam table or serving shelf, the plan can be nicely worked out by arranging the food on half a dozen oblong tables in the dining room, placed near the wall and convenient to kitchen and guest entrance.

The cafeteria supper should be an inexpensive two course meal that is plentiful and spicy. Baked smoked ham is very popular, and it is one of several things that can be prepared in the home the day before the supper.

Removing Perfume Spots

If you want to remove perfume spots from linen, rub the spots gently with peroxide and let dry. This generally is successful on linen, but don't try it on other fabrics unless you feel very experimental.

Dyeing Lace

To change white lace to a cream color, dip it in a weak tea. To stiffen the lace, put a cube of sugar into the tea.

For the Teeth

A small amount of powdered

pumice mixed with the regular tooth paste or powder and brushed over the teeth every four or five weeks will remove stains.

Saving Stockings

Many find that their silk stockings fade after two or three washings. To prevent this, rinse them—when they are new—in water to which a little vinegar has been added. This will keep them from fading for some time.

NEWSPAPER ADVERTISING BEST OF ALL SAYS GAS ADVERTISER

Newspaper advertising surpasses all other forms of displaying knowledge to the public, Keith Clevenger, publicity and advertising director of the American Gas Association, told that association's annual convention at Del Monte, Cal., recently.

"As long as people strive for intelligent information on current happenings, newspapers will be read by the vast majority," he said. "As long as the present traditions of the major portion of the American press for editorial honesty and impartial news service are maintained, newspapers will continue to be the most effective advertising media for American business."

KNOW TEXAS

Texas ranks first in wool production in 1929, leading Montana by 10,000,000 and California by 15,000,000 pounds. Total Texas production, including the fall clip, is estimated at 40,000,000 pounds out of a total American clip of 300,000,000.

The Texas Highway Department appropriates \$8,403,930 for maintenance of 18,000 miles of designated highway, nearly \$500 a mile. A speaker before a Weatherford luncheon club used this column for data for his address, under the title, "Know Texas."

Texas stands eighth in production of electric power for the first six months of 1929 with an increase of 25 per cent over the same period in 1928, a rate of growth which promises to give it much higher ranking within the next few years.

Texas advanced to tenth place in portland cement production with an increase of 12 per cent over 1927 as compared with a 2 per cent increase the country over.

Texas expects to ship 5,000 cars of citrus fruit this year against 2,000 last year, with a shortage expected in other citrus areas by reason of freezes and the Mediter-

ranean fly outbreak in Florida.

An old country farmer who had been a teetotaler all his life died. In the course of a kindly obituary notice, the Parish Magazine concluded with:

"In his later years he might often have been seen on the steps of the Congregational chapel, drinking in the sun."

His relatives have been informed that there are scarcely ground for

a libel action. At least he was no secret drinker.

Counsel: "Is it true that there are traces of insanity in your family?"

Witness: "Very likely. My grand father, who was studying for the ministry, gave it up to become a lawyer."

"Talk about a woman's sympathy! I told my best girl the

other night that I was broke."

"What did she say?"

"She said so was our engagement."

Birds never build any bigger nests than they need, which can't be said of men when they build houses.

The most important discovery for boys and girls to make is that work is good for the health.

Drive the Chevrolet Six

You Never Thought Such Performance
Possible in a Low-Priced Car

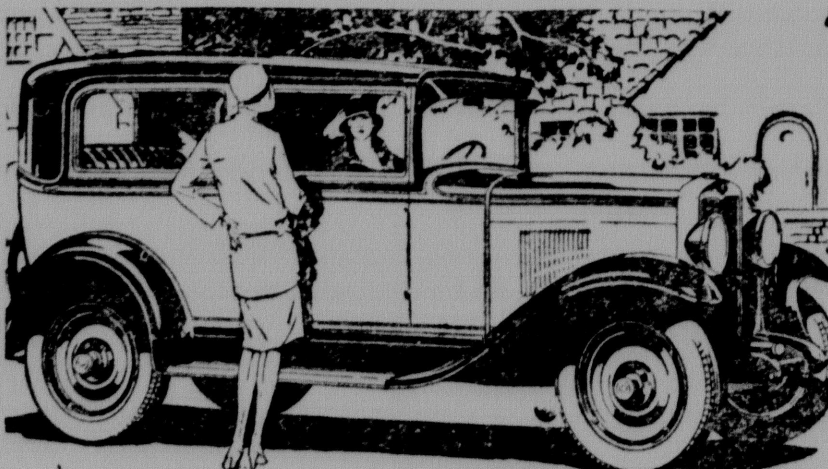

Regardless of what car you may now be driving you will be amazed when you first take the wheel of a Chevrolet Six, for here in the price range of the four is offered a type of overall performance previously expected only in cars selling at a much higher price.

At every speed Chevrolet's great six cylinder valve in head motor delivers its power in a smooth even velvety flow that makes every mile a delight. You can drive for

hours without the slightest discomfort from body rumble or noise fatigue, and its power, speed and acceleration are a revelation to the most experienced driver.

Furthermore Chevrolet's full ball bearing steering gear makes steering supremely easy and four long semi-elliptic springs make riding comfortable over the roughest roads.

President of Missionary Society Will Visit in Canyon on Tuesday, Nov. 19

MRS. NAT G. ROLLINS

Mrs. Nat G. Rollins, president of the Northwest Texas Woman's Missionary conference will visit in Canyon next Tuesday, November 19th.

Mrs. Rollins has been president of this great missionary conference for the past eleven years, and has held some office in the conference for thirty-two years, including the presidency. She has been and is now one of the greatest workers, and most enthusiastic supporters of the Methodist church in all of its institutions.

Mrs. Rollins was first to suggest

and lay the foundation for religious work of the Methodist church among the college students in state schools. She is interested in promoting the work of a Bible and religious educational teachers in all state institutions.

Mrs. Rollins will speak at chapel at the College Tuesday morning. There will be a luncheon in her honor. A reception at the Methodist church will be held in the afternoon from 3:00 to 5:00 o'clock to which all are invited. Members of the College and public school faculty together with the student bodies are especially invited.

Here's How

BY E.W. HOWE
"The Sage of Potato Hill"

GOOD BEHAVIOR. STRANGE HABITS. SHAKESPEARE.

Old Silius, the Roman who wrote his memoirs so candidly, said: "In early youth I was ordered to behave, and this command was enforced in manhood. I was resentful until I discovered there was reason in command, and that I could, in considerable measure, obey to my profit. As common soldier and officer I early discovered that the best behaved armies were most efficient; most frequently victorious. This was the rule, likewise, in households, neighborhoods, commonwealths, senates, individuals. So thereafter I did not resent the command, as many do; my observation has been that the ill-behaved are usually so because of rebellion; they do not understand that good behavior is for their interest as well as for the interest of the common wealth. . . . I as sincerely believe in good behavior as I believe in any other human policy that has turned out to be better than a bad one.

The delays, quibbles, expense, and corporation in our courts is disgraceful, compared with the courts of other countries; yet the people have taken no steps to reform the courts and the lawyers. . . . On

the other hand, our railroads are better in every way than the railroads abroad. Our service is better, and charges lower, our privately owned railroads are better than the government managed railroads elsewhere. Yet our attempt to reform the railroads amount to persecution; we are even willing to damage ourselves that we might cripple the railroads. . . . Of course we are the greatest and noblest people ever known, but I am coming to believe that even we have a lot of strange habits that need doctoring.

If Shakespeare's writings could be simplified, probably it would be found he originated more wit, more original and agreeable forms of expression, than any other hundred men of ancient or modern times. This man deserves his literary reputation; many others do not. But his writing is cast in such an ancient and difficult form that comparatively few are able to read him. With all his greatness, Shakespeare has been of little use to me; reading him gives me a headache. We all say Shakespeare's collected works is a Great Book. It is useful to only a few. A really great book should appeal to practically everybody. No such book has been written.

HINTS FOR THE HOME

BY NANCY HART

What is better in cold weather than corn-meal? It has such very valuable heat-supplying properties. Corn meal may be served in many delightful ways, and is very popular in so-called "Johnny Cake." To make this delicious repast scald one cupful (more if wished) of Indian meal with about one cupful of absolutely boiling water until not quite thin enough to spread, add one teaspoonful of sugar and one-half teaspoonful of salt and one-quarter cupful of milk; spread with a knife in a well-greased dripping pan, mark in squares, and brown in a hot oven of 450 degrees F. Serve hot and split and butter, as eaten. Or cover with a thin white sauce and serve with a little crisp bacon.

Woolen Stockings

If woolen stockings are dried on stocking stretchers, there is no need to worry about their shrinking. But suppose you have no stocking stretchers? Why, then, put shoe trees in the feet before drying the stockings and this will not only keep them from shrinking but will make them more comfortable next time you wear them.

Maple Frosting

To make maple frosting for cake the simplest way: Add maple syrup to confectioner's sugar until it is of the right consistency to spread on the cake.

Are You Sleepless?

Drink a glass of warm milk on retiring. It will help put you in sweet slumberland.

Oven Too Hot?

Put a basin of cold water in the oven if it is too hot and watch the temperature go down!

A Simple Autumn Dinner

Try this simple autumn dinner menu:
Deviled Eggs in Tomato Sauce
Mashed Potatoes
String Beans
Salad
Pie

Serving church suppers in cafeteria style adds a delightful touch of informality and at the same time insures hot food and quick service. Also it saves the women a good deal of work. The guests both serve themselves and clear their own places after the dinner, carrying their dishes to the serving shelf or whatever desired.

In the absence of a steam table or serving shelf, the plan can be nicely worked out by arranging the food on half a dozen oblong tables in the dining room, placed near the wall and convenient to kitchen and guest entrance.

The cafeteria supper should be an inexpensive two course meal that is plentiful and spicy. Baked smoked ham is very popular, and it is one of several things that can be prepared in the home the day before the supper.

Removing Perfume Spots

If you want to remove perfume spots from linen, rub the spots gently with peroxide and let dry. This generally is successful on linen, but don't try it on other fabrics unless you feel very experimental.

Dyeing Lace

To change white lace to a cream color, dip it in a weak tea. To stiffen the lace, put a cube of sugar into the tea.

For the Teeth

A small amount of powdered

pumice mixed with the regular tooth paste or powder and brushed over the teeth every four or five weeks will remove stains.

Saving Stockings

Many find that their silk stockings fade after two or three washings. To prevent this, rinse them—when they are new—in water to which a little vinegar has been added. This will keep them from fading for some time.

NEWSPAPER ADVERTISING BEST OF ALL SAYS GAS ADVERTISER

Newspaper advertising surpasses all other forms of displaying knowledge to the public, Keith Clevenger, publicity and advertising director of the American Gas Association, told that association's annual convention at Del Monte, Cal., recently.

"As long as people strive for intelligent information on current happenings, newspapers will be read by the vast majority," he said. "As long as the present traditions of the major portion of the American press for editorial honesty and impartial news service are maintained, newspapers will continue to be the most effective advertising media for American business."

KNOW TEXAS

Texas ranks first in wool production in 1929, leading Montana by 10,000,000 and California by 15,000,000 pounds. Total Texas production, including the fall clip, is estimated at 40,000,000 pounds out of a total American clip of 300,000,000.

The Texas Highway Department appropriates \$8,403,930 for maintenance of 18,000 miles of designated highway, nearly \$500 a mile.

A speaker before a Weatherford luncheon club used this column for data for his address, under the title, "Know Texas."

Texas stands eighth in production of electric power for the first six months of 1929 with an increase of 25 per cent over the same period in 1928, a rate of growth which promises to give it much higher ranking within the next few years.

Texas advanced to tenth place in Portland cement production with an increase of 12 per cent over 1927 as compared with a 2 per cent increase the country over.

Texas expects to ship 5,000 cars of citrus fruit this year against 2,000 last year, with a shortage expected in other citrus areas by reason of freezes and the Mediter-

Drive the Chevrolet Six

You Never Thought Such Performance
Possible in a Low-Priced Car

Regardless of what car you may now be driving you will be amazed when you first take the wheel of a Chevrolet Six, for here in the price range of the four is offered a type of overall performance previously expected only in cars selling at a much higher price.

At every speed Chevrolet's great six cylinder valve in head motor delivers its power in a smooth even velvety flow that makes every mile a delight. You can drive for

hours without the slightest discomfort from body rumble or noise fatigue, and its power, speed and acceleration are a revelation to the most experienced driver. Furthermore Chevrolet's full ball bearing steering gear makes steering supremely easy and four long semi-elliptic springs make riding comfortable over the roughest roads.

You owe it to yourself to see and drive this car. Come in today.

Work on Completion of Baptist Church Auditorium Begun

Members of the Baptist Church are feeling encouraged this morning over the progress of their campaign for the completion of the auditorium of the new church building. Work was begun on this campaign a few weeks ago with \$2,000 as an objective. The fund has already passed the \$3,000 mark and promises to continue.

Workmen are beginning work this morning on the auditorium, and it is expected that between now and Christmas the room will be made warm and comfortable and that the regular church services will be held there. Up to this time the Sunday School Assembly room has been used for the church services.

The pastor announces all regular services next Sunday.

Large Number From Here Amarillo Program

Canyon was well represented Monday in the Armistice Day program held in Amarillo. The College took a prominent part in the parade with several floats. The College Band, Randall Hall Pep Squad, Red Men, Pi Omegas and Tumbling team were among the students from the College.

The Palo Duro Post had a large number of ex-service men in the parade.

AMARILLO TEACHERS GIVE LUNCHEON SATURDAY

Dignity and its maintenance in the teaching profession was the theme of the talk made by President J. A. Hill at the luncheon at the high school cafeteria at noon Saturday. The occasion was that of an Amarillo teachers meeting.

The luncheon was given in honor of President Hill and those members of the college faculty who are teaching extension classes in Amarillo.

R. McGee was in Clovis on business during the week end.

WISE RULES

The New York State Conservation Department has made eleven wise rules for the prevention of hunting accidents.

As men take to the fields and wood, these rules deserve wide circulation. They are sensible. All hunters, in every part of the country would do well to follow them. We print them herewith:

"Never carry loaded guns in automobiles or other vehicles.

"When afield hunting birds, keep abreast of and know the exact location of your companion.

"In loading never point a gun in the direction of your companion.

"In climbing over stone walls and fences, first break or unload your gun.

"A bird quartering to the right in the vicinity of your hunting companions should never be fired on by a hunter on the extreme left and vice versa.

"Never leave a loaded gun standing against a tree or lying on the ground where a dog may get at it.

"Always keep your gun pointed away from your companions when you stop to talk.

"In handing a gun to a person for inspection, be sure it is unloaded.

"Never shoot in the direction of your companions because you consider yourself a good marksman. You are taking dangerous chances.

"Carry a gun pointed down to the left. If you shoot left handed walk at the extreme right of the party.

"At all times be careful."

A pedestrian may be defined as a person who is always found in front of an automobile.

Kiowa Indian Art Collection Is of Exceeding Beauty

After great effort and unusual expense Mrs. Geraldine Green obtained a beautiful collection of Indian art as shown by members of the Kiowa Indian tribe. The assemblage is to be found in the office of the dean of women and is at the disposal of anyone wishing to gain an idea of the Indian's artistic ability.

The paintings are done by Indians of the Kiowa tribe, and collected by C. Szewdzicki. In making the collection Mr. Szewdzicki chose pictures which vividly convey Indian history and spirit. There is a most beautiful harmony of the numerous colors in each picture. The color schemes and effect produced by these Indian artists indicate the red man's profound love and appreciation of color. Many of the pictures are wholly exemplary of the Indian ceremonial and rituals.

These pictures not only give an insight of true Indian life; but they expose the Indian to be truly an artist—an artist of nature. They become more impressive when the observer is aware that the work is done by the hand guided only by the artist's mental picture of that which he puts into paint.

AN INVENTORY

By Dr. John Joseph Gaines
What have I done, and what am I doing to make people love and respect me? Am I doing anything, consciously or unconsciously, to make them dislike or hate me? I am in daily contact with folks—drones of them; they are going to think of me one way or the other. Even if they regard me with indifference, that is of no benefit to me. I'd rather their opinions of me were good, and, it is wholly with me whether they are.

Nobody loves a human hog—the sort that lives solely for himself. I've seen them, so have you.

The human hog roots strictly for himself; he knows no Sunday. Seven full days per week he toils—ever looking down at his sordid pile; he never looks toward the blue heavens. He serves one god—the golden calf—and never for a moment takes his eyes off it; for him, there is no security or safety in any sort of God.

Let misfortune touch him on the pocket-book, and he crumbles like a leaf. When his god shatters, as all earthly things must shatter, he is wrecked morally, physically, and, spiritually—if a hog has a spirit. He hasn't the true and splendid manhood to rise above the ruin of his broken idol.

Am I a human hog? Are you? The answer is—No! Need I ask why? For one thing good people don't cast pearls before swine, lest the beasts turn upon them and rend them. Just why any sane being can adopt the tactics of the hog and live only for his own greedy self, has always been a mystery to me.

The human hog never sees the error of his way. And, he wonders why people don't feel sorry for him when his boat capsizes. He is willing to accept the best people have, but he has nothing to give in exchange. His superb selfishness blinds him as it leads him slowly to destruction.

If he could find fault with himself, he would not be a human hog.

DUMMY WAS IN LUCK

The film director was making a Western thriller, and working very hard to get some action into it.

Finally he turned from the brink of a cliff, mopped his brow, and glanced at a dummy made of straw and old clothes lying on the ground beside him.

"Good heavens!" he shouted. "Who was it we threw over the cliff?"—Pearson's Weekly.

Mr. and Mrs. C. R. Burrow and Mrs. S. L. Ingham left Tuesday to visit with Dr. and Mrs. Robert Nebel in Galveston. Mrs. D. A. Shirley accompanied them to Houston where she stopped for a visit with her sister and mother.

Miss Joan Estes of Memphis is visiting with her aunt, Mrs. J. J. Walker. Miss Estes was taken home from Lubbock Tech because of illness last week and Mrs. Walker has spent the past week with her.

Mr. and Mrs. Elmer Prichard and children, J. D. and Velma, of Canadian spent the week end visiting in the homes of her parents, Mr. and Mrs. W. E. Laughery and the homes of her brothers and sisters, Mr. and Mrs. Ed Phillips, Mr. and Mrs. P. V. Winstead, and Mr. and Mrs. Carl Laughery.

John Burgan of Clarendon spent the week end visiting in the home of his parents, Mr. and Mrs. A. N. Burgan.

Miss Margaret Good of Canadian spent the week end visiting here. She is an ex-student of the College.

Miss Martha Fields of Plainview spent Monday visiting with Miss Irma Hinkle. Miss Fields, whose home is in Groom, is attending Wayland College this year.

Law Sone of Panhandle spent the week end visiting with friends here.

Delbert Lowes of Happy visited with his mother here during the week end.

Billie and Robert Wagoner of Groom spent Monday here visiting friends and attending the ball game.

Mr. and Mrs. Louis Fields of Amarillo attended the ball game here Monday. They have visited here many times in the past.

Miss Patsy Van Dyke spent the week end visiting with Miss Bee Holland.

R. E. Watkins and Percy Wells of Wellington spent the week end visiting in the J. W. Bond home.

Mr. and Mrs. Eddie Jameson and baby of Borger spent Sunday in the home of her parents, Mr. and Mrs. Holland. Mrs. Jameson will be remembered as Miss Mary Lou Holland.

Mr. and Mrs. John Ross and children and Mr. and Mrs. Ben Frank Ball of Mississippi have moved to this section from Mississippi and will make their home here.

Homer F. Glover of Amarillo has moved to Canyon and will have charge of the butcher shop in the M System.

Golden Green visited in Amarillo during the week end.

Mr. and Mrs. Hal Harpole and baby of Hereford have been visiting in the home of Mr. and Mrs. W. L. Shaw.

Mr. and Mrs. Homer Price visited with Mr. and Mrs. Henry Price in Happy Sunday.

Mr. and Mrs. E. W. Woods and Children of Lubbock spent Sunday and Monday visiting in the home of Mr. and Mrs. W. H. Woods.

Miss Zelma Robinson spent the week end visiting in Amarillo.

Mr. and Mrs. C. B. Farmer of Amarillo visited in the D. Mack Stewart home Sunday.

Mr. and Mrs. Jack Boutwell and Mr. and Mrs. Lee R. Johnson visited in Amarillo Monday.

Mr. and Mrs. George Mooney of Dimmitt spent the week end visiting here. Mrs. Mooney will be remembered as Miss Nola Gollehon.

Bailey Bandy spent Tuesday afternoon in Amarillo.

Jerry Malin of Amarillo was in Canyon on business yesterday.

Bill Redfearn, Jack Burgan, and Virgil McGee visited in Vega one day last week.

Bill Anderson of Tulia visited with his mother, Mrs. W. N. Anderson during the week end.

Miss Ada Clare Baine spent the week end visiting in her home in Plainview.

Herbert Gibson of Turkey spent Armistice Day visiting in Canyon. He attended school here last year.

Mr. J. L. Duflet was called to the bedside of his mother at Texarkana last Wednesday night. News from him after reaching Texarkana reported that his mother had rallied somewhat, but was still in a critical condition.

Work on Completion of Baptist Church Auditorium Begun

Members of the Baptist Church are feeling encouraged this morning over the progress of their campaign for the completion of the auditorium of the new church building. Work was begun on this campaign a few weeks ago with \$2,000 as an objective. The fund has already passed the \$3,000 mark and promises to continue.

Workmen are beginning work this morning on the auditorium, and it is expected that between now and Christmas the room will be made warm and comfortable and that the regular church services will be held there. Up to this time the Sunday School Assembly room has been used for the church services.

The pastor announces all regular services next Sunday.

Large Number From Here Amarillo Program

Canyon was well represented Monday in the Armistice Day program held in Amarillo. The College took a prominent part in the parade with several floats. The College Band, Randall Hall Pep Squad, Red Men, Pi Omegas and Tumbling team were among the students from the College.

The Palo Duro Post had a large number of ex-service men in the parade.

AMARILLO TEACHERS GIVE LUNCHEON SATURDAY

Dignity and its maintenance in the teaching profession was the theme of the talk made by President J. A. Hill at the luncheon at the high school cafeteria at noon Saturday. The occasion was that of an Amarillo teachers meeting.

The luncheon was given in honor of President Hill and those members of the college faculty who are teaching extension classes in Amarillo.

R. McGee was in Clovis on business during the week end.

WISE RULES

The New York State Conservation Department has made eleven wise rules for the prevention of hunting accidents.

As men take to the fields and wood, these rules deserve wide circulation. They are sensible. All hunters, in every part of the country would do well to follow them. We print them herewith:

"Never carry loaded guns in automobiles or other vehicles.

"When afield hunting birds, keep abreast of and know the exact location of your companion.

"In loading never point a gun in the direction of your companion.

"In climbing over stone walls and fences, first break or unload your gun.

"A bird quartering to the right in the vicinity of your hunting companions should never be fired on by a hunter on the extreme left and vice versa.

"Never leave a loaded gun standing against a tree or lying on the ground where a dog may get at it.

"Always keep your gun pointed away from your companions when you stop to talk.

"In handing a gun to a person for inspection, be sure it is unloaded.

"Never shoot in the direction of your companions because you consider yourself a good marksman. You are taking dangerous chances.

"Carry a gun pointed down to the left. If you shoot left handed walk at the extreme right of the party.

"At all times be careful."

A pedestrian may be defined as a person who is always found in front of an automobile.

Kiowa Indian Art Collection Is of Exceeding Beauty

After great effort and unusual expense Mrs. Geraldine Green obtained a beautiful collection of Indian art as shown by members of the Kiowa Indian tribe. The assemblage is to be found in the office of the dean of women and is at the disposal of anyone wishing to gain an idea of the Indian's artistic ability.

The paintings are done by Indians of the Kiowa tribe, and collected by C. Szwedzicki. In making the collection Mr. Szwedzicki chose pictures which vividly convey Indian history and spirit. There is a most beautiful harmony of the numerous colors in each picture. The color schemes and effect produced by these Indian artists indicate the red man's profound love and appreciation of color. Many of the pictures are wholly exemplary of the Indian ceremonials and rituals.

These pictures not only give an insight of true Indian life; but they expose the Indian to be truly an artist—an artist of nature. They become more impressive when the observer is aware that the work is done by the hand guided only by the artist's mental picture of that which he puts into paint.

AN INVENTORY

By Dr. John Joseph Gaines
What have I done, and, what am I doing to make people love and respect me? Am I doing anything, consciously or unconsciously, to make them dislike or hate me? I am in daily contact with folks—doves of them; they are going to think of me one way or the other. Even if they regard me with indifference, that is of no benefit to me. I'd rather their opinions of me were good, and, it is wholly with me whether they are.

Nobody loves a human hog—the sort that lives solely for himself. I've seen them, so have you.

The human hog roots strictly for himself; he knows no Sunday. Seven full days per week he toils—ever looking down at his sordid pile; he never looks toward the blue heavens. He serves one god—the golden calf—and never for a moment takes his eyes off it; for him, there is no security or safety in any sort of God.

Let misfortune touch him on the pocket-book, and he crumbles like a leaf. When his god shatters, as all earthly things must shatter, he is wrecked morally, physically, and, spiritually—if a hog has a spirit. He hasn't the true and splendid manhood to rise above the ruin of his broken idol.

Am I a human hog? Are you? the answer is—No! Need I ask why? For one thing good people don't cast pearls before swine, lest the beasts turn upon them and rend them. Just why any sane being can adopt the tactics of the hog and live only for his own greedy self, has always been a mystery to me.

The human hog never sees the error of his way. And, he wonders why people don't feel sorry for him when his boat capsizes. He is willing to accept the best people have, but he has nothing to give in exchange. His superb selfishness blinds him as it leads him slowly to destruction.

If he could find fault with himself, he would not be a human hog.

DUMMY WAS IN LUCK

The film director was making a Western thriller, and working very hard to get some action into it.

Finally he turned from the brink of a cliff, mopped his brow, and glanced at a dummy made of straw and old clothes lying on the ground beside him.

"Good heavens!" he shouted. "Who was it we threw over the cliff?"—Pearson's Weekly.

C. H. S. Talkie to Present 'Stop Thief' Tuesday, Nov 26

Coming! An exciting drama, "Stop Thief," to be presented by the C. H. S. Talkie or the Dramatic Club in the high school auditorium on Tuesday, November 26. The club is working hard on this three-act play which is a snappy comedy, full of laughs and much excitement. In the play a ruby ring is lost; someone steals the bracelet; and the money is found in the minister's pocket. All of these events occur on the daughter's wedding day, which is very mysterious.

Much equipment is needed for the library, and the money from this play is going to help a great deal. Plan to enjoy a funny and mysterious play.

Help Keep Canyon Clean!

Are You expecting a Baby?

THOUSANDS of expectant mothers are now cheerful and happy. Their waiting months have been made comfortable and they will be better prepared when the great moment of childbirth arrives. This has also been true of countless thousands of expectant mothers for over 60 years who have used "Mother's Friend," a scientifically prepared skin lubricant and pain-reliever which originated in the prescription of an eminent obstetrician.

Mother's Friend lessens pain

You, too, may enjoy the comfort "Mother's Friend" gives. It is so soothing and relaxing. Brings relief promptly. Very valuable in keeping the breasts in good condition. Also puts you in the shape for the approaching ordeal.

"Mother's Friend" is on sale at all drug stores, \$1.25 per bottle. Try a massage with it tonight and notice the ease and comfort it gives. A booklet on "Things to Know Before Baby Comes" will be mailed in plain envelope, free, on request. Address: Bradford Regulator Co., Dept. 12, Atlanta, Ga.

the midnight Misadventure of Gregory Jones

A crash brought Mrs. Gregory Jones bolt upright in bed, her heart pounding.

"Why!" demanded her husband savagely, nursing a bruised shin and groping for the light switch. "Why did you have to leave that chair there?"

In the front hall the telephone rang again, insistently. Jones shivered in the draft from the open window, and without waiting for a reply, disappeared through the doorway. Petulantly, his voice drifted back to her.

"No, Eleanor is not here. Yes, we're expecting her tomorrow. Tell her what I'll tell you, young man, that it's an imposition to wake folks at this time of night! And I'll deliver no messages!"

The receiver banged on the hook. Jones, muttering to himself, stumbled back down the hall.

"That settles it!" he exclaimed, still shivering. "Tomorrow, I'll have a telephone put in this bedroom."

Mrs. Jones smiled drowsily, snuggled deep into her pillow.

"Where have I heard that before," she murmured. "Tomorrow, I'll order one, myself."

Telephones where you need them save time, patience—and midnight misadventures.

Few know that one or two additional instruments cost considerably less than the single telephone they now have!

By a wisely-placed "extension" or two, and perhaps a rearrangement of the equipment you already have, an expert telephone man can often double the convenience of your telephone service.

Elizabeth Jameson Crowned Queen at Carnival Fri. Night

Everyone seems pleased with the results of the Senior Carnival which took place Friday evening, Nov. 8, in the high school building. The booths, sponsored by different classes in the high school, were especially interesting; and they showed that a great deal of work had been done by the students as well as a great deal of thought applied. Many original ideas were put into effect through these booths. "The Baby Show" seems to have proved more interesting than any other feature of the evening with the exception of the Follies. A student was chosen from each class as the Baby of that class. These babies were dressed up, and put on exhibition in the Home Economics Room and voted upon. Baby Thomas Elliston received the most votes, thereby being decided upon as the Canyon High School Baby.

Among other booths were the "Strong Man," featuring Elvin Wesley; the "Menagerie," the "Underworld," and various other features of interest.

The main event of the evening was the crowning of the Queen and King—Elizabeth Jameson and James Cabe. This ceremony took place in the auditorium. After the attendants had marched upon the stage, and the king and queen had mounted the throne, the king placed the crown upon the queen's head. The ceremonious procedure produced a beautiful effect.

The Follies were then rendered by members of the Senior class, assisted by members of the other classes. This act consisted of three main parts: A group of boys and girls who sang the "Desert Song" and "When My Dreams Come True." A group of boys and girls who wore slickers, the girls carrying umbrellas who sang "Rain," and the song, "Honey," sung by the entire chorus. The whole program was very interesting.

We wish to thank everyone who assisted in this carnival for his part in making the carnival the best C. H. S. has given thus far.

Mr. and Mrs. Tom Connolly of Clarendon spent the week end at the L. F. Shetty home.

CELEBRITY CONTEST VERY CLOSE THIS YEAR

One of the most thrilling events of the year took place last Thursday evening between four and five o'clock at Canyon high school, when the contest for the Queen and King closed. The contest was between all of the classes in high school, but was mainly between the juniors and seniors because of their desires to have their candidates crowned at the carnival. Votes started being cast at four o'clock and from then until five the juniors and seniors took time about being ahead.

Interested juniors and seniors stood anxiously waiting in the hall, each jeering the other and each confident that he would win. The seniors and juniors, at one minute until five rushed into Mr. Carruth's office and cast their last votes. The seniors, not doubting but that they would win, stood around and waited for their votes to be counted; while the juniors, afraid that their efforts had been in vain, watched the door and listened for news from within the office.

After what seemed ages the door to the office was suddenly opened and a group of juniors rushed out, laughing and crying all at once.

They had won the contest! The juniors had \$57 and something, while the seniors had \$56 and something, at least only 84 cents difference.

The seniors, although very disappointed, were glad to have James Cabe and Elizabeth Jameson crowned as King and Queen of the Carnival.

SCOTCH STORY NO. 9999

Two Scotchmen took dinner together in a restaurant. After dinner, the waiter brought the check. The two sat and talked for a couple of hours, after which conversation failed, and they merely smoked in silence. At one a. m. one of them got up and telephoned to his wife.

"Donna wait up any longer for me, lass, he said. "It looks like a deadlock."

HIGH FINANCE

Mother: "Sammy, when you divided those seven pieces of candy with your sister did you give her four?"

Sammy: "No, mom. I knew they wouldn't come out even so I ate one before I began to divide."

Jimmie: "Whenever I learn anything I store it away."

Neighbor: "Well I hope you'll soon learn to play your saxophone."

Eagles Play Tigers at Buffalo Park Friday Afternoon

The game which the Eagles were to have played with the Tigers last Friday was postponed until this Thursday. This game has been scheduled three times, and although it was called off because of snow last Friday, it is hoped that they will really play this Thursday. The Tigers have a good team this year, but as this is the last game which the Eagles will play they naturally intend to have the big end of the score.

After making a few announcements in chapel Thursday, Mr. McDonald dismissed the students in order that they might have class meetings for the remainder of the period. Every class had important business to engage in because Thursday afternoon was the closing time of the contest. The classes elected their babies for the baby show. All of the committees began working on the carnival booths which proved very successful Friday night.

Guide: "This is the moat. Is there a question you would like to ask?"
American: "Yes; How could a fellow get one in his eye?"

SPELLS OF BACKACHE

"I HAVE used Cardui at intervals for sixteen years, when I suffered from weakness, and it always helped me," says Mrs. J. W. Jinright, R. F. D. 2, Troy, Ala.

"Mostly I was afflicted with bad spells of backache. At times I felt as if my back would break. I would drag one foot after the other, in a helpless sort of a way, and once I got down in bed. My husband urged me to take Cardui, and I soon found what a fine medicine it really was. "When my second child was little, I was in very bad health. I did not pick up as I should have. I was weak and sickly. I do not believe that I would have come through, but for Cardui."

This rate is good for subscriptions only in the states of Texas, Oklahoma, Arkansas, Louisiana and New Mexico.

AND GOOD ONLY UNTIL DECEMBER 1st, 1929.

JUNIOR FOOD SALE

In the Celebrity contest it was necessary for the juniors to work for their candidates. One thing done by the juniors was the food sales they had. The girls of the class sold lunches at the high school Wednesday. Among the foods that were sold were sandwiches, pie, candy, and fruit.

Wednesday night the juniors sold candy at the Olympic theater. The juniors appreciate the help they received through the sales. With these sales and many other things, the juniors succeeded in crowning their celebrities.

"And what did you learn today at school?"
"I learned to say 'Yes, ma'am' and 'No ma'am.'"
"You did?"
"Yeah!"

THE DEAR BOY

"Did the children behave when you bathed them?" asked the mistress of the new French nurse.

"All but ze biggest boy—and, mirableu!—how he fight and kick and nearly tear ze face off me before I could get him in."

"Which biggest boy—we've only one boy, and he's only two years old?"

"Eet is no him at all, I mean. 'Tis a boy who wears glasses an' has ze curly hair."

"Boy! Boy! That's not a boy! That's my husband!"—The Ink Spot.

JUST FOR FUN

"How long you in jail fo', Mose?"

"Two weeks."

"What am de cha'ge?"

"No cha'ge, everything is free."

"Ah means, what has you did?"

"Done shot my wife."

"You killed yo' wife and only in jail for two weeks?"

"Dat's all—when I gits hung."

NURSES know, and doctors have declared there's nothing quite like Bayer Aspirin for all sorts of aches and pains, but be sure it is genuine Bayer; that name must be on the package, and on every tablet. Bayer is genuine, and the word genuine—in red—is on every box. You can't go wrong if you will just look at the box:

Aspirin is the trade mark of Bayer Manufacture of Monocetateester of Salicylicacid

Students Surprised With Big Holiday on Armistice Day

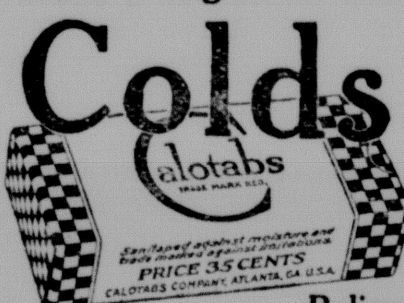

Monday morning a group of Canyon High students reluctantly wended their way to the school building. It seemed that most of the students had taken a holiday, for only a few were there.

When the nine o'clock bell rang each teacher announced that to start off the day right, we would have chapel first. When the students had assembled, several patriotic songs were sung, and Mr. McDonald made a short talk on the flag. Then Mr. Carruth announced that school would be dismissed for the rest of the day. After singing a few more songs, the students joyfully left the school building.

Each student thoroughly enjoyed the holiday, and hopes that there will be more in the future.

A GLORIFIED CLEAR SKIN

A clear, smooth, lovely skin enhances personal attractiveness! More happiness and friends may depend upon it.

The way to the skin is through the blood. Rich, red, healthy blood nourishes the body and aids in protecting it against infection and disease.

When you take S.S.S. to get rid of these outside blemishes you are building up the system to ward off graver diseases.

S.S.S.

If you are one of the embarrassed—and men are not exceptions—with skin blemishes that linger, and sometimes leave scars, you will want to possess body power to clear up your skin.

S.S.S. will help Nature give you this power. Internal healthfulness will then reflect in your skin a natural loveliness—a skin glorified.

Millions of people have taken advantage of the wonderful medicinal properties in S.S.S. It gives to Nature what it needs to build you up so that your system may throw off the cause.

When your system is filled with rich, red blood, the body's

power of resistance to infection and disease is raised. Your appetite should improve. Firm flesh should take the place of that which was once flabby. You should sleep soundly. You should feel strong. Your nerves become steady.

Take S.S.S. daily at mealtime. It promotes healthy body building. Seek energy, vitality and a clear skin through the great blood tonic which is made from strictly fresh vegetable drugs and has stood the test for over 100 years.

All good drug stores sell S.S.S. in two sizes. Ask for the larger size. It is more economical.

Eagles Play Tigers at Buffalo Park Friday Afternoon

The game which the Eagles were to have played with the Tigers last Friday was postponed until this Thursday. This game has been scheduled three times, and although it was called off because of snow last Friday, it is hoped that they will really play this Thursday. The Tigers have a good team this year, but as this is the last game which the Eagles will play they naturally intend to have the big end of the score.

After making a few announcements in chapel Thursday, Mr. McDonald dismissed the students in order that they might have class meetings for the remainder of the period. Every class had important business to engage in because Thursday afternoon was the closing time of the contest. The classes elected their babies for the baby show. All of the committees began working on the carnival booths which proved very successful Friday night.

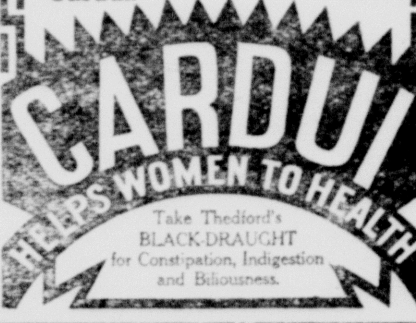

Guide: "This is the moat. Is there a question you would like to ask?"

American: "Yes; How could a fellow get one in his eye?"

SPELLS OF BACKACHE

"I HAVE used Cardui at intervals for sixteen years, when I suffered from weakness, and it always helped me," says Mrs. J. W. Jinright, R. F. D. 2, Troy, Ala.

"Mostly I was afflicted with bad spells of backache. At times I felt as if my back would break. I would drag one foot after the other, in a helpless sort of a way, and once I got down in bed. My husband urged me to take Cardui, and I soon found what a fine medicine it really was. "When my second child was little, I was in very bad health. I did not pick up as I should have. I was weak and sickly. I do not believe that I would have come through, but for Cardui."

Take Theodore's BLACK DRAUGHT for Constipation, Indigestion and Bilelessness.

6th Annual BARGAIN RATE OFFER For Mail Subscriptions

This is another tremendous value. The Dallas Morning News, daily and Sunday, 365 days, mailed to your address at a substantial saving. The regular rate is \$10.00 a year, for only **\$7.45**

To those who do not desire the big Sunday edition, during this campaign we will mail the daily edition only at a reduced rate. Regular rate \$6 a year, now **\$5.95**

The Dallas Morning News

Supreme in Texas

Both the Dallas News and the Canyon News one year for only **\$7.45**

The Dallas News, Dallas, Texas. Herewith my remittance of \$_____ to cover cost of subscription to The Dallas Morning News (daily and Sunday) (daily only) for one year.

Name _____ P. O. _____

R. F. D. or Street _____ State _____

This rate is good for subscriptions only in the states of Texas, Oklahoma, Arkansas, Louisiana and New Mexico.

AND GOOD ONLY UNTIL DECEMBER 1st, 1929.

JUNIOR FOOD SALE

In the Celebrity contest it was necessary for the juniors to work for their candidates. One thing done by the juniors was the food sales they had. The girls of the class sold lunches at the high school Wednesday. Among the foods that were sold were sandwiches, pie, candy, and fruit.

Wednesday night the juniors sold candy at the Olympic theater. The juniors appreciate the help they received through the sales. With these sales and many other things, the juniors succeeded in crowning their celebrities.

"And what did you learn today at school?"

"I learned to say 'Yes, ma'am' and 'No ma'am.'"

"You did?"

"Yeah!"

THE DEAR BOY

"Did the children behave when you bathed them?" asked the mistress of the new French nurse.

"All but ze biggest boy—and, mirabeau!—how he fight and kick and nearly tear ze face off me before I could get him in."

"Which biggest boy—we've only one boy, and he's only two years old?"

"Eet is no him at all, I mean. 'Tis a boy who wears glasses an' has ze curly hair."

"Boy! Boy! That's not a boy! That's my husband!"—The Ink Spot.

JUST FOR FUN

"How long you in jail fo', Mose?"

"Two weeks."

"What am de chage?"

"No chage, everything is free."

"Ah means, what has you did?"

"Done shot my wife."

"You killed yo' wife and only in jail for two weeks?"

"Dat's all—then I gits hung."

NURSES know, and doctors have declared there's nothing quite like Bayer Aspirin for all sorts of aches and pains, but be sure it is genuine Bayer; that name must be on the package, and on every tablet. Bayer is genuine, and the word genuine—in red—is on every box. You can't go wrong if you will just look at the box:

Aspirin is the trade mark of Bayer Manufacture of Monoaceticacidester of Salicylicacid

Students Surprised With Big Holiday on Armistice Day

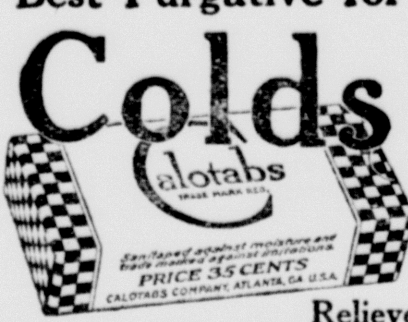

Monday morning a group of Canyon High students reluctantly wended their way to the school building. It seemed that most of the students had taken a holiday, for only a few were there.

When the nine o'clock bell rang each teacher announced that to start off the day right, we would have chapel first. When the students had assembled, several patriotic songs were sung, and Mr. McDonald made a short talk on the flag. Then Mr. Carruth announced that school would be dismissed for the rest of the day. After singing a few more songs, the students joyfully left the school building.

Each student thoroughly enjoyed the holiday, and hopes that there will be more in the future.

A GLORIFIED CLEAR SKIN

A clear, smooth, lovely skin enhances personal attractiveness! More happiness and friends may depend upon it.

The way to the skin is through the blood. Rich, red, healthy blood nourishes the body and aids in protecting it against infection and disease.

When you take S.S.S. to get rid of these outside blemishes you are building up the system to ward off graver diseases.

S.S.S.

If you are one of the embarrassed—and men are not exceptions—with skin blemishes that linger, and sometimes leave scars, you will want to possess body power to clear up your skin.

S.S.S. will help Nature give you this power. Internal healthfulness will then reflect in your skin a natural loveliness—a skin glorified.

Millions of people have taken advantage of the wonderful medicinal properties in S.S.S. It gives to Nature what it needs to build you up so that your system may throw off the cause.

When your system is filled with rich, red blood, the body's

power of resistance to infection and disease is raised. Your appetite should improve. Firm flesh should take the place of that which was once flabby. You should sleep soundly. You should feel strong. Your nerves become steady.

Take S.S.S. daily at mealtime. It promotes healthy body building. Seek energy, vitality and a clear skin through the great blood tonic which is made from strictly fresh vegetable drugs and has stood the test for over 100 years.

All good drug stores sell S.S.S. in two sizes. Ask for the larger size. It is more economical.

the midnight Misadventure of Gregory Jones

A crash brought Mrs. Gregory Jones bolt upright in bed, her heart pounding.

"Why!" demanded her husband savagely, nursing a bruised shin and groping for the light switch. "Why did you have to leave that chair there?"

In the front hall the telephone rang again, insistently. Jones shivered in the draft from the open window, and without waiting for a reply, disappeared through the doorway. Petulantly, his voice drifted back to her.

"No, Eleanor is not here. . . . Yes, we're expecting her tomorrow. Tell her what I'll tell you, young man, that it's an imposition to wake folks at this time of night! And I'll deliver no messages!"

The receiver banged on the hook, Jones, muttering to himself, stumbled back down the hall.

"That settles it!" he exclaimed, still shivering. "Tomorrow, I'll have a telephone put in this bedroom."

Mrs. Jones smiled drowsily, snuggled deep into her pillow.

"Where have I heard that before," she murmured. "Tomorrow, I'll order one, myself."

Telephones where you need them save time, patience—and midnight misadventures.

Few know that one or two additional instruments cost considerably less than the single telephone they now have!

By a wisely-placed "extension" or two, and perhaps a rearrangement of the equipment you already have, an expert telephone man can often double the convenience of your telephone service.

"Why did you leave that chair there?"

Manager, Southwestern Bell Telephone Co., City.

I'd like to know how to get more value out of my telephone service. Please send me free, a copy of your booklet, "Modern Telephone Service for the Home."

**NATIONAL Y. W. SECRETARY IS VISITOR HERE**

MISS BABCOCK SPENDS TWO DAYS ASSISTING LOCAL ORGANIZATION WITH ITS PROBLEMS.

Miss Fern Babcock, National Y. W. C. A. secretary for this region spent Tuesday and Wednesday in W. T. helping with problems of the local organization. Miss Babcock was interviewed by the officers of the Y. W. and gave very practical help in the solution of some of their irritating problems. The cabinet and other members of the local Y. W. C. A. met Miss Babcock at a luncheon in the college cafeteria Tuesday. During Tuesday afternoon and Wednesday Miss Babcock was in the office of Mrs. Green where she answered puzzling questions for the girls. Miss Normington, a school friend, entertained her at dinner on Tuesday evening. She made her home in Cousins Hall where she visited with Mrs. Marion Witt whose daughter Marion, she knew in the University of Arkansas. Miss Babcock was entertained at luncheon on Wednesday in the home of Mrs. Green.

At the regular meeting of the Y. W. C. A. Miss Babcock talked to the girls on "What We Belong to When We Belong to the Y. W. C. A." In this discussion she brought to the girls not only the scope of the student Y. W. work but something of the bigness of the whole Christian Woman Movement and its relation to the international Christian Movement. She also outlined the organization of the national student Y. W. movement

and presented some of its problems and attainments.

Miss Babcock takes the place formerly held by Miss Hilda Howard whom many students and teachers will remember with pleasure. Miss Howard is married and lives in Chicago where she is continuing her work with the Y. W. C. A.

Whoopie Hour Over K G R S is Success Friday Evening

W. T.'s, officially named "Radio Whoopie Hour" program was broadcast from station K G R S last Friday evening from nine to ten o'clock. It was a program of variety, some spiced from W. T. which the Whoopie Hour Mistress, Miss Marie Miles, seems to have directed in a splendid manner.

The individuals and organizations representing W. T. last Friday were Brown's orchestra, the Buff Hops, Triple R's, Pi Omegas, Red Men, Flannigan Smith, Harry Kelly, and Marie Miles.

This program was broadcast through the courtesy of station K G R S of Amarillo and the effort and support of the following firms of Canyon: The Buffalo Grocery, Scott's Service Station, Farlow Motor Company, R. E. Ball Service Station, The Peoples Store, Terry's Studio, and K Service Station.

This is the third radio program to be broadcast by college material in three successive weeks.

"We are now," announced the guide, "passing through a rural hamlet."

"Oh," exclaimed the sweet young thing, "I thought a hamlet was a little pig."

DR. McCOLLEY HEADS CLUB OF SCRIBBLERS

18 FRESHMEN STUDENTS ARE SELECTED TO DO CREATIVE WRITING AT CLUB MEETINGS.

The Scribbler's Club, a new organization of students interested in writing, has been organized by Dr. McColley, head of the English department. The first meeting will be held at his home next Wednesday evening.

The club has one girl and one boy from each of the nine sections of English 101. Its object is to produce and criticize creative writing. Meetings will be held fortnightly. It is hoped that the Scribbler's Club will provide a good nucleus for the organization of a Writer's Club next year among upperclassmen. The Scribbler's Club is to be continued for Freshmen.

"If my experience in the University of Arkansas holds true here," Dr. McColley says, "in three to five years we should have a number of people publishing nationally."

Charlie Wilson, a writer from Dr. McColley's organization in the University of Arkansas, is a nationally known writer, appearing regularly in such magazines as Atlantic Monthly, Mercury, and North American Review. He was included in O'Brien's Collection for last year.

The eighteen members of the organization are: Roselyn Cann, Alriod Swafford, Birden Nelson, Ford Ward, Eva Todd, Louis Shirley, Faye Hedgecock, Winston Savage, Jefferson Boone, Bernice Bes-sire, Lonie Beth Weaver, Frances Usery, Mattie E. Sullivan, Janet Ellen Holmes, Leslie Sharer, Jake Harrison, Jennings Flathers, Charles Ferguson.

FISHHOOK FINDS SAFE

Biloxi, Miss.—Two years after the robbery a steel safe of the Hamilton Commissary of North Jackson county has been recovered with contents intact by a fisherman from the Tchoutacabouf River. The safe was found when it became attached to a fishing hook. Unsuccessful in attempts to open the steel door, it was believed the robbers dumped their burdensome loot into the stream.

BROUGHT BASK HOME

St. Petersburg, Fla.—Mary Lup-ton, 16 years old high school girl, was brought back to the United States after her elopement to Honduras with Luiz Oroniez. President Hoover and the president of the Honduras co-operated with the U. S. Department of Justice in the successful attempt to return the girl to this country.

PRAYERS ANSWERED

New York.—Michael Pannone, 3, was an invalid unable to talk or hear until his dying grandfather prayed for three hours to the Virgin Mary for the return of the boy's health. He has now fully recovered and his parents attribute his recovery to his grandfather's prayers.

Doctor: "H'm! Severe headaches, bilious attacks, pains in the neck—h'm! What is your age, madam?" Patient (coily): "Twenty-four, doctor."

Doctor (continuing to write): "H'm! Memory affected, too."

"The Best" Says President J. A. Hill In Regard to Dorm. Matrons Smith and Witt of Randall and Cousins Halls

By Pearl Wimberly
"They are the best two in the world," said President J. A. Hill when asked to make a statement in regard to the matrons of Cousins and Randall Halls on the W. T. campus.

Young women making their school home in Randall Hall during the past three years and the beginning of the fourth have had as their "mother" Mrs. Agnes Smith, who possesses a charm and graciousness that make the girls feel as if she were really Mother and the hall were really home.

At Cousins Hall young women have found as their devoted and confident "mother," Mrs. Marion N. Witt, who has held this responsible position since the opening of the hall in 1920.

Eighteen Years Experience
Eighteen years and the opening of another as matron of girls in dormitories and homes is the unusual record held by Mrs. Witt who came to Canyon from Texas Woman's College in Fort Worth.

Mrs. Witt was born in Burleson County, Texas, and her early school years were spent in Salado College in Bell County and in Sam Houston State Teachers College in Huntsville. Her married life was spent at Salado College where her husband was a teacher, and it was here that President Hill became a personal friend of the Witt family. "She is a second mother to me," said President Hill. "For three years I fed her horse and pigs and ate her biscuits."

After her husband's death Mrs. Witt spent two years as matron of the girls' hall in Stamford College at Stamford, Texas. From there she went to old Polytechnic College in Fort Worth which in the following years was changed to Texas Woman's College. Here she remained for six years before accepting her present position.

The fact that Mrs. Witt is the mother of two daughters is probably one of the reasons she is such an "expert" with girls. Many Canyon students are acquainted with one daughter, Dr. Marion W. Witt who is teaching English in Hunter College for Women in New York City. The other daughter is Mrs. A. C. Amisler of McGregor, Texas.

Every year many young women students in W. T. are under the direct supervision of Mrs. Witt. She says, "The fact that I have done the work so long expresses my love for it."

The grounds surrounding the hall have been made especially attractive under the matron's direction. Huge flower beds and grassy lawns surround the handsome structure.

"I tell my girls I do not blame them for loving the boys because I have always loved them," said Mrs. Witt in telling of her eagerness to help the young men of the school as well as her girls.

In Cousins Hall there is a wonderful spirit of unity, said the matron, and she continued to tell of the spiritual and social lives of these young women.

"No one except a woman of Mrs. Smith's caliber could have accomplished what she has in the few short years she has been in charge of Randall Hall. Working under difficult physical conditions she has made Randall Hall a most valuable asset to the institution," said President Hill in regard to Mrs. Smith's work.

Mrs. Smith is a native Texan having been born at Caldwell, Texas. Her college education was done in Waco College and Oak Cliff College in Dallas where she took her degree. She taught in Texas

MRS. MARION WITT

MRS. AGNES SMITH

schools for ten years and during a summer vacation in Mexico she met her husband. The greater part of her married life was spent in every large republic of Mexico. During the Mexican Revolution the Smith family moved to San Antonio and later to Amarillo. It was during their residence in Amarillo that Mr. Smith died. For two years she taught in Amarillo schools before coming to Randall Hall.

The Randall Hall matron is not only a mother to the hundreds of hall girls every year but also to five of her own children. They are Mrs. Everett Whicker of Littlefield, Texas; Mrs. Leonard Sharp of Amarillo; Mr. Charles W. Smith, A. & M. student, but now employed by the Texas Highway Commission; and Agnes and Dick who make their home with their mother in her suite at the hall.

Life is Girls
"My life is girls," said Mrs. Smith. "I do not work to make a living but to be a blessing to the girls who come under my care." Truly she has made a home for the young women, for she has transformed the hall into a most desirable place to be called home. Bare places have been filled in with tasteful decorations; an open dining room has been changed into a well appointed room; there is a reading room and private reception room attractively furnished. The beautiful patio surrounded by flower beds in the rear of the building is the scene of many social affairs under the direction of the matron. Numerous problems, both trifling and major, are given the careful consideration of Mrs. Smith, whose aims are to win the confidence and admiration of the girls. Her eagerness to assist the girls and her sympathy in all of their problems is expressed through her daily life.

The evidence that Mrs. Smith has developed a unified spirit in the hall was recently evidenced by the organization of the Randall Hall Pep Squad that made its debut at a recent chapel meeting. Weekly prayer meetings are held in the hall along with other social and spiritual life.

In speaking of the young men who call at the hall frequently, Mrs. Smith said "our regular callers," to whom she shows almost equally as much interest as her "daughters."

Both Mrs. Smith and Mrs. Witt are members of the Methodist church.

"They are both wonderful women," concluded President Hill at the brief interview.

FASHION AND HEALTH

By Bernar Macfadden
To be healthy should be fashionable. To be buoyant and vitally vigorous should be the mode.

Short skirts have greatly added to the freedom that femininity is enjoying more and more every year.

Let us hope that the long skirts that are now coming in style will be used mostly during the evening.

Clothes should add to feminine attractions; but just to what extent fashionable attire accomplishes this object can be clearly seen by studying the styles of former years: the baggy sleeve, high collars, and many of the unseemly and inartistic products of those oldtime fashions carry a meaning all their own.

Then there were the bustle, the hoop skirts of more than a generation ago, not to mention the corsets, which devitalized womankind for several centuries.

The great desire of every woman should be to appear alluringly feminine. Aping the apparel of masculinity is always censurable and when fashion experts recognize these truths there activities should be more distinctly constructive. To make womankind more beautiful to look upon should be their one outstanding object.

Modern fashions should not restrict bodily movements. They should accentuate and not destroy beautiful outlines.

And in no case should they interfere with the fundamental requirements in the building of buoyant health and all-round vitality and vigor.

The book-keeper was peevish. "What's wrong?" asked the boss. "Why," he said, "that pretty typist you insisted on engaging spells atrociously."

"Is that so? She must be good. I couldn't spell it!"

Help Keep Canyon Clean.

THE STOCK MARKET AND PROSPERITY

While stocks "faw down and go boom," and a multitude of speculators find themselves the victims, our national prosperity continues on an even keel. Puring the height of the Wall Street slump public officials as well as business leaders have come forth to reassure the public that the slump in the market should have no great effect on our national prosperity.

Level headed government, a sound banking system, and above all good business organization, keeps the indisposition of Wall Street from throwing the entire nation out of whack.

At the same time, we are confronted by a statement by Alexander Legge, Chairman of the Farm Board, that the shrinkage in stock values has had a very deteriorating effect on the prices of wheat. This only goes to show that other industries, because they are organized, and work co-operatively, are safer than the farm industry from the effects of a Stock Exchange slump. When the good work being done by the Farm Board and other agencies find fruition in a thorough organization of the farm industry, farmers will have less to fear from irregularities in Wall Street.

HOW TO DELAY FRUIT CROPS

Horace Davis of Berlin, Mr., speaking at Atlantic City, stressed the fact that if a fruit grower iced the roots of his plants, he would delay his crop by several weeks.

In this way he could avoid the necessity of selling when there was a glut on the market and prices were low.

This idea has interesting possibilities. It presages a time when the fruit business will be out of its topsy-turvy state in which the summer fruits all come out in the winter and the winter fruits all come out in the summer.

Strawberries, let us assume, make their bow in February, and pumpkins in August.

By icing the roots, these will now be restored to their proper seasons.

Some feel it might be best if the growers were to resume growing their fruits under old-time conditions, rather than resorting to hot weather forcing on the one hand and root-icing on the other. It is for the growers themselves to decide, however.

OUTWITS 8,000 MONKS

Mlle Maryse Choisy tells how she won her way into an ancient monastic community that for 874 years has succeeded in excluding women. Concealed in a mattress, she had herself smuggled into the Byzantine Monastery on Mount Athos, Greece. There, where no woman had ever been allowed before, she put on a man's clothes and played the part of a valet.

HINTS FOR THE HOME

BY NANCY HART

Have you noticed, of late, the vogue for gay quilts and comfortables? For years, in the artificiality of another age, the decorative possibilities of these pieces have seemed half-forgotten. Now suddenly—encouraged by today's demand for design and contrasting color—they have come back into fashion again.

And so important is the subject that it has broken into print to tell its own fascinating story through the pages of a thick new book—"Old Patchwork Quilts and the Women Who Made Them"—in which the author gives not only a complete history of the quilt, but also describes 310 different patterns and illustrates many of them.

It is a book to intrigue every girl and woman who dreams of a beautiful home. And the story seems particularly apropos, since the gay, colorful patchwork theme with its geometric patterns is so thoroughly in harmony with the modern trend in home-furnishings.

Menu for Meatless Night

Vegetable Crowder
Stuffed Baked Squash
Cream Turnips with Onions
Hot pickled beets
Custard Pie
Coffee.

Ever Try Cucumber Soup?

For a soup that is different, try this recipe for cucumber soup: Peel 3 large cucumbers, slice and re-

move seeds. Cook in 2 tbs. butter for 10 minutes, then add 2 tbs. flour and 3 cups white soup stock. Scald 1 cup milk and 1 slice onion. Combine mixtures and rub thru a sieve. Reheat to boiling point and add ½ cup cream and yolks of 2 eggs. Season with salt and pepper. Serve with cheese chips.

Chicken Loaf

½ cup cooked chicken, chopped, ½ cup chopped cooked veal, ½ cup soft bread crumbs, ½ ts. salt, dash celery salt, 1 ts. chopped parsley, 1 egg, ½ cup milk. Mix all ingredients. Add seasoning, egg and milk. Bake in well-buttered pan for 30 minutes.

Piccadilly Salad

Peel and cut a large orange in dice; add sufficient chopped celery to make 1 cup and set on ice until wanted. Halve large pecan meats, using 2 cups nuts to the amount of fruit given. Mix, arrange on crisp lettuce and top with whipped mayonnaise. Garnish with strips of pimiento.

Quick Plum Pudding

Soak ½ lb. stale crumbs in 1 cup scalded milk, let stand until cool; add ¼ lb. sugar, beaten yolks of 4 eggs, ½ lb. raisins seeded, chopped and floured, ¼ lb. chopped figs and 2 oz. finely cut citron. Chop ½ lb. suet, combine all ingredients, adding ¼ cup grape juice, 1-3 ts. each of cloves, ginger, mace and nutmeg, 1 ts. cinnamon and 1½ ts. salt. Add beaten whites of the 4 eggs last and turn into buttered mold. Steam for 6 hours.

For Indoor Plants

Whitewashing the inside of window boxes before filling

them with soil will do much to preserve the boxes and keep out insects.

Novel Bait for Mice

Instead of the conventional piece of cheese, bait your traps with pumpkin seeds. Mice are very fond of them.

WATERWAYS: A CRYING NEED

The development of inland waterways, to provide cheaper transportation for farm products, is one phase of President Hoover's farm-relief program that has as yet had scant attention. As much as marketing and tariff aids, and possible more than any subsidy, it is desired by the farmers of the Middle West and North West. Of the many solutions offered for the manifold problems of agriculture, it is among the most vital.

Are farm products to be allowed to rot because of the lack of adequate inland waterways which, surely it seems would provide a more economical method of transportation? The prohibitive freight rates have been one of the chief drawbacks of agricultural prosperity. President Hoover showed time and again when Secretary of Commerce that the inevitable rise in freight rates was forcing the farmer back from the seaports. It is necessary to bring the seaports to the farmer.

What has been done? Largely for the benefit of the farmer, the Ohio, Mississippi, Illinois and Missouri waterways system is being developed at great expense to the government. But what is needed too is a great water route connecting the Great Lakes directly with the large Eastern seaports. The

proposed St. Lawrence seaway would fill that need.

Proponents of inland waterways have an ally at the White House. Let us hope that plans are advanced, and constructive steps taken, during the next session of Congress.

CAR STRAPS BANISHED

St. Louis, Mo.—Company officials explained the reason why 25 new street cars are unequipped with straps. Current short skirt styles make it inadvisable for women to lift their arms over their heads.

KNOW TEXAS

During the first nine months of 1929 Texas automobiles registrations totaled 1,109,700, or 51,000 more than the total for 1928.

One Texas pecan tree in San Saba county has yielded as high as 1,053 pounds of nuts in one season and has furnished 5,000,000 buds for improving other trees.

Texas expects to ship 1,200 car loads of dressed turkeys to Northern and Eastern markets this fall. The Deepwater plant of the Houston Lighting and Power Co. is the largest single generating unit in Texas. It is rated at 100,000 kilowatts.

"I never thought
your
husband
went into places
like that!"

MRS. BEARDSLEY had just returned from the city and she was telling her friend, Mrs. Stanley, all about her visit.

"... and I saw him through the window. He was all alone at a table in the main dining room of the very best hotel. I was so surprised—you know, from seeing your husband washing his own car and cutting the grass himself and all those things. I didn't think he was at all extravagant."

"Sure, I go in there once in a while when I'm in the city," Mr. Stanley told his wife that evening. "It's not for the food. It's for the coffee. That coffee is worth the price of a meal there by itself. You know, dear, I simply must have good coffee once in a while and ... well, I didn't like to hurt your feelings by mentioning it."

"That coffee, madam," the waiter told Mrs. Stanley the next time she accompanied her husband, "is White Swan Coffee. This hotel has used it for years."

Wives who are coffee-wise know that the appetizing aroma and satisfying flavor of White Swan Coffee served at home makes everyone wish that every meal could be eaten there.

"... and I saw him through the window. He was all alone at a table."

Strict selection of the imported coffees, scientific roasting and artful blending each plays its part in fully developing and nicely balancing the famous White Swan flavor.

With the skill acquired by more than a half century of experience, the Waples Platter Company controls every phase of distribution as well as preparation—making certain that no finer or fresher coffee can be brought into your home for the price you are asked to pay.

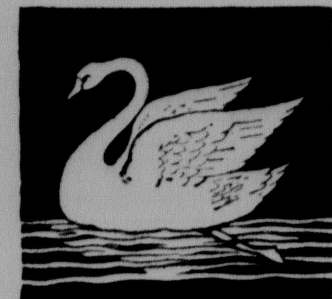

White Swan Coffee comes to you fresh in sealed tins and fresh from the roaster with all of its rare goodness kept intact. No chances are taken with White Swan flavor.

One of the 22 Waples Platter Houses is conveniently close to each of the 10,000 White Swan dealers. A fleet of motor trucks, supplementing railroad facilities, makes regular deliveries along established routes to the retailer from all of the units of this institution of the Southwest.

Thus, your grocer always has a new supply of White Swan Coffee—freshly packed for you in one and three pound cans.

"The Best" Says President J. A. Hill In Regard to Dorm. Matrons Smith and Witt of Randall and Cousins Halls

By Pearl Wimberly

"They are the best two in the world," said President J. A. Hill when asked to make a statement in regard to the matrons of Cousins and Randall Halls on the W. T. campus.

Young women making their school home in Randall Hall during the past three years and the beginning of the fourth have had as their "mother," Mrs. Agnes Smith, who possesses a charm and graciousness that make the girls feel as if she were really Mother and the hall were really home.

At Cousins Hall young women have found as their devoted and confident "mother," Mrs. Marion N. Witt, who has held this responsible position since the opening of the hall in 1920.

Eighteen Years Experience

Eighteen years and the opening of another as matron of girls in dormitories and homes is the unusual record held by Mrs. Witt who came to Canyon from Texas Woman's College in Fort Worth.

Mrs. Witt was born in Burleson County, Texas, and her early school years were spent in Salado College in Bell County and in Sam Houston State Teachers College in Huntsville. Her married life was spent at Salado College where her husband was a teacher, and it was here that President Hill became a personal friend of the Witt family. "She is a second mother to me," said President Hill. "For three years I fed her horse and pigs and ate her biscuits."

After her husband's death Mrs. Witt spent two years as matron of the girls' hall in Stamford College at Stamford, Texas. From there she went to old Polytechnic College in Fort Worth which in the following years was changed to Texas Woman's College. Here she remained for six years before accepting her present position.

The fact that Mrs. Witt is the mother of two daughters is probably one of the reasons she is such an "expert" with girls. Many Canyon students are acquainted with one daughter, Dr. Marion W. Witt who is teaching English in Hunter College for Women in New York City. The other daughter is Mrs. A. C. Amsler of McGregor, Texas.

Every year many young women students in W. T. are under the direct supervision of Mrs. Witt. She says, "The fact that I have done the work so long expresses my love for it."

The grounds surrounding the hall have been made especially attractive under the matron's direction. Huge flower beds and grassy lawns surround the handsome structure.

"I tell my girls I do not blame them for loving the boys because I have always loved them," said Mrs. Witt in telling of her eagerness to help the young men of the school as well as her girls.

In Cousins Hall there is a wonderful spirit of unity, said the matron, and she continued to tell of the spiritual and social lives of these young women.

"No one except a woman of Mrs. Smith's caliber could have accomplished what she has in the few short years she has been in charge of Randall Hall. Working under difficult physical conditions she has made Randall Hall a most valuable asset to the institution," said President Hill in regard to Mrs. Smith's work.

Mrs. Smith is a native Texan having been born at Caldwell, Texas. Her college education was done in Waco College and Oak Cliff College in Dallas where she took her degree. She taught in Texas

MRS. MARION WITT

MRS. AGNES SMITH

schools for ten years and during a summer vacation in Mexico she met her husband. The greater part of her married life was spent in every large republic of Mexico. During the Mexican Revolution the Smith family moved to San Antonio and later to Amarillo. It was during their residence in Amarillo that Mr. Smith died. For two years she taught in Amarillo schools before coming to Randall Hall.

The Randall Hall matron is not only a mother to the hundreds of hall girls every year but also to five of her own children. They are Mrs. Everett Whicker of Littlefield, Texas, Mrs. Leonard Sharp of Amarillo, Mr. Charles W. Smith, A. & M. student, but now employed by the Texas Highway commission, and Agnes and Dick who make their home with their mother in her suite at the hall.

Life is Girls

"My life is girls," said Mrs. Smith. "I do not work to make a living but to be a blessing to the girls who come under my care." Truly she has made a home for the young women, for she has transformed the hall into a most desirable place to be called home. Bare places have been filled in with tasteful decorations; an open dining room has been changed into a well appointed room; there is a reading room and private reception room attractively furnished. The beautiful patio surrounded by flower beds in the rear of the building is the scene of many social affairs under the direction of the matron.

Numerous problems, both trifling and major, are given the careful consideration of Mrs. Smith, whose aims are to win the confidence and admiration of the girls. Her eagerness to assist the girls and her sympathy in all of their problems is expressed through her daily life.

The evidence that Mrs. Smith has developed a unified spirit in the hall was recently evidenced by the organization of the Randall Hall Pep Squad that made its debut at a recent chapel meeting. Weekly prayer meetings are held in the hall along with other social and spiritual life.

In speaking of the young men who call at the hall frequently, Mrs. Smith said "our regular callers," to whom she shows almost equally as much interest as her "daughters."

Both Mrs. Smith and Mrs. Witt are members of the Methodist church.

"They are both wonderful women," concluded President Hill at the brief interview.

FASHION AND HEALTH

By Bernar Macfadden

To be healthy should be fashionable. To be buoyant and vitally vigorous should be the mode.

Short skirts have greatly added to the freedom that femininity is enjoying more and more every year.

Let us hope that the long skirts that are now coming in style will be used mostly during the evening.

Clothes should add to feminine attractions; but just to what extent fashionable attire accomplishes this object can be clearly seen by studying the styles of former years: the baggy sleeve, high collars, and many of the unseemly and inartistic products of those oldtime fashions carry a meaning all their own.

Then there were the bustle, the hoop skirts of more than a generation ago, not to mention the corsets, which devitalized womankind for several centuries.

The great desire of every woman should be to appear alluringly feminine. Aping the apparel of masculinity is always censurable and when fashion experts recognize these truths their activities should be more distinctly constructive. To make womankind more beautiful to look upon should be their one outstanding object.

Modern fashions should not restrict bodily movements. They should accentuate and not destroy beautiful outlines.

And in no case should they interfere with the fundamental requirements in the building of buoyant health and all-round vitality and vigor.

The book-keeper was peevish. "What's wrong?" asked the boss. "Why," he said, "that pretty typist you insisted on engaging spells atrociously."

"Is that so? She must be good. I couldn't spell it!"

THE STOCK MARKET AND PROSPERITY

While stocks "faw down and go boom," and a multitude of speculators find themselves the victims, our national prosperity continues on an even keel. Puring the height of the Wall Street slump public officials as well as business leaders have come forth to reassure the public that the slump in the market should have no great effect on our national prosperity.

Level headed government, a sound banking system, and above all good business organization, keeps the indisposition of Wall Street from throwing the entire nation out of whack.

At the same time, we are confronted by a statement by Alexander Legge, Chairman of the Farm Board, that the shrinkage in stock values has had a very deteriorating effect on the prices of wheat. This only goes to show that other industries, because they are organized, and work co-operatively, are safer than the farm industry from the effects of a Stock Exchange slump. When the good work being done by the Farm Board and other agencies find fruition in a thorough organization of the farm industry, farmers will have less to fear from irregularities in Wall Street.

Canyon, Happy, Slaton, Perryton, Dalhart

The sweetness of low price NEVER equals the bitterness of poor quality.

Wayside Items

Armistice Day open and fair after a week of rain and snow, not much cold. Roads muddy, but drying some.

Rev. Z. B. Chambless of Plainview came Saturday night but no congregation met him. A bad muddy time underfoot. He gave us a splendid sermon Sunday morning and again at night. Mrs. Chambless not very well, remained in Tulia with her mother. Both are in college at Wayland.

B. Y. P. U. Sunday night led by Miss Marcella Spann in absence of the president.

Mrs. Fannie Bell and Mrs. Ella Hurst from Tulia have been visiting with Mr. and Mrs. B. F. Wilhelm since October 14, attended services Sunday. The former is Mrs. Wilhelm's mother, the latter an aunt.

Mrs. Kate Meyers of Oklahoma visited several days in the parental Carter home recently.

A good part of the wheat is sown, some up and growing. Some complaint of worms eating the stalks off under the ground. Others say the Hessian fly is at work in the wheat fields on the Plains.

Ducks are plentiful in some places. Quite a few are being killed. Harvey Newsum is among the successful ones.

Fairview Breezes

Mr. and Mrs. Bill Wesley were intending to give a party Saturday night, but as it was muddy, they put it off until the weather permits.

Miss Marie Hancock spent the week end with Opal Sutton.

Mr. and Mrs. Bill Wesley, Mr. and Mrs. C. L. Wesley, Argel Brawner, Lee Wesley, also Paul and Herbert Williams were guests in the J. W. Wesley home Sunday.

Mr. and Mrs. J. L. Wesley, Mrs. H. H. Sutton, H. E. and Cicero Wesley, Ina Holly, Allie Hancock, Pete, Opal, Martha, Jack and Erma Mae Sutton were in the Palo Duro canyons Sunday taking pictures.

Mr. and Mrs. G. E. Wesley and Inez, Mr. and Mrs. H. H. Sutton, also Mr. and Mrs. J. L. Wesley were guests in the H. E. Wesley home Sunday.

Mr. and Mrs. Albert Legate, also Marie Hancock spent Friday night in the Chas. Sutton home.

Argel Brawner, Lee Wesley and Mr. and Mrs. M. J. Wesley were callers in the J. W. Wesley home Saturday night.

Mr. and Mrs. J. L. Wesley spent Saturday night in the J. W. Wesley home.

Mrs. John Davis and Miss Marie

Hancock spent Tuesday night in the Chas. Sutton home.

Chas. Sutton has been on the sick list.

Mr. and Mrs. Clarence Helms were callers in the Bill James home Sunday.

Chas. Sutton made a business trip to Happy Monday.

Jowell News

There was good attendance at Sunday School Sunday in spite of the unfavorable weather.

The community was very much surprised to learn of the two weddings that occurred last week. Miss Delvia Hutson and Mr. John Stults were married at Clovis, New Mexico, Thursday. Miss Lela Liebarger and Mr. Frank Davis were married at Eric, Oklahoma, Friday. Their many friends join in wishing them a long and happy wedded life.

Mr. and Mrs. C. P. Robertson visited Mr. and Mrs. Milton Dooley Sunday.

Mr. and Mrs. Ed Hawkins visited in Panhandle last week.

Mrs. Glenn is visiting her mother in Floydada.

Milton Dooley, who was ill last week is able to be around again.

Mr. and Mrs. White of Canyon visited their nephew, Jim Rowells, Saturday and Sunday.

Mrs. J. J. Leavitt and Mrs. Earl Burtz visited Mrs. Henry Burtz Monday.

Mrs. Jim Rowells is sick at this writing (Tuesday).

Sunny Hill News

Hark ye! All who would like to have a jolly time, hurry to the box supper and program at Sunny Hill school, Friday night, November 15, at 8 o'clock. Twice before when we extended this invitation, the weather was unfit for the occasion.

There was a general rain and snow over the community last week.

There were few children in school Friday because of bad roads.

Mr. and Mrs. Rex Roby were unable to attend class in Canyon Saturday because of bad roads.

Our school has just received a tennis net and some balls.

Miss Lysbeth Yates, who has been ill for some time, is back in school.

D. W. Yates, who has been working at a gin in Cordell, Okla., returned last week.

Mr. and Mrs. J. T. Sykes and daughter, Bertha, visited Mr. and Mrs. C. G. Stallings Sunday.

Madison and Gordon Ruthart visited Alvis and J. T. Sykes Sunday.

Everett Kauffman visited Ernest Duncan Saturday afternoon.

Mr. Wilkes of Happy gave a demonstration of the Puritan aluminum ware at the home of Mr. and Mrs. P. D. Sherwood, Wednesday evening. Those present who enjoyed the generous meal were, Mr. and Mrs. H. F. Ratjen, Mr. and Mrs. A. C. Neff, Mr. and Mrs. I. H. Hollabaugh Jr., Mr. and Mrs. W. S. Cobb, Mr. and Mrs. C. E. Dubbs, Mrs. J. R. Royal, and the host and hostess, Mr. and Mrs. P. D. Sherwood.

Amarillo Ranchman Now Praises It

"Just Send 'em to Me About Orgatone, for This Medicine is a Knock Out," Declares T. J. Bassett.

East, west, north, and south, all over Amarillo, Orgatone is the talk of the town. People by the thousands are now taking this famous bile treatment that is creating such a sensation at the City Drug Store, and are reporting remarkable results in restored health, strength and energy.

Statements such as the following from T. J. Bassett, of 402 East Sixth St., Amarillo, a large ranch owner, cattle and wheat grower, while apparently amazing, are heard on all sides every day. In his statement of remarkable results his wife has obtained from the use of Orgatone, Mr. Bassett says:

"Believe me, Orgatone is about the best medicine that ever came to Amarillo—it's a knock out."

"I not only praised it but my wife does too, and we will continue to do so for many a day for it is putting her in the very best of health again."

"I tell you, after every meal she used to bloat up with gas and what she thought was high blood pressure. It just seemed like she couldn't digest a thing she ate."

"Nervousness caused her no end of trouble, and she was bothered with biliousness, and felt sluggish and tired all the time. Her sleep wasn't any good either, and she just felt pretty much 'all in'."

"Well sir, when she began taking Orgatone this medicine lost no time in getting right down to the roots of her troubles. And now it has fixed her up so she can get whatever she pleases, and lots of it without a trace of gas pains, indigestion, or dizzy spells afterwards. Everything agrees with her now and she sleeps good, feels good and is in a A-one condition in every way."

"I know half a dozen people in this section who praise and boost Orgatone like we do and I don't hesitate to recommend this medicine to everybody. Just send 'em to me about it."

Genuine Orgatone is manufactured by one of the world's largest laboratories and is not a so-called secret or patent remedy but a new scientific bile treatment and is sold in Canyon by the Jarrett Drug Co.

If a man's fortune does not fit him, it is like the shoe in the story; if too large, it trips him up; if too small, it pinches him.—Horace.

Nearly Killed By Gas —Druggist Saves Her

"Gas on my stomach was so bad it nearly killed me. My druggist told me about Adlerika. The gas is gone now and I feel fine."—Mrs. A. Adamek.

Simple glycerin, buckthorn, saline, etc., as mixed in Adlerika, helps GAS on stomach in 10 minutes! Most remedies act on lower bowel only, but Adlerika acts on BOTH upper and lower bowel, removing poisonous waste you never knew was there. Relieves constipation in 2 hours. It will surprise you. Jarrett Drug Company.

LET THE THERMOMETER DROP

... it's always summer for your car

Even on cold winter nights your motor starts "right now" when fueled with Phillips 66. Here's a gasoline with volatility controlled to fit the season and the climatic conditions of the locality in which you buy it. Combines, for the first time, instant cold weather starting and quick warm-up—flexibility at all engine speeds—mileage and power—at no extra cost. Put your car on super-performance rations; for best results try a full tank of Phillips 66 or 66 Ethyl.

Phill-up with

Phillips 66

© 1929, Phillips Petroleum Company

CONTROLLED VOLATILITY

WHEN THE THERMOMETER GOES DOWN THE VOLATILITY GOES UP. Gasoline must vaporize before it can be fired in the cylinders of your motor. Volatility refers to the ability of gasoline to vaporize. With volatility controlled, Phillips 66 vaporizes as quickly in cold as in warm weather.

Wayside Items

Armistice Day open and fair after a week of rain and snow, not much cold. Roads muddy, but drying some.

Rev. Z. B. Chambless of Plainview came Saturday night but no congregation met him. A bad muddy time underfoot. He gave us a splendid sermon Sunday morning and again at night. Mrs. Chambless not very well, remained in Tulia with her mother. Both are in college at Wayland.

B. Y. P. U. Sunday night led by Miss Marcella Spann in absence of the president.

Mrs. Fannie Bell and Mrs. Ella Hurst from Tulia have been visiting with Mr. and Mrs. B. F. Wilhelm since October 14, attended services Sunday. The former is Mrs. Wilhelm's mother, the latter an aunt.

Mrs. Kate Meyers of Oklahoma visited several days in the parental Carter home recently.

A good part of the wheat is sown, some up and growing. Some complaint of worms eating the stalks off under the ground. Others say the Hessian fly is at work in the wheat fields on the Plains.

Ducks are plentiful in some places. Quite a few are being killed. Harvey Newsom is among the successful ones.

Fairview Breezes

Mr. and Mrs. Bill Wesley were intending to give a party Saturday night, but as it was muddy, they put it off until the weather permits.

Miss Marie Hancock spent the week end with Opal Sutton.

Mr. and Mrs. Bill Wesley, Mr. and Mrs. C. L. Wesley, Argel Brawner, Lee Wesley, also Paul and Herbert Williams were guests in the J. W. Wesley home Sunday.

Mr. and Mrs. J. L. Wesley, Mrs. H. H. Sutton, H. E. and Cicero Wesley, Ina Holly, Allie Hancock, Pete, Opal, Martha, Jack and Erma Mae Sutton were in the Palo Duro canyons Sunday taking pictures.

Mr. and Mrs. G. E. Wesley and Inez, Mr. and Mrs. H. H. Sutton, also Mr. and Mrs. J. L. Wesley were guests in the H. E. Wesley home Sunday.

Mr. and Mrs. Albert Legate, also Marie Hancock spent Friday night in the Chas. Sutton home.

Argel Brawner, Lee Wesley and Mr. and Mrs. M. J. Wesley were callers in the J. W. Wesley home Saturday night.

Mr. and Mrs. J. L. Wesley spent Saturday night in the J. W. Wesley home.

Mrs. John Davis and Miss Marie

Hancock spent Tuesday night in the Chas. Sutton home.

Chas. Sutton has been on the sick list.

Mr. and Mrs. Clarence Helms were callers in the Bill James home Sunday.

Chas. Sutton made a business trip to Happy Monday.

Jowell News

There was good attendance at Sunday School Sunday in spite of the unfavorable weather.

The community was very much surprised to learn of the two weddings that occurred last week. Miss Delvia Hutson and Mr. John Stults were married at Clovis, New Mexico, Thursday. Miss Lela Liebarger and Mr. Frank Davis were married at Erie, Oklahoma, Friday. Their many friends join in wishing them a long and happy wedded life.

Mr. and Mrs. C. P. Robertson visited Mr. and Mrs. Milton Dooley Sunday.

Mr. and Mrs. Ed Hawkins visited in Panhandle last week.

Mrs. Glenn is visiting her mother in Floydada.

Milton Dooley, who was ill last week is able to be around again.

Mr. and Mrs. White of Canyon visited their nephew, Jim Rowells, Saturday and Sunday.

Mrs. J. J. Leavitt and Mrs. Earl Burtz visited Mrs. Henry Burtz Monday.

Mrs. Jim Rowells is sick at this writing (Tuesday).

Sunny Hill News

Hark ye! All who would like to have a jolly time, hurry to the box supper and program at Sunny Hill school, Friday night, November 15, at 8 o'clock. Twice before when we extended this invitation, the weather was unfit for the occasion.

There was a general rain and snow over the community last week.

There were few children in school Friday because of bad roads.

Mr. and Mrs. Rex Roby were unable to attend class in Canyon Saturday because of bad roads.

Our school has just received a tennis net and some balls.

Miss Lysbeth Yates, who has been ill for some time, is back in school.

D. W. Yates, who has been working at a gin in Cordell, Okla., returned last week.

Mr. and Mrs. J. T. Sykes and daughter, Bertha, visited Mr. and Mrs. C. G. Stallings Sunday.

Madison and Gordon Ruthart visited Alvis and J. T. Sykes Sunday.

Everett Kauffman visited Ernest Duncan Saturday afternoon.

Mr. Wilkes of Happy gave a demonstration of the Puritan aluminum ware at the home of Mr. and Mrs. P. D. Sherwood, Wednesday evening. Those present who enjoyed the generous meal were, Mr. and Mrs. H. F. Ratjen, Mr. and Mrs. A. C. Neff, Mr. and Mrs. I. H. Hollabaugh Jr., Mr. and Mrs. W. S. Cobb, Mr. and Mrs. C. E. Dubbs, Mrs. J. R. Royal, and the host and hostess, Mr. and Mrs. P. D. Sherwood.

Amarillo Ranchman Now Praises It

"Just Send 'em to Me About Orgatone, for This Medicine is a Knock Out," Declares
T. J. Bassett.

East, west, north, and south, all over Amarillo, Orgatone is the talk of the town. People by the thousands are now taking this famous bile treatment that is creating such a sensation at the City Drug Store, and are reporting remarkable results in restored health, strength and energy.

Statements such as the following from T. J. Bassett, of 402 East Sixth St., Amarillo, a large ranch owner, cattle and wheat grower, while apparently amazing, are heard on all sides every day. In his statement of remarkable results his wife has obtained from the use of Orgatone, Mr. Bassett says:

Wheat Harvest With Seven Combines In Randall County

This photograph shows seven harvester-thresher combines at work on the 5,000 acre wheat field of R. B. Gist, southeast of Canyon.

This battery of machines cuts a swath of grain 72 feet wide, threshes it and delivers it to trucks to be marketed. Machines of this type has almost displaced the old-time binder and threshing machine in the Panhandle region.

Insert shows, as well as a photograph can, the luxuriant growth of wheat typical of the Panhandle region this year.

State Park

(Continued from first page)
al park out of the Palo Duro Canyon, and he stated that if it were made a state park and at any time in the future could become a national park, there would be no objection whatsoever. "There is no use to think of it as a national park as yet," he continued. "it could qualify as a national park but the government has more than 20,000,000 acres in parks." Mr. Colp expressed himself as being heartily opposed to an increased land tax to make it necessary to obtain the land for the park.

"If we are worthy of the heritage of pioneers in the dugout days, then we can take the resources we have in the state of Texas and do something worthwhile," said Attorney General Robert L. Bobbitt, who spoke following Mr. Colp.

He spoke further in defense of the legislature by saying that it does not have a fair and equitable source for money.

From the canyons the party went to Amarillo where a moving picture reel of scenes of the canyons was shown in the Chamber of Commerce building.

Delegations from the Panhandle towns at the meeting Thursday represented, Memphis, Claude, Clarendon, Canyon, Dalhart, Borger, and Amarillo. Mr. D. A. Shirley and Travis Shaw represented the college. Mrs. Phoebe K. Warner of Claude, secretary of the state parks board, was present. E. G. Luter, automobile editor, Dallas

News; and W. D. Outlaw, real estate editor of the San Antonio Express, were members of the motorcade.

At a meeting in Amarillo Saturday afternoon a permanent organization known as the Palo Duro Park Association was organized. D. A. Shirley was made a member of this organization.

KING'S DAUGHTERS SUNDAY SCHOOL CLASS MEETS

The King's Daughters Adult Bible Class of the Canyon Baptist Church met at the home of Mrs. C. L. Tanner on Thursday afternoon for their monthly social and business meeting. Plans for the improvement of the Sunday School department were outlined, and talks were given by the Rev. C. G. Howard, J. S. Humphreys, and W. H. Harden.

Refreshments of pumpkin pie and cocoa were served to the following: Rev. C. G. Howard, J. S. Humphreys, W. H. Harden, Mrs. R. T. Bowman, Mrs. J. D. Key, Mrs. S. H. Jones, Mrs. W. J. Hinkle, Mrs. W. L. Shaw, and Mrs. W. E. Laughery.

Grace: "Do you know, Kenneth kissed me twice last night before I could stop him."
Greta: "Gracious! What cheek."
"Neither! My lips."

The Husband (bitterly): "Men are fools to marry."

The Wife: "Yes, I agree with you—but what else can we women marry?"

Commercial Herd of Keiser Estate Goes to the Bivins Ranch

The famous C. O. Keiser commercial herd of registered Hereford cows has been purchased by Julian Bivins of Amarillo.

Mr. Bivins attended the dispersion sale of Keiser Herefords last week and on learning that the estate had 243 registered cows in the commercial herd immediately became interested and bought them.

The cattle were delivered on Saturday and were shipped to Tascosa where they were placed on Mr. Bivins' ranch, once a part of the famous LIT ranch and later a part of the late Lee Bivins' famous LX ranch.

"I expect to keep these cows and develop the finest herd of cows in the Panhandle," said young Bivins last night. "They are not for sale and I do not expect to sell any of their heifer calves. Any man could be proud of owning this herd and I hope to keep the heifers until I have a thousand or more in the herd."

More than a quarter of a century ago, Lee Bivins bought the John Hutson herd of registered Herefords and with them as a foundation developed his now famous LX herd of cows, whose progeny are famous throughout the cattle country. His son is following in his father's footsteps in buying the Keiser herd with the same idea in mind.

The cattle were sold at private treaty but it is understood that the 243 cows brought approximately \$40,000.

This sale and the auction sale disposed of almost all of the famous herd developed by Mr. Keiser who had been active in the Hereford business in the Panhandle for more than 25 years.

Music Teachers are Entertained Saturday With Good Program

Bad roads did not prevent the meeting of the South Plains music teachers association at the College Saturday, Nov. 9, though the number in attendance was somewhat lessened by the weather.

Several entertaining features were planned for the day by the college and music faculty among which was a musical program at the chapel hour given by the college orchestra, men's chorus, and women's chorus. At noon a luncheon was served to delegates and several faculty people at the college cafeteria after which the business session was held. Miss Janet Ramsey of Slaton was elected president for the coming year, and the association voted to hold the 1930 meeting at Slaton.

At 3:30 o'clock in the music rooms of the college the visitors were given a reception by the department of music, and at 6:00 o'clock in the home economics dining room a dinner was served to the guests and music faculty of the college.

A fitting climax of the day's activity was the attendance of the body at the program given by the Russian Cossack Chorus at 8:15. The South Plains Association is in the Lubbock district and was coming out of its territory to meet at the West Texas State Teachers College, but due to the fact that the Cossack Chorus was to be here and due to the college's urgent invitation the meeting was conducted here.

"Daddy, teacher inquired after you to-day."

"Really?"

"Yes; he said he would like to know what sort of a fool my father was."

Jack: "You didn't see me last night; but I saw you twice."

Joan: "I never notice men when they are in that condition."

Church of Christ Minister Is Also College Student

For the second time in the history of the college, a local pastor is a student in the institution. The Rev. Luther G. Roberts, of Milan, Tennessee, new pastor of the Canyon Church of Christ, is a member of the senior class.

Mr. Roberts is a man of wide travel and experience, and of pleasing and impressive personality.

His junior work was done in the Murray State Teachers College, Murray, Ky. Previously, he had attended David Lipscomb College, Nashville, Tenn., and Freed-Hardeman College, of Henderson.

For three years Mr. Roberts has been preaching regularly conducting revivals during the summer months and caring for local congregations during the rest of the year.

Now a member of the Debate Club, Antlers, and Out-of-State, he has previously done college debating, and has been prominent in literary society work.

"There is no use to think of it as a national park as yet," he continued, "it could qualify as a national park but the government has more than 20,000,000 acres in parks." Mr. Colp expressed himself as being heartily opposed to an increased land tax to make it necessary to obtain the land for the park.

"If we are worthy of the heritage of pioneers in the dugout days, then we can take the resources we have in the state of Texas and do something worthwhile," said Attorney General Robert L. Bobbitt, who spoke following Mr. Colp. He spoke further in defense of the legislature by saying that it does not have a fair and equitable source for money.

From the canyons the party went to Amarillo where a moving picture reel of scenes of the canyons was shown in the Chamber of Commerce building.

Delegations from the Panhandle towns at the meeting Thursday represented, Memphis, Claude, Clarendon, Canyon, Dalhart, Borger, and Amarillo. Mr. D. A. Shirley and Travis Shaw represented the college. Mrs. Phoebe K. Warner of Claude, secretary of the state parks board, was present. E. G. Luter, automobile editor, Dallas

News; and W. D. Outlaw, real estate editor of the San Antonio Express, were members of the motorcade.

At a meeting in Amarillo Saturday afternoon a permanent organization known as the Palo Duro Park Association was organized. D. A. Shirley was made a member of this organization.

KING'S DAUGHTERS SUNDAY SCHOOL CLASS MEETS

The King's Daughters Adult Bible Class of the Canyon Baptist Church met at the home of Mrs. C. L. Tanner on Thursday afternoon for their monthly social and business meeting. Plans for the improvement of the Sunday School department were outlined, and talks were given by the Rev. C. G. Howard, J. S. Humphreys, and W. H. Harden.

Refreshments of pumpkin pie and cocoa were served to the following: Rev. C. G. Howard, J. S. Humphreys, W. H. Harden, Mrs. R. T. Bowman, Mrs. J. D. Key, Mrs. S. H. Jones, Mrs. W. J. Hinkle, Mrs. W. L. Shaw, and Mrs. W. E. Laughery.

Grace: "Do you know, Kenneth kissed me twice last night before I could stop him."
Greta: "Gracious! What cheek."
"Neither! My lips."

The Husband (bitterly): "Men are fools to marry."

The Wife: "Yes, I agree with you—but what else can we women marry?"

Commercial Herd of Keiser Estate Goes to the Bivins Ranch

The famous C. O. Keiser commercial herd of registered Hereford cows has been purchased by Julian Bivins of Amarillo.

Mr. Bivins attended the dispersion sale of Keiser Herefords last week and on learning that the estate had 243 registered cows in the commercial herd immediately became interested and bought them.

The cattle were delivered on Saturday and were shipped to Tascosa where they were placed on Mr. Bivins' ranch, once a part of the famous LIT ranch and later a part of the late Lee Bivins' famous LX ranch.

"I expect to keep these cows and develop the finest herd of cows in the Panhandle," said young Bivins last night. "They are not for sale and I do not expect to sell any of their heifer calves. Any man could be proud of owning this herd and I hope to keep the heifers until I have a thousand or more in the herd."

More than a quarter of a century ago, Lee Bivins bought the John Hutson herd of registered Herefords and with them as a foundation developed his now famous LX herd of cows, whose progeny are famous throughout the cattle country. His son is following in his father's footsteps in buying the Keiser herd with the same idea in mind.

The cattle were sold at private treaty but it is understood that the 243 cows brought approximately \$40,000.

This sale and the auction sale disposed of almost all of the famous herd developed by Mr. Keiser who had been active in the Hereford business in the Panhandle for more than 25 years.

Music Teachers are Entertained Saturday With Good Program

Bad roads did not prevent the meeting of the South Plains music teachers association at the College Saturday, Nov. 9, though the number in attendance was somewhat lessened by the weather.

Several entertaining features were planned for the day by the college and music faculty among which was a musical program at the chapel hour given by the college orchestra, men's chorus, and women's chorus. At noon a luncheon was served to delegates and several faculty people at the college cafeteria after which the business session was held. Miss Janet Ramsey of Slaton was elected president for the coming year, and the association voted to hold the 1930 meeting at Slaton.

At 3:30 o'clock in the music rooms of the college the visitors were given a reception by the department of music, and at 6:00 o'clock in the home economics dining room a dinner was served to the guests and music faculty of the college.

A fitting climax of the day's activity was the attendance of the body at the program given by the Russian Cossack Chorus at 8:15. The South Plains Association is in the Lubbock district and was coming out of its territory to meet at the West Texas State Teachers College, but due to the fact that the Cossack Chorus was to be here and due to the college's urgent invitation the meeting was conducted here.

"Daddy, teacher inquired after you to-day."

"Really?"
"Yes; he said he would like to know what sort of a fool my father was."

Jack: "You didn't see me last night; but I saw you twice."
Joan: "I never notice men when they are in that condition."

Church of Christ Minister Is Also College Student

For the second time in the history of the college, a local pastor is a student in the institution. The Rev. Luther G. Roberts, of Milan, Tennessee, new pastor of the Canyon Church of Christ, is a member of the senior class.

Mr. Roberts is a man of wide travel and experience, and of pleasing and impressive personality.

His junior work was done in the Murray State Teachers College, Murray, Ky. Previously, he had attended David Lipscomb College, Nashville, Tenn., and Freed-Hardeman College, of Henderson.

For three years Mr. Roberts has been preaching regularly conducting revivals during the summer months and caring for local congregations during the rest of the year.

Now a member of the Debate Club, Antlers, and Out-of-State, he has previously done college debating, and has been prominent in literary society work.

FIRST CHURCH OF CHRIST SCIENTIST

15th street, 7th avenue.
Services every Sunday at 11 a. m. and Wednesday at 7:30 when experiences and remarks on Christian Science are given. Sunday school meets at 9:45. Subject for Sunday: "Mortals and Immortals."

FIRST CHRISTIAN CHURCH

Preaching at 11 a. m. each Sunday. Subject of sermon next Sunday, Nov. 17, "Our Conception of God."

Sunday School, 10 a. m.
Christian Endeavor, 6:30 p. m.
You are cordially invited to attend any and all of these services.
Ed S. McKinney, Minister.

Champion Buck Hunter of the Nueces Canyon

By A. W. HUNTER

(Copyright, 1929, by the Home Color Print Co.)

HERE'S a buck in that header over yonder," said Luke Stillwell, the famed buck hunter of the Nueces Canyon, as he pushed a new supply of tobacco in his pipe, and pointed with his thumb in the direction of a deep ravine that ran out from a shovel-shaped mountain. "Don't you hear that fox-squirrel barking his fool head off? We will skirt that mountain, and while you work the right side of the header I will take care of the left side. Watch your step as you go up, keep quiet, move slow over the flint rocks, keep your eyes peeled, and we'll have some back-strap in the skillet for dinner."

Twenty minutes were required to scale the mountain in the early dawn of that first day of buck-hunting season, and as the writer reached a vantage point and secreted himself in a frost-covered cedar brush, he sat down to watch, wait and listen. The sharp bark of the squirrel continued. Glancing across the ravine I saw the form of Stillwell silently emerge from the cedars and pick up a big rock and toss it high up in the header among the tops of a small grove of evergreen trees. The canyons echoed the thump of the rock as it tore into the brush and hurtled down the rocky bed of the draw.

Killing a Ten-Point Buck

For a second all was quiet—then broke loose a crashing of dead trees along the side of the header next to the man who had hurled the rock—and through a small opening came a ten-point buck deer, clearing with swift, majestic leaps each bush in his path. As the deer came on, Stillwell stood immovable with his Springfield sporter resting in his hands. Was he never going to shoot? Suddenly, the deer swerved to the right. Up came the rifle and, as its crack rang out on the clear frosty air, the white tail that had been making rainbows a few seconds before flew be-

tween the animal's hindlegs.

"He's my meat," called Stillwell, and he waited for me to join him. One hundred and twenty-five yards below the header the buck was found, lying against a Spanish oak, a bullet hole behind his left shoulder.

Luke Stillwell is one deer hunter that never gets excited. Buck ague has never afflicted him. He has been hunting deer in the Canyon of the Nueces and the Frio since he was a 10-year-old lad. He knows how, and the tenderfoot finds him a master of woodcraft, yet always willing to help the other fellow. He has trapped lions in the Pecos and Big Bend sections, hunted bear in the Fort Davis mountains, but deer hunting in the Nueces Canyon of Southwest Texas is his greatest fascination.

"To successfully hunt deer you must know how," is one of Stillwell's favorite sayings. "A deer is naturally ten times smarter than a man, his eyesight is better, and so is his hearing. Take the contour of those ears—shaped like a trombone, and always listening. Drop a pin and he will hear it."

The Hard Part

"Most anybody can kill a buck if it's chased past him—but finding the buck—that's the hard part. You must have patience; you must know a deer track from that of a goat or a goat; you must be able to read the signs around a scrape. A squirrel has one certain, dead-sure bark when a buck is grazing around in the vicinity of his tree-top bungalow. I have seen fellows climb up into a tall cedar and call 'em with a pair of buck horns. But I don't like that stunt—too much danger of falling out and bustin' up your gun. And besides

that's not sportsmanship—and has been outlawed.

"Some like still hunting, others like to prow around over the rocks, making all sorts of noise, while the buck steals away. A deer is a nocturnal animal—he is a night hawk. He travels by the moon. When the moon is shining, day or night, he is stirring. When that moon goes to bed, so to speak, he also turns in and beds down. That's the reason I work headers in the daytime when the moon is down. Always pick a header that is brushy at its very head. Toss in

A startled doe of the Nueces Canyon photographed in its native wilds.

a rock, and five times out of ten an old buck will come tearing out.

Relighting his pipe and taking a few puffs, Luke continued: "On foggy mornings you are likely to find your buck in the flats, while on drizzly, rainy mornings, he may be standing around or feeding in a liveoak thicket. A wild turkey eats the same mast that a deer does."

Don't Overshoot

"Don't shoot until you have drawn your bead, unless you are an expert at running shots. A pretty good rule is to get your bead, then drop your rifle barrel, and pull the trigger. More people

overshoot than one realizes, and the deer gets away. Get a good bead, and avoid wounding a deer. A mortally wounded animal nearly always leaves a trail of blood one can follow. Caution should be used in trailing, as you are liable to run up on a wounded buck that will fight like a tiger. When you have found your buck, and satisfied yourself that he is dead, open your knife and disembowel him. If you have no horse to carry him in you have a job before you, which will be tiresome, if you don't know what to do. The best way to handle

a dead buck is to remove the lower front leg bones. Leave the hoofs on. Cut a slit between the muscles and bone of the hind legs. Then slip and knot the front hoofs through these slits—and you have a shot-pouch idea complete. All you have to do is to stoop down and get the legs and throw them over your neck and shoulder. Reach around and get the deer's horn with one hand and the tail with the other, pick up your gun, and you are ready to travel. We carry our deer for miles this way, with occasional

rests."

While hunting Luke does not talk a great deal—and it is only when he is "in the humor" that you can get anything out of him as to his hunting methods. But if he likes you he will warm to you. "Still hunting," he went on, "is really the most successful hereabouts. When you go still hunting for deer it is better to wear old clothes. Wear soft clothing, something that won't scratch the brush noisily. Soft soled shoes are best. Some use tennis shoes to good advantage. The kind of a gun is a matter of personal preference. I don't think one should hunt deer with a smaller calibre than a 30-30. This calibre is used more extensively

than any other. There are more deer killed within 800 yards than beyond that distance. My main 'don't' to my hunting companion is this: Don't shoot at a deer until you can see his horns. If everybody would observe that rule there would be many lives saved and fewer cripples among sportsmen."

Points No Indication of Age

Answering a question as to whether points on a buck's horn has anything to do with the animal's age, Stillwell said:

"The number of points or prongs on a set of horns are by no means indicative of the animal's age. A pet deer over in the Frio Canyon, at two years old, had a set with fourteen points. A well shaped set of antlers only bespeaks the physical condition of the deer. An old buck's horns are usually wrinkled and rough at the base. The meat of such an animal is tough. For tender, juicy steaks, pick a buck that has small white horns. But be sure before you pull the trigger that the legal number of points are there."

At the time I am writing this story the opening day of the deer season is not far away. Stillwell has agreed to let me be his first and sole hunting companion on the opening day—and that means one or more deer will be bagged, beyond any doubt. I am sure Luke will get his and it is to be hoped I will get mine. At any rate, I am leaving nothing undone to make my part of the hunt a success. My old faithful 30-30 has been cleaned and well oiled, my old khaki suit mended and my old rubber-heeled and rubber-soled shoes tread as lightly and noiselessly as a cat.

Dear readers of the Magazine Section: I may have another and much better story than this one to tell you after Luke Stillwell, famed buck hunter of the Nueces Canyon, makes me his sole hunting companion on the 16th of November, 1929, a red letter day in this neck of the world, for it is opening day of the deer-hunting season.

Texas Competes in Date-Raising with Mesopotamia

By ORAN WARDER NOLEN

(Copyright, 1929, by the Home Color Print Co.)

AN immense amount of tropical and sub-tropical fruits and nuts are imported into the United States every year. Many of these imported fruits and nuts can be produced right here in our own country.

Of all the imported fruits and nuts that are being experimented with and tested out none has given greater promise than the date, and it is quite likely that we are now on the eve of quantity commercial date-production in the United States.

Various expeditions had been sent out from the United States to Africa and Mesopotamia to investigate date-growing, and finally 500 offshoots were sent to this country in 1900; out of that number only ten gave any promise of productive value, and the best variety of the ten was the Deglet Noor.

However, it was found impossible to get any trees to mature and ripen the fruit properly, therefore ten years went by before a single pound of Deglet Noor dates were produced. It was discovered that the trees had to be watered properly at a certain time or the fruit would not grow to maturity, and, after growing to maturity, would not ripen. The ripening process was discovered accidentally by Dr. Swingle. He was going to Washington to discuss date-growing with the U. S. Department of Agriculture, but before departure secured a number of stems of dates and packed them in a suitcase. When he examined them a day or two later he found that they had become perfectly ripe, and from that experience a method was solved for artificially ripening the fruit, a method that has made the date-growing industry profitable in California.

Experiments Successful

Today extensive work and experimentation is being carried on in Texas with dates, and it has been found that the Winter Garden and Rio Grande Valley districts of South Texas are well adapted to growing the fruit.

Down in Laredo date trees had been growing as an ornamental plant for years but few trees produced any fruit. Then about fourteen or fifteen years ago Fred W. Mally, county agent of Webb County, took some pollen from male date plants, scattered it upon the female plants, and in a short time the trees were laden with fruit. Today there is a tree growing upon Jarvis Plaza, in Laredo, which produces annually from 1,200 to 1,400 pounds of dates. There are many trees in that section which produce from 200 pounds on up.

Not long ago the United States Department of Agriculture sent Ralph W. Nixon to study date-growing along the Persian Gulf, the expedition being made

possible through the efforts of Congressman John Garner of Texas, who secured a special appropriation from Congress for that purpose.

The object of the trip was to study date-growing in regions that had a similar rainfall and climatic conditions as the Lower Rio Grande Valley. The expedition secured about a thousand offshoots, comprising about twenty-seven varieties. The plants were subjected to a severe "cooking" process to destroy any possible insect pests and were then shipped to Weslaco, Texas, for re-planting. Most of the dates grown in California are from the arid regions around Tunis and Algeria, while the recent importation of plants to Texas were from the Iraq region of Mesopotamia.

Inland Counties Well Adapted

Now, while efforts are being made to find dates adapted to the moist atmosphere of the Lower Rio Grande Valley, it has been discovered that the climatic conditions further inland, particularly in the Winter Garden territory, including such counties as Frio, La Salle, Webb, Maverick, Dimmitt and Zavalla, are ideally adapted to date-growing.

Several years ago Dr. W. H. Dolson, sub-tropical date specialist of the United States Department of Agriculture, W. D. G. Old, of the Hill Brothers Company of New York, the largest importers of dates in the United States, and W. B. Lanham, chief of the horticultural division of the Texas Experiment Station of College Station, made a trip to Laredo for the special purpose of investigating the date-growing possibilities there. They inspected all the various date palms in the city and the United States Government experimental date palm grove on the Richter farm.

These eminent authorities were unanimous in the opinion that that territory would prove one of the best in the United States for date production, and as the territory is being more widely tested from time to time it is seen that the authorities were correct in their conclusions.

Some eighteen years ago a man from Europe by the name of Frye planted a large number of date palms on a farm five miles from Carrizo Springs, in Dimmitt County. The plants thrived and made wonderful growth.

This farm changed ownership a number of times. One of the former owners was named Miller, and the farm is still known as the Miller farm, although it is now owned by W. W. DeLancho, a wealthy contractor of Detroit, Mich, who has turned it into a winter home for himself and family. The giant date palms on this farm tower high in the air, and

are laden with large clusters of fruit of two varieties—one variety red, and another variety yellow. Many of the trees yield from 200 to 300 pounds of fruit each year.

Three Methods

While there are three ways of growing and producing trees in the date-producing counties of South Texas, the simplest is to just purchase an ordinary package of dates at any grocery store and plant the seed, which will usually come up in a few weeks and put out

Gathering dates at Carrizo Springs, Texas.

beautiful little plants. But by far the best method is to secure offshoots from proven, fruit-bearing trees. Another method is to just purchase a producing tree of any age, grub it up and replant it in your own garden or field.

At Carrizo Springs a man planted a date palm sixteen years ago that produced heavily. When it was fourteen years old it was dug up, thrown on a wagon without any protection of any kind around the roots, hauled eight miles to the Brady ranch and re-planted. Today this tree has five large clusters of dates growing upon it.

One of the faults heretofore in growing dates was lack of attention to pollination. Seedling trees are about

equally divided between male and female plants. There is no way of distinguishing between the sex of plants until they are three or four years old. The male plants do not bear fruit and are useless except for pollination purposes. Two male trees for each acre of 50 bearing trees is ample for pollination. While some trees will pollinate naturally, it has been found that the only profitable way to grow dates is to pollenate by hand. In fact, the growers in California destroy all male plants as quickly as possible, except those kept for pollination purposes.

Pollen Will Keep for Years

The female palm usually blossoms in March and April. The male flower is cut and placed in a paper bag and kept for use when desired. A strange thing about this is that the pollen can be kept and used for an indefinite period. Some pollen has been kept in a bottle and used for ten years with perfectly satisfactory results.

The dry pollen is gently shaken upon the female flower and only one pollination is necessary for each cluster, unless a rain should fall within 24 hours.

Some people might think that the necessity of hand pollination would prove too troublesome to make date-growing worth while, but when you consider the fact that it only takes a moment to shake a little pollen on the blossom and that the yield of a tree may be up into the hundreds of pounds, it can readily be seen that the work of hand pollination need not deter any one from growing dates.

A great advantage of date-growing in Texas is that the trees do not have to be protected during the winter months. They will live in the open and thrive through any kind of weather.

The day is not far distant when Southwest Texas will probably be one of the greatest date-producing territories in the world—and will offset the 80,000,000 pounds of dates that are being imported into the United States annually.

GLASS FACTORY BEING SOUGHT AT MONAHANS

Sand sent to Eastern laboratories from Monahans recently is suitable for the manufacture of glass, according to a report received by the Chamber of Commerce at that place. A huge sand deposit, once the terror of western pioneers, exists in that section.

Following interest manifested by Eastern concerns, the city officials and Chamber of Commerce are co-operating in efforts to secure manufacturing plants for the town.

LIVES IN ROOM IN WHICH HE WAS BORN 74 YEARS AGO

James L. Dugger, whose home is four miles east of McKinney, still lives in the room he was born in 74 years ago. During his long life Mr. Dugger has never been outside the State of Texas, in fact has never been over 100 miles from home, and has never been away from home more than three nights at a time.

Mr. Dugger's parents moved from Maury county, Tennessee, to Texas in 1852. Two years later his father bought the 100 acres of land where Mr. Dugger now lives. In 1854 the old Dugger home was built. It consisted of one room, sixteen by eighteen feet, and was built of post oak lumber hewed out by hand. The roof was covered with boards which were split out with a free and then shaved down with a drawing knife. The ceiling lumber was sawed out from ash and is still in use. Other rooms were added from time to time, but the original room still stands and is in service. It was in this room that Mr. Dugger was born 74 years ago, and in this room he now seeks restful sleep when the curtains of night have been drawn.

HAS CHECKED BAGGAGE SINCE 1876

Zachary T. Reese, the man who checked the first baggage out of the Texas & Pacific station at Fort Worth in 1876, retired on September 30, on a pension provided by the company's rules. His retirement brought to a close 55 years of active service for the road.

Mr. Reese was 80 years old two days before his retirement. He entered the service of the Texas & Pacific Railway Company on September 15, 1874. He was first a baggage clerk in Texarkana, then brakeman and finally baggage master. He went to Fort Worth in July, 1876, shortly after the first engine of the company had entered the corporate lines of the city on the morning of July 19.

HEAVY DECREASE IN TEXAS WEDDINGS

Since the new marriage law, passed at the late session of the Texas Legislature, went into effect a heavy decrease in the number of Texas marriages is reported. Rather than worry with the red tape of the new law, matrimonially-inclined people go to one of the four bordering States for the marriage ceremony. A check-up of the marriage licenses issued in one large Texas county for three months shows only 574 marriage licenses issued during the period this year, against 1,113 for the same period last year. There has been a corresponding decrease in most of the Texas counties.

Champion Buck Hunter of the Nueces Canyon

By A. W. HUNTER

(Copyright, 1929, by the Home Color Print Co.)

HERE'S a buck in that header over yonder," said Luke Stillwell, the famed buck hunter of the Nueces Canyon, as he pushed a new supply of tobacco in his pipe, and pointed with his thumb in the direction of a deep ravine that ran out from a shovel-shaped mountain. "Don't you hear that fox-squirrel barking his fool head off? We will skirt that mountain, and while you work the right side of the header I will take care of the left side. Watch your step as you go up, keep quiet, move slow over the flint rocks, keep your eyes peeled, and we'll have some back-straps in the skillet for dinner."

Twenty minutes were required to scale the mountain in the early dawn of that first day of buck-hunting season, and as the writer reached a vantage point and secreted himself in a frost-covered cedar brush, he sat down to watch, wait and listen. The sharp bark of the squirrel continued. Glancing across the ravine I saw the form of Stillwell silently emerge from the cedars and pick up a big rock and foss it high up in the header among the tops of a small grove of evergreen trees. The canyons echoed the thump of the rock as it tore into the brush and hurtled down the rocky bed of the draw.

Killing a Ten-Point Buck

For a second all was quiet—then broke loose a crashing of dead trees along the side of the header next to the man who had hurled the rock—and through a small opening came a ten-point buck deer, clearing with swift, majestic leaps each bush in his path. As the deer came on, Stillwell stood immovable with his Springfield sporter resting in his hands. Was he never going to shoot? Suddenly, the deer swerved to the right. Up came the rifle and, as its crack rang out on the clear frosty air, the white tail that had been making rainbows a few seconds before flew be-

tween the animal's hindlegs.

"He's my meat," called Stillwell, and he waited for me to join him. One hundred and twenty-five yards below the header the buck was found, lying against a Spanish oak, a bullet hole behind his left shoulder.

Luke Stillwell is one deer hunter that never gets excited. Buck ague has never afflicted him. He has been hunting deer in the Canyon of the Nueces and the Frio since he was a 10-year-old lad. He knows how, and the tenderfoot finds him a master of woodcraft, yet always willing to help the other fellow. He has trapped lions in the Pecos and Big Bend sections, hunted bear in the Fort Davis mountains, but deer hunting in the Nueces Canyon of Southwest Texas is his greatest fascination.

"To successfully hunt deer you must know how," is one of Stillwell's favorite sayings. "A deer is naturally ten times smarter than a man, his eyesight is better, and so is his hearing. Take the contour of those ears—shaped like a trombone, and always listening. Drop a pin and he will hear it."

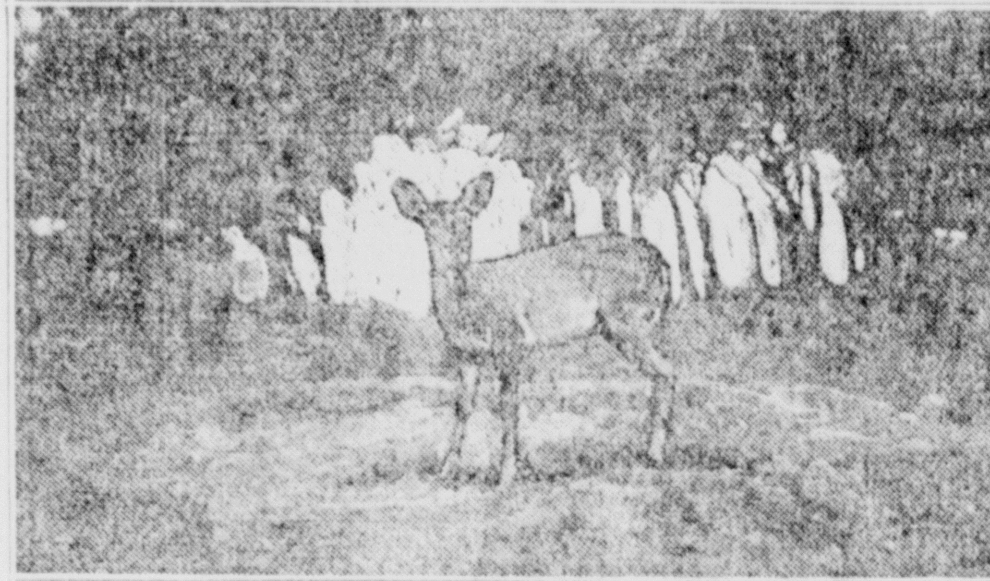

The Hard Part

"Most anybody can kill a buck if it's chased past him—but finding the buck—that's the hard part. You must have patience; you must know a deer track from that of a sheep or a goat; you must be able to read the signs around a scrape. A squirrel has one certain, dead-end bark when a buck is grazing around in the vicinity of his tree-top bungalow. I have seen fellows climb up into a tall cedar and call 'em with a pair of buck horns. But I don't like that stunt—too much danger of falling out and bustin' up your gun. And besides

that's not sportsmanship—and has been outlawed.

"Some like still hunting, others like to prow around over the rocks, making all sorts of noise, while the buck steals away. A deer is a nocturnal animal—he is a night hawk. He travels by the moon. When the moon is shining, day or night, he is stirring. When that moon goes to bed, so to speak, he also turns in and beds down. That's the reason I work headers in the daytime when the moon is down. Always pick a header that is brushy at its very head. Toss in

overshoot than one realizes, and the deer gets away. Get a good bead, and avoid wounding a deer. A mortally wounded animal nearly always leaves a trail of blood one can follow. Caution should be used in trailing, as you are liable to run up on a wounded buck that will fight like a tiger. When you have found your buck, and satisfied yourself that he is dead, open your knife and disembowel him. If you have no horse to carry him in you have a job before you, which will be tiresome, if you don't know what to do. The best way to handle a dead buck is to remove the lower front leg bones. Leave the hoofs on. Cut a slit between the muscles and bone of the hind legs. Then slip and knot the front hoofs through these slits—and you have a shot-pouch idea complete. All you have to do is to stoop down and get the legs and throw them over your neck and shoulder. Reach around and get the deer's horn with one hand and the tail with the other, pick up your gun, and you are ready to travel. We carry our deer for miles this way, with occasional

A startled doe of the Nueces Canyon photographed in its native wilds.

a rock, and five times out of ten an old buck will come tearing out.

Relighting his pipe and taking a few puffs, Luke continued: "On foggy mornings you are likely to find your buck in the flats, while on drizzly, rainy mornings, he may be standing around or feeding in a liveoak thicket. A wild turkey eats the same mast that a deer does."

Don't Overshoot

"Don't shoot until you have drawn your bead, unless you are an expert at running shots. A pretty good rule is to get your bead, then drop your rifle barrel, and pull the trigger. More people

rests."

While hunting Luke does not talk a great deal—and it is only when he is "in the humor" that you can get anything out of him as to his hunting methods. But if he likes you he will warn you. "Still hunting," he went on, "is really the most successful hereabouts. When you go still hunting for deer it is better to wear old clothes. Wear soft clothing, something that won't scratch the brush noisily. Soft soled shoes are best. Some use tennis shoes to good advantage. The kind of a gun is a matter of personal preference. I don't think one should hunt deer with a smaller calibre than a 30-30. This calibre is used more extensively

than any other. There are more deer killed within 800 yards than beyond that distance. My main 'don't' to my hunting companion is this: Don't shoot at a deer until you can see his horns. If everybody would observe that rule there would be many lives saved and fewer cripples among sportsmen."

Points No Indication of Age

Answering a question as to whether points on a buck's horn has anything to do with the animal's age, Stillwell said:

"The number of points or prongs on a set of horns are by no means indicative of the animal's age. A pet deer over in the Frio Canyon, at two years old, had a set with fourteen points. A well shaped set of antlers only bespeaks the physical condition of the deer. An old buck's horns are usually wrinkled and rough at the base. The meat of such an animal is tough. For tender, juicy steaks, pick a buck that has small white horns. But be sure before you pull the trigger that the legal number of points are there."

At the time I am writing this story the opening day of the deer season is not far away. Stillwell has agreed to let me be his first and sole hunting companion on the opening day—and that means one or more deer will be bagged, beyond any doubt, I am sure Luke will get his and it is to be hoped I will get mine. At any rate, I am leaving nothing undone to make my part of the hunt a success. My old faithful 30-30 has been cleaned and well oiled, my old khaki suit mended and my old rubber-heeled and rubber-soled shoes tread as lightly and noiselessly as a cat.

Dear readers of the Magazine Section: I may have another and much better story than this one to tell you after Luke Stillwell, famed buck hunter of the Nueces Canyon, makes me his sole hunting companion on the 16th of November, 1929, a red letter day in this neck of the world, for it is opening day of the deer-hunting season.

Texas Competes in Date-Raising with Mesopotamia

By ORAN WARDER NOLEN

(Copyright, 1929, by the Home Color Print Co.)

AN immense amount of tropical and sub-tropical fruits and nuts are imported into the United States every year. Many of these imported fruits and nuts can be produced right here in our own country.

Of all the imported fruits and nuts that are being experimented with and tested out none has given greater promise than the date, and it is quite likely that we are now on the eve of quantity commercial date-production in the United States.

Various expeditions had been sent out from the United States to Africa and Mesopotamia to investigate date-growing, and finally 500 offshoots were sent to this country in 1909; out of that number only ten gave any promise of productive value, and the best variety of the ten was the Deglet Noor.

However, it was found impossible to get any trees to mature and ripen the fruit properly, therefore ten years went by before a single pound of Deglet Noor dates were produced. It was discovered that the trees had to be watered properly at a certain time or the fruit would not grow to maturity, and, after growing to maturity, would not ripen. The ripening process was discovered accidentally by Dr. Swingle. He was going to Washington to discuss date-growing with the U. S. Department of Agriculture, but before departure secured a number of stems of dates and packed them in a suitcase. When he examined them a day or two later he found that they had become perfectly ripe, and from that experience a method was solved for artificially ripening the fruit, a method that has made the date-growing industry profitable in California.

Experiments Successful

Today extensive work and experimentation is being carried on in Texas with dates, and it has been found that the Winter Garden and Rio Grande Valley districts of South Texas are well adapted to growing the fruit.

Down in Laredo date trees had been growing as an ornamental plant for years but few trees produced any fruit. Then about fourteen or fifteen years ago Fred W. Mally, county agent of Webb County, took some pollen from male date plants, scattered it upon the female plants, and in a short time the trees were laden with fruit. Today there is a tree growing upon Jarvis Plaza, in Laredo, which produces annually from 1,200 to 1,400 pounds of dates. There are many trees in that section which produce from 200 pounds on up.

Not long ago the United States Department of Agriculture sent Ralph W. Nixon to study date-growing along the Persian Gulf, the expedition being made

possible through the efforts of Congressman John Garner of Texas, who secured a special appropriation from Congress for that purpose.

The object of the trip was to study date-growing in regions that had a similar rainfall and climatic conditions as the Lower Rio Grande Valley. The expedition secured about a thousand offshoots, comprising about twenty-seven varieties. The plants were subjected to a severe "cooking" process to destroy any possible insect pests and were then shipped to Weslaco, Texas, for re-planting. Most of the dates grown in California are from the arid regions around Tunis and Algeria, while the recent importation of plants to Texas were from the Iraq region of Mesopotamia.

Inland Counties Well Adapted

Now, while efforts are being made to find dates adapted to the moist atmosphere of the Lower Rio Grande Valley, it has been discovered that the climatic conditions further inland, particularly in the Winter Garden territory, including such counties as Frio, La Salle, Webb, Maverick, Dimmitt and Zavalla, are ideally adapted to date-growing.

Several years ago Dr. W. H. Dolson, sub-tropical date specialist of the United States Department of Agriculture, W. D. G. Old, of the Hill Brothers Company of New York, the largest importers of dates in the United States, and W. B. Lanham, chief of the horticultural division of the Texas Experiment Station of College Station, made a trip to Laredo for the special purpose of investigating the date-growing possibilities there. They inspected all the various date palms in the city and the United States Government experimental date palm grove on the Richter farm.

These eminent authorities were unanimous in the opinion that that territory would prove one of the best in the United States for date production, and as the territory is being more widely tested from time to time it is seen that the authorities were correct in their conclusions.

Some eighteen years ago a man from Europe by the name of Frye planted a large number of date palms on a farm five miles from Carrizo Springs, in Dimmitt County. The plants thrived and made wonderful growth.

This farm changed ownership a number of times. One of the former owners was named Miller, and the farm is still known as the Miller farm, although it is now owned by W. W. DeLanhe, a wealthy contractor of Detroit, Mich., who has turned it into a winter home for himself and family. The giant date palms on this farm tower high in the air, and

are laden with large clusters of fruit of two varieties—one variety red, and another variety yellow. Many of the trees yield from 200 to 300 pounds of fruit each year.

Three Methods

While there are three ways of growing and producing trees in the date-producing counties of South Texas, the simplest is to just purchase an ordinary package of dates at any grocery store and plant the seed, which will usually come up in a few weeks and put out

Gathering dates at Carrizo Springs, Texas.

beautiful little plants. But by far the best method is to secure offshoots from proven, fruit-bearing trees. Another method is to just purchase a producing tree of any age, grub it up and replant it in your own garden or field.

At Carrizo Springs a man planted a date palm sixteen years ago that produced heavily. When it was fourteen years old it was dug up, thrown on a wagon without any protection of any kind around the roots, hauled eight miles to the Brady ranch and re-planted. Today this tree has five large clusters of dates growing upon it.

One of the faults heretofore in growing dates was lack of attention to pollination. Seedling trees are about

equally divided between male and female plants. There is no way of distinguishing between the sex of plants until they are three or four years old. The male plants do not bear fruit and are useless except for pollination purposes. Two male trees for each acre of 50 bearing trees is ample for pollination. While some trees will pollinate naturally, it has been found that the only profitable way to grow dates is to pollinate by hand. In fact, the growers in California destroy all male plants as quickly as possible, except those kept for pollination purposes.

Pollen Will Keep for Years

The female palm usually blossoms in March and April. The male flower is cut and placed in a paper bag and kept for use when desired. A strange thing about this is that the pollen can be kept and used for an indefinite period. Some pollen has been kept in a bottle and used for ten years with perfectly satisfactory results.

The dry pollen is gently shaken upon the female flower and only one pollination is necessary for each cluster, unless a rain should fall within 24 hours.

Some people might think that the necessity of hand pollination would prove too troublesome to make date-growing worth while, but when you consider the fact that it only takes a moment to shake a little pollen on the blossom and that the yield of a tree may be up into the hundreds of pounds, it can readily be seen that the work of hand pollination need not deter any one from growing dates.

A great advantage of date-growing in Texas is that the trees do not have to be protected during the winter months. They will live in the open and thrive through any kind of weather.

The day is not far distant when Southwest Texas will probably be one of the greatest date-producing territories in the world—and will offset the 80,000,000 pounds of dates that are being imported into the United States annually.

GLASS FACTORY BEING SOUGHT AT MONAHANS

Sand sent to Eastern laboratories from Monahans recently is suitable for the manufacture of glass, according to a report received by the Chamber of Commerce at that place. A huge sand deposit, once the terror of western pioneers, exists in that section.

Following interest manifested by Eastern concerns, the city officials and Chamber of Commerce are co-operating in efforts to secure manufacturing plants for the town.

LIVES IN ROOM IN WHICH HE WAS BORN 74 YEARS AGO

James L. Duggar, whose home is four miles east of McKinney, still lives in the room he was born in 74 years ago. During his long life Mr. Duggar has never been outside the State of Texas, in fact has never been over 100 miles from home, and has never been away from home more than three nights at a time.

Mr. Duggar's parents moved from Maury county, Tennessee, to Texas in 1852. Two years later his father bought the 100 acres of land where Mr. Duggar now lives. In 1854 the old Duggar home was built. It consisted of one room, sixteen by eighteen feet, and was built of post oak lumber hewed out by hand. The roof was covered with boards which were split out with a froe and then shaved down with a drawing knife. The ceiling lumber was sawed out from ash and is still in use. Other rooms were added from time to time, but the original room still stands and is in service. It was in this room that Mr. Duggar was born 70 years ago, and in this room he now seeks restful sleep when the curtains of night have been drawn.

HAS CHECKED BAGGAGE SINCE 1876

Zachary T. Reese, the man who checked the first baggage out of the Texas & Pacific station at Fort Worth in 1876, retired on September 30, on a pension provided by the company's rules. His retirement brought to a close 55 years of active service for the road.

Mr. Reese was 80 years old two days before his retirement. He entered the service of the Texas & Pacific Railway Company on September 15, 1874. He was first a baggage clerk in Texarkana, then brakeman and finally baggage master. He went to Fort Worth in July, 1876, shortly after the first engine of the company had entered the corporate lines of the city on the morning of July 19.

HEAVY DECREASE IN TEXAS WEDDINGS

Since the new marriage law, passed at the late session of the Texas Legislature, went into effect a heavy decrease in the number of Texas marriages is reported. Rather than worry with the red tape of the new law, matrimonially-inclined people go to one of the four bordering States for the marriage ceremony. A check-up of the marriage licenses issued in one large Texas county for three months shows only 574 marriage licenses issued during the period this year, against 1,113 for the same period last year. There has been a corresponding decrease in most of the Texas counties.

CURRENT COMMENT

By J. H. (JIM) LOWRY
(Copyright, 1929, by the Home Color Print Co.)

November Days

"The melancholy days are come,
The saddest of the year."
* * *

"We all do fade as a leaf."

LONG years ago, when time was young, a seer looked out from his window and saw the earth covered with dead leaves. On the trees were other leaves, faded to a dull brown, and ready to fall when stirred again by the autumn winds. The trees had lost their beauty of foliage and bloom, and the scene beheld by the old man was one of sadness. Then the old man stood before a mirror and studied himself for a time. His cheeks were sunken, his eyes watery and dim, and remorseless Time had ploughed great furrows where youthful vigor was once portrayed and youthful beauty once sat enthroned. And he said, "we all do fade as a leaf." Mr. Bryant, one of America's greatest poets, looked upon the leaves and the trees he had loved so much, all lifeless and brown, and under the spell of sadness wrought by them wrote, "The melancholy days are come, the saddest of the year."

But is it true that melancholy must come with the fading, falling leaf? I think not. True it marks the passing of a scene of splendor. Truly it was glorious in the springtime, when the leaves were young and velvety, and the sunbeams sifting through them traced lace-work of magic beauty on the ground beneath. The world was a panorama of transcendent beauty then—the roses burgeoned and bloomed, and blushed in regal beauty, and the lillies bowed their stately heads in dignity and loveliness. Then heartless winter came and seemed to mock all life. But with the fading leaf fruit is revealed, and mankind rejoices under the assurance of plenty as he contemplates the products of man's toil. Nature did not give the tree life that it might grow only a beautiful leaf; if so the efforts of the soil which gave the touch of fertility to its tiny roots, the sea that harnessed its cloudy chariots to refresh it, and the sun that sent its warm rays to strengthen it would have been in vain. More was expected of it than strength of body gathered from friendly elements and beauty of foliage to minister unto its own sense of vanity. The Master once found a beautiful tree and appealed to it for fruit—but it had no fruit! nothing but leaves, which quickly crumbled under His censure of the barren tree.

Likewise the springtime of man is glorious. There is pleasure, beauty, strength and the smile of promise. After a season man stands before the mirror and sees in himself the fading leaf. Instead of strength and buoyancy and eagerness for the fray, he sees a mass of wrinkles; his frame is unsightly and

totters from weakness, and only high-pitched words or measures pierce the dulled drum of his hearing. But if his life has yielded fruit, if the garner is full of the fruit of conscious rectitude, if the retrospection is thickly set with those delicious scenes so sweet to gaze upon when evening falls, there will come to his ears no mournful measures of sadness, but the inspiring music of better things "beyond the sunset's radiant glow." Spring indeed is glorious, but autumn is sublime. "We all shall fade as a leaf," but under and surviving the faded leaf is the golden fruit.

November 11

What means the playing of bands, the fluttering of flags, the screeching of whistles, the singing, the dancing, and the people in holiday attire? It isn't a time to work; it isn't a time to think of trade or gain. The day is too holy for such activities. It is a day to rejoice and be glad. Eleven years ago today the Kaiser's dream of world conquest was turned into the awful awakening that he was doomed to defeat. He threw away his helmet and his saber, untwisted his mustache, and sought a retreat in a foreign nook, there to spend his remaining days in loneliness and grief, with no one to do him honor and no minstrel to sing a requiem over his shattered dream. Today, like Napoleon at St. Helena, he sits in gloom. Eleven years have passed since the Kaiser's dream was shattered, and I find myself wondering what would have been Europe's fate if the Kaiser's submarine hadn't sent that American boat, which claimed its rights on the ocean, to the bottom of the sea. In my humble opinion the explosion of the boilers of that peaceful vessel sounded the call to arms which sent the haughty ruler into an exile that only death can break.

Distance Increases Wealth

Distance adds to the wealth of the family into which the neighbor girl or boy marries as materially as it lends enchantment to the view. We hear of the great wealth the home girl or home boy acquires by a matrimonial alliance in a distant city and marvel that Cupid should have steered her or him against so much gold. The first report is that the home girl or boy has married into a family worth a hundred thousand dollars, but with much telling the wealth soon increases to several million. By and by we learn more of the family's financial standing, and the fortune begins to dwindle. After a few months some one from the home town visits in the town in which the father of the bridegroom or bride lives and learns that he is hard-pushed to meet his grocery bills. And the last sad chapter is presented when the old folks, no longer successful in standing off the grocer, come to live with their son and daughter-in-law or daughter and son-in-law.

Sherman's March to the Sea.

November 15 marks the 64th anniversary of the beginning of Sherman's famous march to the sea, for it was Nov. 15, sixty-four years ago, that this last exploit of the Union army before the surrender of General Lee began. The march is a chapter in the Civil War, and inspired the well-known war song, "Marching Through Georgia." With about sixty thousand troops General Sherman left Atlanta on the date herein mentioned. The march proved what the Union forces suspected, that the South was impoverished and could not continue the war long. For about one month nothing was known of the doings of Sherman's army, no report having reached headquarters until the army reached Savannah. Writing from the field near Savannah December 15, General Sherman made the following report of the triumphant march: "We came right along, living on turkeys, chickens, pigs, bringing along our wagons loaded with bread, etc. I suppose Jeff Davis will now have to feed the people of Georgia instead of collecting provisions of them to feed his armies. We destroyed nearly two hundred miles of railroad and are not yet done. We have lived sumptuously on turkeys, chickens, pigs and sweet potatoes all the way, but the poor women and children will starve."

Table Manners

Desiring culture, and especially table manners, I was easy prey to a good-looking woman agent who came through not long since selling a book entitled "Culture and Manners." For my money, and my short chat with the pretty agent, I gained the information that one should eat peas with a fork, and never with a spoon; that a napkin should be fully opened and never used half-folded; that one should always send his knife and fork with his plate for a second helping, and that in crossing the street with a lady a man should offer his arm instead of taking hers. My money was worse than wasted. As a conveyor of peas to the mouth a spoon is 75 per cent more efficient than a fork, since a spoon holds more and the smaller peas fall between the prongs of a fork. If all our people should eat their peas with a fork, enough time would soon be lost to bankrupt the nation. Personally I would as soon undertake to drink water from a sifter. When sending your plate back for a second helping it is decidedly better to keep the knife and fork to play with; furthermore, it makes more room for a third helping.

Repairing Human Frames

There are grounds upon which to base the hope that repairers of human frames will finally become so expert in their noble profession that they will be able to keep man up and going for at

least a thousand years. Out of a New York repair factory recently went a man with a new nose; another who had been blind for years had his eye-sight restored by grafting the eye of a rabbit to his optic nerve, and still another went away without any stomach at all, and is working right along and getting fat. It has been ascertained that many of the organs of sheep, rabbits and pigs will work as well in man as in their original positions, and it seems foolish for man to give up the ghost on account of defective organs when he can get new ones by applying to his friends, the sheep, the rabbits and the pigs. The shifting of the organs is nearly as simple as putting new spokes in a wheel, so the surgeons say.

Another War Cloud

Soviet Russia and benighted China have been making ugly faces at each other and displaying bellicose proclivities upon each other's border for some time, and I am moved to predict that ere many moons wax and wane the doors of Janus temple will again be thrown wide open and grim-visaged war will go stalking through the Orient. These countries have trouble over a railroad and it seems that the dispute will have to be settled with cannons and bayonets. Quite likely some of Russia and China's plowshares and pruning hooks, which are so badly needed, will have to be moulded into swords and guns. War is as strongly entrenched in the hearts of nations today as when the wandering tribes of ancient Gaul fought and died for possession of Europe's primal forests. This reminds us that the great novelist, Victor Hugo, was a very poor prophet. "In the twentieth century," said Mr. Hugo, "war will be dead, royalty will be dead and dogmas will be dead." As a novelist Mr. Hugo stood at the head, and as a poet he took high rank, but as a prophet he was a miserable failure. The twentieth century has been with us some time; it has already witnessed the world's greatest war and has other wars in prospect. Royalty is not dead and dogma has not been shaken a little bit.

One of my neighbors who is plodding along in the sixties, says the greatest family row he ever witnessed took place in his home when his grown daughter went to town bare-legged. But this neighbor forgets. I happen to know there was a bigger row in his father's family forty-odd years ago when his sister, Ellen, rode to Sunday school at Cross Roads church in a hug-me-tight buggy with a young man.

If there were a town on earth where every man paid cash for what he bought, and every woman kept her hens out of her neighbor's garden and flower beds, and every youth showed proper respect for age—but come to think of it,

it wouldn't do to have such a town on earth. It would approach so nearly the New Jerusalem that only trained angels could distinguish between the two places and there would be a great mix-up.

Since winter is only a few weeks in the distance, I feel it a duty to state that people will have colds the coming winter as usual. I desire to add to this unwelcome statement that I know a remedy that will cure your cold, and am confident that you know a remedy that will cure my cold. So why worry?

I am sure I correctly diagnosed the trouble when I said our long season of hard times was due to the purchase of so many automobiles and so much gasoline, but it makes me mad as thunder when a fellow exhibits the bank statements of thirty years ago showing deposits 50 per cent below the deposits of today. There wasn't an auto or a filling station in the country thirty years ago, but nevertheless I know the autos and gasoline ruined the country.

The nation needs a few more laws. There should be a law providing for the hanging and burning of hot-check writers, there should be a law sending dare-devil auto drivers to the pen for life, and we certainly need a law making it easy to put officers who do not enforce the law out of office. But here's the trouble: If we get the needed laws we will also get several new bureaus, with managers, traveling agents, clerks and stenographers for each. So perhaps we had better jog along and do the best we can without the laws.

Building castles in the air is the most satisfactory building one can engage in these days. You don't have to worry with organized labor, you don't have to run after the plumber or wait for the tinner, neither do you have to lie to the tax assessor or run from the tax collector.

I can't help wondering what the result would be if all the automobile tires in the country should burst at the same time. It seems that we already have all the air there is space for, and if all the air now shut up in the auto tires should be released at the same time there would be an awful explosion, and perhaps so much pressure that all of us would be pressed flat.

Times, customs and tastes change. When the writer was young, people believed pure hog lard the only "short-enin'" that was fit to use. The good housewives turned up their noses if the lard was contaminated to the slightest degree with vegetable oils or fats and threw the awful stuff away. Now the grocers tell me that pure hog lard is as unsalable as celluloid collars.

ABSENTMINDEDNESS--the Cause of Much Embarrassment

By JOE SAPPINGTON

(Copyright, 1929, by the Home Color Print Co.)

EVERY adult person at some time in his or her life, has had lapses of memory, commonly known as absentmindedness. There are many phases of the ailment and it is often the cause of deep humiliation and embarrassment.

I once lived neighbor to a man of more than ordinary intelligence, who did some amusing things while under the spell of this peculiar malady. I saw him climb over a high picket fence with an armful of bundles within five feet of an open gate. He kept his nose skinned walking against walls, door facings and other hard unyielding objects in broad daylight. He was almost as absentminded as the old fellow who boiled his watch instead of the egg.

Absentmindedness causes some folks to talk to themselves in a loud tone of voice. "I'll call you. Can you beat two aces and three kings?" proclaimed John Hadley while sitting by his wife in church just after dropping a nickel in an usher's hat that was being passed for the evening's offering. His wife went with him to the preacher and made him apologize for his strange conduct. But the preacher was a good scout, patted John on the shoulder and told him it was all right, that when a young man he had played poker and knew how very absorbing the game was.

That was the first intimation the wife had that her husband played cards and she proceeded to bless him out all the way home

Misplacing Things

Misplacing things is one of the most usual manifestations of absentmindedness. Losing or misplacing railway tickets has been the cause of much embarrassment to conductors and the traveling public from time immemorial.

Many years ago I witnessed the discomfort and embarrassment of an old lady who occupied a seat next to me, when the conductor came through taking up tickets. She carried a satchel of ancient vintage with many compartments therein and her ticket was supposed to be in one of these. The conductor ran true to form and showed his impatience and lack of breeding by blurting out, "Ticket, ticket, lady," which put the old woman to scratching and fumbling in her satchel in a mad effort to find the ticket. "Hurry up! Hurry up! I can't wait here all day," the conductor insisted. All the time the poor old soul was scratching the insides out of that old heirloom. I finally came to her rescue by giving him a stony stare, at the same time remarking, "You see, sir, she is agitated and greatly upset for the moment. If you will call upon your return doubtless she will have found the ticket. If she has not I will be personally responsible for it, sir." I spoke very loud, so all passengers near me could hear, and felt like a conquering hero.

"All right, sir, give me your ticket and be in a hurry about it." Yea gods! I had forgotten about my own fare and began a frantic search for my ticket. I felt in my coat, vest and britches pockets, but no ticket was forthcoming.

"Hurry up and get your ticket," was the loud command from the ticket puncher. Cold chills waltzed up and down my spine as I scratched and fumbled in my pockets.

A Scratching Match

Finally, the old lady and I resolved ourselves into a scratching match—she scratching in her satchel and I in my pockets. To add to my discomfiture, four or five smartalecks started betting on the outcome of the contest. The ones backing me lost, since the old sister got through about ten seconds before I did by scratching into the bosom of her alpaca and bringing to light another satchel which contained her ticket. While the conductor was punching it I looked in my hat and found mine nesting under the sweat band where I had placed it for safe-keeping.

All my life I have had trouble finding my clothes in the dark, which has caused me to miss some of the best fires that ever took place in my town. Nothing is more exasperating to a high-strung man than to be awakened from a sound sleep by the wild clanging of firebells and then not be able to find enough clothes to join the excited throngs that rush by, shooting their guns and yelling FIRE! FIRE! FIRE! I have spent at least 48 hours of my young life galloping around on all-fours to the clangorous music of fire bells, in a mad effort to find enough togs to appear before a mixed audience in the dark, all on account of being absent-minded.

Political Speech Ruined

Absentmindedness caused Jim Bevis a lot of embarrassment and humiliation the time he tried to make a political speech at a picnic.

Jim was running for justice of the peace on the Populist ticket and had prepared a speech extolling the virtues of his party and laying bare the iniqui-

ties and intrigues of Democrats in both State and nation. "I want to read some of their doings in Congress, and show their record on banking, the tariff and how they have been secretly dealing with the plutocrats and the money powers of old England and robbing the 'pore' people of this kentry." At the conclusion of these caustic remarks he began scratching for the papers. He felt in all his pockets, including the rear pockets of his jeans trousers, but found nothing that remotely bore upon the subject in hand. He finally called for time and dashed out to his mule and searched his saddle pockets, but found nothing derogatory to the Democratic party. The crowd laughed itself hoarse at Jim's discomfiture, one fellow yelling at him to look under his saddle for the papers. Jim finally mounted his mule, shook his fists at the assembled Democrats and rode away.

It was another case of absentmindedness. He had left his papers at home.

Then there is the absentminded person who habitually loses his or her spectacles only to be humiliated by "finding" the eye-glass resting on the nose. And a friend, whom I respect highly for his intelligence and learning, will sometimes fuss around looking for his hat while all the time the "lost" hat sets snugly on his head.

AUTO REGISTRATION INCREASES OVER LAST YEAR

Automobile registration in each county in Texas for the first six months of 1929 was recently completed by the State Highway Department. Registrations this year have made a substantial increase over last year, the total for the first six months of 1929 being 1,183,969.

Harris county, with 79,969, has the largest number of autos, and Dallas, with 72,363 autos, is second.

LAST SURVIVOR OF MEXICAN WAR DEAD

Owen T. Edgar, the last United States survivor of the war between the United States and Mexico, died a few weeks ago in Washington, D. C. Mr. Edgar was 99 years old. He was only 15 years old when he enlisted at Philadelphia, his birthplace, in 1846. During the war he served on the frigates Potomac and Allegheny. He took part in the battle of Vera Cruz and marched with General Winfield Scott in the attack on Mexico City.

In 1850 Mr. Edgar left the navy and made his home in Washington, where he was connected with the Bureau of Engraving and Printing for many years. Germs of tropical fever incurred in Mexico prevented him from serving in the Civil War.

Still clear in Mr. Edgar's memory a short time before his death was the Mexican campaign—the slow voyage to Vera Cruz, battles against scurvy, smallpox, cockroaches; diet of salt horse, hardtack, smelly cask water; heavy northerners sweeping the seas; advancing over ghastly stretches of desert, bearing sacks and rifles much heavier than present-day equipment, the soldiers' feet tortured by cowhide boots as hard as iron; burning sand, yellow-jack, deserted adobe villages, lack of food, the heights of Chapultepec, then victory.

ECTOR COUNTY TO HIRE COYOTE TRAPPER

Employing a member of the State Biological Research Department force to rid that region of the coyotes that have recently become a nuisance, has been approved by the Commissioners of Ector county. The county will pay half of the salary and the State pays the rest for a man who will spend his time the year around trapping and killing coyotes.

"She carried a satchel of ancient vintage"

CURRENT COMMENT

By J. H. (JIM) LOWRY

(Copyright, 1929, by the Home Color Print Co.)

November Days

"The melancholy days are come,
The saddest of the year."

"We all do fade as a leaf."

LONG years ago, when time was young, a seer looked out from his window and saw the earth covered with dead leaves. On the trees were other leaves, faded to a dull brown, and ready to fall when stirred again by the autumn winds. The trees had lost their beauty of foliage and bloom, and the scene beheld by the old man was one of sadness. Then the old man stood before a mirror and studied himself for a time. His cheeks were sunken, his eyes watery and dim, and remorseless Time had ploughed great furrows where youthful vigor was once portrayed and youthful beauty once sat enthroned. And he said, "We all do fade as a leaf." Mr. Bryant, one of America's greatest poets, looked upon the leaves and the trees he had loved so much, all lifeless and brown, and under the spell of sadness wrought by them wrote, "The melancholy days are come, the saddest of the year."

But is it true that melancholy must come with the fading, falling leaf? I think not. True it marks the passing of a scene of splendor. Truly it was glorious in the springtime, when the leaves were young and velvety, and the sunbeams sifting through them traced lace-work of magic beauty on the ground beneath. The world was a panorama of transcendent beauty then — the roses burgeoned and bloomed, and blushed in regal beauty, and the lilies bowed their stately heads in dignity and loveliness. Then heartless winter came and seemed to mock all life. But with the fading leaf fruit is revealed, and mankind rejoices under the assurance of plenty as he contemplates the products of man's toil. Nature did not give the tree life that it might grow only a beautiful leaf; if so the efforts of the soil which gave the touch of fertility to its tiny roots, the sea that harnessed its cloudy chariots to refresh it, and the sun that sent its warm rays to strengthen it would have been in vain. More was expected of it than strength of body gathered from friendly elements and beauty of foliage to minister unto its own sense of vanity. The Master once found a beautiful tree and appealed to it for fruit—but it had no fruit! nothing but leaves, which quickly crumbled under His censure of the barren tree.

Likewise the springtime of man is glorious. There is pleasure, beauty, strength and the smile of promise. After a season man stands before the mirror and sees in himself the fading leaf. Instead of strength and buoyancy and eagerness for the fray, he sees a mass of wrinkles; his frame is ungainly and

totters from weakness, and only high-pitched words or measures pierce the dulled drum of his hearing. But if his life has yielded fruit, if the garner is full of the fruit of conscious rectitude, if the retrospection is thickly set with those delicious scenes so sweet to gaze upon when evening falls, there will come to his ears no mournful measures of sadness, but the inspiring music of better things "beyond the sunset's radiant glow." Spring indeed is glorious, but autumn is sublime. "We all shall fade as a leaf," but under and surviving the faded leaf is the golden fruit.

November 11

What means the playing of bands, the fluttering of flags, the screeching of whistles, the singing, the dancing, and the people in holiday attire? It isn't a time to work; it isn't a time to think of trade or gain. The day is too holy for such activities. It is a day to rejoice and be glad. Eleven years ago today the Kaiser's dream of world conquest was turned into the awful awakening that he was doomed to defeat. He threw away his helmet and his saber, untwisted his mustache, and sought a retreat in a foreign nook, there to spend his remaining days in loneliness and grief, with no one to do him honor and no minstrel to sing a requiem over his shattered dream. Today, like Napoleon at St. Helena, he sits in gloom. Eleven years have passed since the Kaiser's dream was shattered, and I find myself wondering what would have been Europe's fate if the Kaiser's submarine hadn't sent that American boat, which claimed its rights on the ocean, to the bottom of the sea. In my humble opinion the explosion of the boilers of that peaceful vessel sounded the call to arms which sent the haughty ruler into an exile that only death can break.

Distance Increases Wealth

Distance adds to the wealth of the family into which the neighbor girl or boy marries as materially as it lends enchantment to the view. We hear of the great wealth the home girl or home boy acquires by a matrimonial alliance in a distant city and marvel that Cupid should have steered her or him against so much gold. The first report is that the home girl or boy has married into a family worth a hundred thousand dollars, but with much telling the wealth soon increases to several million. By and by we learn more of the family's financial standing, and the fortune begins to dwindle. After a few months some one from the home town visits in the town in which the father of the bridegroom or bride lives and learns that he is hard-pushed to meet his grocery bills. And the last sad chapter is presented when the old folks, no longer successful in standing off the grocer, come to live with their son and daughter-in-law or daughter and son-in-law.

Sherman's March to the Sea.

November 15 marks the 64th anniversary of the beginning of Sherman's famous march to the sea, for it was Nov. 15, sixty-four years ago, that this last exploit of the Union army before the surrender of General Lee began. The march is a chapter in the Civil War, and inspired the well-known war song, "Marching Through Georgia." With about sixty thousand troops General Sherman left Atlanta on the date here-mentioned. The march proved what the Union forces suspected, that the South was impoverished and could not continue the war long. For about one month nothing was known of the doings of Sherman's army, no report having reached headquarters until the army reached Savannah. Writing from the field near Savannah December 15, General Sherman made the following report of the triumphant march: "We came right along, living on turkeys, chickens, pigs, bringing along our wagons loaded with bread, etc. I suppose Jeff Davis will now have to feed the people of Georgia instead of collecting provisions of them to feed his armies. We destroyed nearly two hundred miles of railroad and are not yet done. We have lived sumptuously on turkeys, chickens, pigs and sweet potatoes all the way, but the poor women and children will starve."

Table Manners

Desiring culture, and especially table manners, I was easy prey to a good-looking woman agent who came through not long since selling a book entitled "Culture and Manners." For my money, and my short chat with the pretty agent, I gained the information that one should eat peas with a fork, and never with a spoon; that a napkin should be fully opened and never used half-folded; that one should always send his knife and fork with his plate for a second helping, and that in crossing the street with a lady a man should offer his arm instead of taking hers. My money was worse than wasted. As a conveyor of peas to the mouth a spoon is 75 per cent more efficient than a fork, since a spoon holds more and the smaller peas fall between the prongs of a fork. If all our people should eat their peas with a fork, enough time would soon be lost to bankrupt the nation. Personally I would as soon undertake to drink water from a sifter. When sending your plate back for a second helping it is decidedly better to keep the knife and fork to play with; furthermore, it makes more room for a third helping.

Repairing Human Frames

There are grounds upon which to base the hope that repairers of human frames will finally become so expert in their noble profession that they will be able to keep man up and going for at

least a thousand years. Out of a New York repair factory recently went a man with a new nose; another who had been blind for years had his eye-sight restored by grafting the eye of a rabbit to his optic nerve, and still another went away without any stomach at all, and is working right along and getting fat. It has been ascertained that many of the organs of sheep, rabbits and pigs will work as well in man as in their original positions, and it seems foolish for man to give up the ghost on account of defective organs when he can get new ones by applying to his friends, the sheep, the rabbits and the pigs. The shifting of the organs is nearly as simple as putting new spokes in a wheel, so the surgeons say.

Another War Cloud

Soviet Russia and benighted China have been making ugly faces at each other and displaying bellicose proclivities upon each other's border for some time, and I am moved to predict that ere many moons wax and wane the doors of Janus temple will again be thrown wide open and grim-visaged war will go stalking through the Orient. These countries have trouble over a railroad and it seems that the dispute will have to be settled with cannons and bayonets. Quite likely some of Russia and China's plowshares and pruning hooks, which are so badly needed, will have to be moulded into swords and guns. War is as strongly entrenched in the hearts of nations today as when the wandering tribes of ancient Gaul fought and died for possession of Europe's primal forests. This reminds us that the great novelist, Victor Hugo, was a very poor prophet. "In the twentieth century," said Mr. Hugo, "war will be dead, royalty will be dead and dogmas will be dead." As a novelist Mr. Hugo stood at the head, and as a poet he took high rank, but as a prophet he was a miserable failure. The twentieth century has been with us some time; it has already witnessed the world's greatest war and has other wars in prospect. Royalty is not dead and dogma has not been shaken a little bit.

One of my neighbors who is plodding along in the sixties, says the greatest family row he ever witnessed took place in his home when his grown daughter went to town bare-legged. But this neighbor forgets. I happen to know there was a bigger row in his father's family forty-odd years ago when his sister, Ellen, rode to Sunday school at Cross Roads church in a hug-me-tight buggy with a young man.

If there were a town on earth where every man paid cash for what he bought, and every woman kept her hens out of her neighbor's garden and flower beds, and every youth showed proper respect for age—but come to think of it,

it wouldn't do to have such a town on earth. It would approach so nearly the New Jerusalem that only trained angels could distinguish between the two places and there would be a great mix-up.

Since winter is only a few weeks in the distance, I feel it a duty to state that people will have colds the coming winter as usual. I desire to add to this unwelcome statement that I know a remedy that will cure your cold, and am confident that you know a remedy that will cure my cold. So why worry?

I am sure I correctly diagnosed the trouble when I said our long season of hard times was due to the purchase of so many automobiles and so much gasoline, but it makes me mad as thunder when a fellow exhibits the bank statements of thirty years ago showing deposits 50 per cent below the deposits of today. There wasn't an auto or a filling station in the country thirty years ago, but nevertheless I know the autos and gasoline ruined the country.

The nation needs a few more laws. There should be a law providing for the hanging and burning of hot-check writers, there should be a law sending dare-devil auto drivers to the pen for life, and we certainly need a law making it easy to put officers who do not enforce the law out of office. But here's the trouble: If we get the needed laws we will also get several new bureaus, with managers, traveling agents, clerks and stenographers for each. So perhaps we had better jog along and do the best we can without the laws.

Building castles in the air is the most satisfactory building one can engage in these days. You don't have to worry with organized labor, you don't have to run after the plumber or wait for the tinner, neither do you have to lie to the tax assessor or run from the tax collector.

I can't help wondering what the result would be if all the automobile tires in the country should burst at the same time. It seems that we already have all the air there is space for, and if all the air now shut up in the auto tires should be released at the same time there would be an awful explosion, and perhaps so much pressure that all of us would be pressed flat.

Times, customs and tastes change. When the writer was young, people believed pure hog lard the only "short-enin'" that was fit to use. The good housewives turned up their noses if the lard was contaminated to the slightest degree with vegetable oils or fats and threw the awful stuff away. Now the grocers tell me that pure hog lard is as unsalable as celluloid collars.

ABSENTMINDEDNESS---the Cause of Much Embarrassment

By JOE SAPPINGTON

(Copyright, 1929, by the Home Color Print Co.)

EVERY adult person at some time in his or her life, has had lapses of memory, commonly known as absentmindedness. There are many phases of the ailment and it is often the cause of deep humiliation and embarrassment.

I once lived neighbor to a man of more than ordinary intelligence, who did some amusing things while under the spell of this peculiar malady. I saw him climb over a high picket fence with an armful of bundles within five feet of an open gate. He kept his nose skinned walking against walls, door facings and other hard unyielding objects in broad daylight. He was almost as absentminded as the old fellow who boiled his watch instead of the egg.

Absentmindedness causes some folks to talk to themselves in a loud tone of voice. "I'll call you. Can you beat two aces and three kings?" proclaimed John Hadley while sitting by his wife in church just after dropping a nickel in an usher's hat that was being passed for the evening's offering. His wife went with him to the preacher and made him apologize for his strange conduct. But the preacher was a good scout, patted John on the shoulder and told him it was all right, that when a young man he had played poker and knew how very absorbing the game was.

That was the first intimation the wife had that her husband played cards and she proceeded to bless him out all the way home

Misplacing Things

Misplacing things is one of the most usual manifestations of absentmindedness. Losing or misplacing railway tickets has been the cause of much embarrassment to conductors and the traveling public from time immemorial.

"She carried a satchel of ancient vintage"

Many years ago I witnessed the discomfiture and embarrassment of an old lady who occupied a seat next to me, when the conductor came through taking up tickets. She carried a satchel of ancient vintage with many compartments therein and her ticket was supposed to be in one of these. The conductor ran true to form and showed his impatience and lack of breeding by blurting out, "Ticket, ticket, lady," which put the old woman to scratching and fumbling in her satchel in a mad effort to find the ticket. "Hurry up! Hurry up! I can't wait here all day," the conductor insisted. All the time the poor old soul was scratching the insides out of that old heirloom. I finally came to her rescue by giving him a stony stare, at the same time remarking, "You see, sir, she is agitated and greatly upset for the moment. If you will call upon your return doubtless she will have found the ticket. If she has not I will be personally responsible for it, sir." I spoke very loud, so all passengers near me could hear, and felt like a conquering hero.

"All right, sir, give me your ticket and be in a hurry about it." Yea gods! I had forgotten about my own fare and began a frantic search for my ticket. I felt in my coat, vest and britches pockets, but no ticket was forthcoming.

"Hurry up and get your ticket," was the loud command from the ticket puncher. Cold chills waltzed up and down my spine as I scratched and fumbled in my pockets.

A Scratching Match

Finally, the old lady and I resolved ourselves into a scratching match—she scratching in her satchel and I in my pockets. To add to my discomfiture, four or five smartalecks started betting on the outcome of the contest. The ones backing me lost, since the old sister got through about ten second before I did by scratching into the bosom of her alpaca and bringing to light another satchel which contained her ticket. While the conductor was punching it I looked in my hat and found mine nesting under the sweat band where I had placed it for safe-keeping.

All my life I have had trouble finding my clothes in the dark, which has caused me to miss some of the best fires that ever took place in my town. Nothing is more exasperating to a high-strung man than to be awakened from a sound sleep by the wild clanging of firebells and then not be able to find enough clothes to join the excited throngs that rush by, shooting their guns and yelling FIRE! FIRE! FIRE! I have spent at least 48 hours of my young life galloping around on all-fours to the clangorous music of fire bells, in a mad effort to find enough togs to appear before a mixed audience in the dark, all on account of being absent-minded.

Political Speech Ruined

Absentmindedness caused Jim Bevins a lot of embarrassment and humiliation the time he tried to make a political speech at a picnic.

Jim was running for justice of the peace on the Populist ticket and had prepared a speech extolling the virtues of his party and laying bare the iniqui-

ties and intrigues of Democrats in both State and nation. "I want to read some of their doings in Congress, and show their record on banking, the tariff and how they have been secretly dealing with the plutocrats and the money powers of old England and robbing the 'pore' people of this kentry." At the conclusion of these caustic remarks he began scratching for the papers. He felt in all his pockets, including the rear pockets of his jeans trousers, but found nothing that remotely bore upon the subject in hand. He finally called for time and dashed out to his mule and searched his saddle pockets, but found nothing derogatory to the Democratic party. The crowd laughed itself hoarse at Jim's discomfiture, one fellow yelling at him to look under his saddle for the papers. Jim finally mounted his mule, shook his fists at the assembled Democrats and rode away.

It was another case of absentmindedness. He had left his papers at home.

Then there is the absentminded person who habitually loses his or her spectacles only to be humiliated by "finding" the eye-glass resting on the nose. And a friend, whom I respect highly for his intelligence and learning, will sometimes fuss around looking for his hat while all the time the "lost" hat sets snugly on his head.

AUTO REGISTRATION INCREASES OVER LAST YEAR

Automobile registration in each county in Texas for the first six months of 1929 was recently completed by the State Highway Department. Registrations this year have made a substantial increase over last year, the total for the first six months of 1929 being 1,183,969.

Harris county, with 79,969, has the largest number of autos, and Dallas, with 72,363 autos, is second.

LAST SURVIVOR OF MEXICAN WAR DEAD

Owen T. Edgar, the last United States survivor of the war between the United States and Mexico, died a few weeks ago in Washington, D. C. Mr. Edgar was 99 years old. He was only 15 years old when he enlisted at Philadelphia, his birthplace, in 1846. During the war he served on the frigates Potomac and Allegheny. He took part in the battle of Vera Cruz and marched with General Winfield Scott in the attack on Mexico City.

In 1850 Mr. Edgar left the navy and made his home in Washington, where he was connected with the Bureau of Engraving and Printing for many years. Germs of tropical fever incurred in Mexico prevented him from serving in the Civil War.

Still clear in Mr. Edgar's memory a short time before his death was the Mexican campaign—the slow voyage to Vera Cruz, battles against scurvy, smallpox, cockroaches; diet of salt horse, hardtack, smelly cask water; heavy northerners sweeping the seas; advancing over ghastly stretches of desert, bearing sacks and rifles much heavier than present-day equipment, the soldiers' feet tortured by cowhide boots as hard as iron; burning sand, yellow-jack, deserted adobe villages, lack of food, the heights of Chapultepec, then victory.

ECTOR COUNTY TO HIRE COYOTE TRAPPER

Employing a member of the State Biological Research Department force to rid that region of the coyotes that have recently become a nuisance, has been approved by the Commissioners' of Ector county. The county will pay half of the salary and the State pays the rest for a man who will spend his time the year around trapping and killing coyotes.

TEXAS BRIEF NEWS

FROM OVER
THE STATE

WORK ON PECOS POWER PLANT

Work is in progress on the \$250,000 addition to the Texas-Louisiana power plant at Midland and will be completed by January 1. A 2,500 horse power engine will be installed.

SEVEN MILES OF PAVING AT CROCKETT

Crockett now has in progress a paving program of business and residence streets which, when completed, will give the town seven miles of brick and concrete paving.

OKLAHOMA-DALLAS HIGHWAY CONTRACT LET

Contract for bridges and drainage work on the Louisville gap of the highway between Dallas and Oklahoma City has been let and work is to start right away.

NEW BRIDGE OPENED TO TRAFFIC

The new bridge over the Sabine River at Gladewater has been opened to traffic. The bridge is of steel and concrete and is over 400 feet long. It was built at an expense of \$83,000.

UPTON COUNTY SITE RETAINED BY RANKIN

Rankin remains the county site of Upton county. At a special election held recently on a proposal to remove the county site to McKamey there were 376 for removal and 442 against.

REPUBLICANS TO HAVE PRIMARY

The Republican party of Texas will hold a primary election for the nomination of candidates next July. The 1930 primary will be the second the Texas Republicans have held, their first one having been held in 1926.

THREE SISTERS CLASSMATES

Three sisters are members of the Freshmen class at Baylor College, Belton. The sisters are Misses Ruby, Jewel and Lois Webb, of Lamesa. Misses Ruby and Jewel are twins and are 17. Miss Lois is 15. All were graduated in June from the Lamesa High School.

NEW COURT HOUSE FOR MIDLAND

Bonds were recently voted for the construction of a combined court house and jail at Midland. The new structure will cost \$295,000 and the building will be in architectural harmony with the two office buildings, hotel and hospital recently erected in the same vicinity.

AIRPORT AT TEXARKANA

The airport at Texarkana was recently opened. The airport is about three miles from the city and represents an investment of about \$50,000. The field has 190 acres and is said to be one of the most favorably situated in the country.

GOVERNMENT PURCHASES SITE OF DICK DOWLING FORT

The Federal government has purchased about eleven acres of land at Sabine Pass, including the site of the historic Dick Dowling Fort, from the Union Sulphur Company, New York, and will erect a quarantine station at a cost of \$375,000.

CONGRESSMAN TO RETIRE

Hon. Claude Hudspeth, congressman from the El Paso district, has announced that he will retire from Congress at the close of his present term. He takes this step on the advice of his physicians. Mr. Hudspeth has been in public life 28 years, having served in the State Senate before his election to Congress. There are already several applicants for the place held by Mr. Hudspeth.

JACKSONVILLE MILK PLANT IN OPERATION

The Jacksonville Concentration plant, serving Cherokee county and adjoining communities for the Tyler Milk Products Company, was opened for business recently and began buying milk to be shipped by truck to the Tyler plant.

Milk received by the Jacksonville Concentration plant, which cost upwards of \$20,000, will be stored there as it is received, kept cool and transferred daily by large glass-lined trucks to the Tyler plant.

PRICES IN TEXAS IN 1840

From a copy of the Morning Star, printed in Houston and bearing date of 1840, the following items regarding prices of commodities was taken. The Morning Star, by the way, was the first daily paper printed in Texas, the first issue making its appearance April 8, 1839. Prices were quoted on the market page as follows:

Butter, from 75 to 90 cents a pound; corn, from \$2.75 to \$3.00 per bushel; lard, 35 cents a pound; nails, 18 to 19 cents a pound; salt, \$6.00 to \$7.00 a barrel; rectified whiskey, \$1.75 to \$2.00 per gallon.

IMPROVEMENTS ON HIGHWAYS 1 AND 9

The Howard County Commissioners' Court is expected shortly to call an election on a \$900,000 bond issue for improvement of highways Nos. 1 and 9. Highway No. 1 is the Bankhead running east and west through the county. The other thoroughfare connects Big Spring, county seat of Howard county, with Lamesa on the northwest and Sterling City on the southwest.

NEW DORMITORIES FOR UNIVERSITY OF TEXAS

The Board of Regents of the University of Texas have announced that plans have been perfected for the erection of eight buildings on the University grounds. Seven of the buildings will be dormitories and one a large dining hall and recreation building. The approximate cost of the building will be \$1,500,000. The dormitories will be self-financing.

FASTED 41 DAYS TO CURE ECZEMA

D. B. Harrison, of Chambers county, was afflicted with eczema of the scalp, which did not yield to treatment. He concluded to try fasting for the troublesome malady and says he fasted 41 days, during which time he ate no solid food and took nothing into his stomach except a little lemonade and soda water. He says the disease disappeared entirely before the end of his fast.

TO BUY LLANO SCHOOL LAND

The Commissioners' Court of Llano county has accepted the proposal of Cecil Taylor, acting for himself and Henshaw & Henshaw, of San Antonio, for the purchase of 17,712 acres of Llano county school land, located in Tom Green county. The bidder proposes to pay \$20 per acre for the land.

The contract entered into between Llano county and Taylor provides that the acceptance or refusal of the proposition be submitted to the voters of the county in the form of a referendum.

MOUNT CALM TO HAVE REFINERY

Construction of an oil refinery at Mount Calm, Hill county, to assure an outlet for the community's production is announced.

The refinery will have a 500-barrel capacity and will be so built that additional units may be added as required. It is to be built through the co-operation of the Commercial Club and R. C. Poole, cashier of the First National Bank there, who raised the money for the site, and L. D. Mitchell and associates of San Antonio.

The site of the refinery adjoins the right of way of the Cotton Belt Railway about one quarter of a mile from the center of the town and within half a mile of the producing wells.

Oil wells in the Mount Calm territory are reported to be producing 125 barrels daily now. Within a few weeks new wells are expected to be in operation.

FIGHTING MINISTER REBURIED

The body of Rev. James C. Wilson, a veteran of the Mier expedition to Mexico in 1842, a State senator and for whom a county in Texas is named, was removed from an unmarked grave five miles from Gonzales, and reburied in the State Cemetery at Austin recently. Born in Yorkshire, England, in 1818, Mr. Wilson settled in Brazoria county in 1837.

After serving under General Alexander Somervell and capturing Laredo for the Texans, he joined Colonel William S. Fisher's company and participated in the siege of Mier. He was captured by the Mexicans in that battle, and after being driven to the castle of Perote, on the road from Mexico City and Vera Cruz, he was offered his freedom if he would claim English citizenship, but refused, saying he owed his allegiance to Texas. He finally escaped.

Mr. Wilson served in the Texas Legislature from the Matagorda district after Statehood, and at the end of his term renounced politics and became a Methodist minister. He died in 1861.

PLAN CONFEDERATE MONUMENT AT WACO

Mary West Chapter, United Daughters of the Confederacy, has announced a drive for \$25,000 memorial to be erected for Confederate veterans by the chapter.

The lawn of the new city hall, contract for which has already been awarded, is being considered, permission already having been granted to use this site.

FORT SAM HOUSTON

Fort Sam Houston, San Antonio, is one of the largest military posts maintained by the United States. It has 12,000 officers and men in its area and, at the average cost of \$1,100 for each soldier's upkeep, the total receipts from that source are more than \$13,000,000 a year, exclusive of civilian employees and additional capital investments. The federal military plant at San Antonio, including flying fields and target ranges, is of an estimated value of \$26,831,326.

FIRST NEWSPAPER IN TEXAS

The first newspaper in Texas, of which any information is available, was the Texas Republican, which made its first appearance at Nacogdoches in August, 1818. Only a few issues of the paper were printed. The paper was established by General James Long, and was edited by Horatio Bigelow and Eli Harris. The next newspaper printed in Texas was the "Texas Gazette," published at San Felipe, de Austin, which was at that time the capital of Stephen F. Austin's colony. The Gazette was edited and published by Godwin Brown Cotten, and the first issue was dated September 25, 1829. Copies of most of the issues of this paper are on file in the library of the University of Texas.

NAMES OF TEXAS HEROES LISTED

The names of 749 members of the two Texas divisions who were killed in the World War and are buried in Europe, together with other data about the Texas organizations, was inserted in the Congressional Record at the request of Senator Morris Sheppard. The statement also shows the organization to which these soldiers belonged, the places of burial, and later will be accompanied by the Texas addresses of these soldiers.

This list, prepared by the Secretary of War, does not include the names of Texas soldiers whose bodies were returned to the United States for burial. The secretary's summary tells the part the troops played in the great conflict and where each unit was engaged. The Thirty-Sixth Division, which was the Texas National Guard organization, trained at Camp Bowie, participated in the St. Mihiel and Meuse-Argonne offensive and the battle casualties were 591 killed and 1,993 wounded.

The Ninetieth Division was composed of drafted men from Texas and Oklahoma, trained at Camp Travis. These units participated in the Villers-En-Haye offensive sector (Lorraine) St. Mihiel offensive, Puvellie offensive sector (Lorraine) and Meuse-Argonne offensive, with a total of 1,496 killed and 6,053 wounded.

The number of individuals who gave Texas as their residences on entering the military service, exclusive of the navy and marine corps, was 169,776.

WEEVIL-PROOF PEA PLANT AT ATHENS

It was in Athens that the plan of taking steps to keep the weevil out of the peas originated, the method being originated by J. B. Henry, of that place. The idea of thus saving peas from weevil infestation after they had been gathered occurred to Mr. Henry nearly 30 years ago, when he found himself with ten cars of peas on his hand, for which there was no market at the time. He took some of the peas home with him and roasted or parched them in the oven of a stove, thus making them weevil-proof. Seeing that the plan was successful, he installed a pea-roasting or parching plant in Athens.

The product of the plant will be about 30 cars this year, most of the peas parched and made ready for shipment being grown in Henderson county. The growers realize approximately \$2,000 a car.

BIG ENDOWMENT IN SIGHT FOR UNIVERSITY

Oil produced from small nooks of the "2,000,000-acre campus" of University of Texas in the western part of the State is accumulating a royalty fund which eventually, it is believed, will give the school the greatest financial endowment of any institution of learning in the United States. This reserve, being invested in bonds from which only the interest can be used, had totaled \$12,207,650 up to September 1, representing one-eighth of the production from University lands in a little more than six years.

Four pools in three counties, Reagan, Crane and Pecos, are on part of the great domain which the founders of the Lone Star State wisely set aside for support of "an institution of higher learning of the first class, but the wealth being skimmed from the golden flow of hundreds of wells already no doubt has surpassed the dreams of any of Texas' founders. One pool, the Taylor-Link, south of Garvin, in Pecos county, is so recent that up to September 1 the University had received no royalty from its gushers. Many other fields besides these four are near University property and the distribution of the 2,000,000 acres in 17 counties is so great that possibilities of income from future oil strikes is almost unlimited in West Texas. Permian Basin having established itself as one of the world's greatest petroleum reservoirs.

University oil royalties in August amounted to \$171,401.47, an increase roundly of \$15,000 over the corresponding month last year, this despite the fact that the oil industry just now is emerging from a period of depression attributed to overproduction. Oil royalties within a year have become the biggest item in the endowment of the University of Texas, which on September 1 stood at \$32,500,000. Lands are valued at \$10,800,000, the plant at \$8,500,000, and there is a trust endowment of \$1,000,000. This figure is exceeded by the endowment of only four institutions of higher learning in the United States, being Harvard, \$69,000,000, Columbia University, \$60,000,000, Yale \$41,000,000, and the University of Chicago \$35,000,000.

TEXAS' GAIN IN MANUFACTURING

Manufacturing plants in Texas turned out products during 1927 valued at \$1,306,579,962, as reported by the United States Department of Commerce.

This was an appreciable increase over the value of production of former years, and is rapidly bringing Texas as to a high position as a manufacturing State.

For the same year 4,065 manufacturing establishments reported the employment of 110,763 workers, to whom they paid a total of \$842,927,286.

By reason of the oil refining industry, Jefferson county leads the State with a production valued at \$266,255,845. Harris county took next rank with \$232,993,922, but showed a greater increase value compared with the cost of materials. The value of Harris county's products was \$170,000,000 - greater than the cost of raw material, while in the case of Jefferson county it was but \$44,000,000.

COST OF NATURAL GAS AT WELL

The natural gas production of Texas in 1928 amounted to 301,990,000,000 cubic feet, which averaged a value at the well of 3.4 per 1,000 feet. The average value at point of consumption, however, was 17 cents per 1,000 cubic feet, according to a statement issued by the United States Bureau of Mines.

The report shows that there are 420,000 domestic consumers of natural gas in Texas, who consume during the year 27,284,000,000 cubic feet, the average value of which was 67.1 per 1,000 cubic feet. The industrial gas consumption in the State during the year amounted to 291,434,000,000 cubic feet.

MILK PLANT AT SULPHUR SPRINGS

The Southwest Dairy Products Company has acquired title to 55 acres of land on the Bankhead highway in the eastern edge of Sulphur Springs and has begun assembling material for the construction of a \$75,000 milk plant, according to the company's agent. Five acres adjacent to the highway will be used for the plant site, and the remaining 50 acres, extending north to the Cotton Belt track, will be used for a dairy demonstration farm. The company is now operating in Louisiana, Arkansas and Texas and the plant at Sulphur Springs will manufacture butter, ice cream mixture and condensed milk from whole milk.

NOTED INDIAN FIGHTER DEAD

Timothy J. Cude, 83 years old, one of the two survivors of the last Indian fight in Southwest Texas, died in San Antonio a few weeks ago and was buried in Live Oak county near the scene of many earlier triumphs over Texas hardships.

With the death of Mr. Cude only one man is left to tell the story of the last stand made by the Red men in Live Oak county in the last days of December, 1872. Mr. A. M. Tullos, Mr. Cude's companion on a hunting trip that ended in a pitched battle with the Indians, still lives at Beeville.

The last Indian fight in Southwest Texas occurred about 30 miles west of Oakville, on Turkey Creek. An account of this fight given by Mr. Cude two years ago shows a party of fifteen men arrayed against the Indians who first attacked the white men.

During the battle most of the Indians retreated under the fire of the men, but a squaw stood her ground and shot out the teeth of Sebastian Bell, one of the party of early settlers. Five scalps were taken from the Indians after they had been bested in the affray.

DENTON COUNTY MAN HAS FINE HEALTH RECORD

Wayne Roberson, one of the pioneer residents of Denton county, boasts a record of health equaled by few people. Mr. Roberson celebrated the 86th anniversary of his birth recently and is as spry as most men 40 years younger.

"I have never had a headache in my life," he said, "and have never had but two doctors give me medicine. I have never had a corn in my life, have never paid a fine and have never been in a lawsuit. I have never been arrested except when the Yankees captured me and kept me prisoner for many months during the Civil War."

Mr. Roberson lives near Little Elm, and resides on his farm, which is located within a half mile of where his father settled when he came to Texas from Arkansas in 1858.

Mr. Roberson was born near Independence, Ark., August 24, 1843, and came to Texas with his father's family and settled in Denton county in December, 1858.

When Texas entered the Confederacy Mr. Roberson joined at once, enlisting in Gano's cavalry squadron December 20, 1861.

Mr. Roberson engaged in numerous battles at Richmond, Ky., Perryville, Ky., Lebanon, Tenn., Murfreesboro, Tenn., Hartsville, Tenn., and Green River Fort and other points in Kentucky and Tennessee his company saw bitter fighting. He was with Morgan on his famous raid through Kentucky, Indiana and Ohio.

At Buffington Island, Ohio, July, 1863, Mr. Roberson with the major portion of his company was captured. He was sent to the Union prison at Chicago, where he was held for seventeen months. He was then exchanged, and on February 20, 1865, he started to Richmond, Va., where he re-entered service on March 2. After Lee surrendered in April, 1865, Mr. Roberson's regiment was disbanded and he then started to North Carolina to join Johnston's army.

"At Charlotte, N. C., I fell in with Jeff Davis and his cabinet and was an escort to the President of the Confederacy until he reached Abbeville, S. C. On the morning of May 6 I was again turned loose and at once started for home," said Mr. Roberson.

He walked most of the way to his home in Denton county and there took up work on his father's farm and ranch.

DAIRY FACTS

By J. W. RIDGWAY
Former Director of Dairy Department,
A. & M. College.

(Any subscriber of this newspaper who has a question to ask about his dairy cattle should write Mr. J. W. Ridgway and he will be glad to answer it free of cost. Address Box 1912, Fort Worth, Texas.)

Probably 80 to 85 per cent of the cows are freshened throughout this section in the spring of the year, this being the most natural time for parturition. However, it has been definitely proven that there is a decided advantage in breeding cows to freshen in the fall of the year rather than in the spring. Such advantages may be summarized as follows:

To begin with, a cow freshening in the fall is at the peak of her production throughout the months when her product will bring the highest market price. There is a difference of approximately eight to ten cents a pound in butterfat during the fall and winter months as compared with the spring and early summer months. This difference in price is brought about because of the over-production during the spring and summer months.

Secondly, it is a known fact that a cow freshening in the fall of the year will produce from 20 to 25 per cent more milk than a cow freshening in the spring. This condition is brought about owing to the fact that a cow for the first few months will produce heavily due to the stimulation of freshening. About the time that a cow is going off when freshening in the fall, there

is a second stimulant due to the early spring grasses, and what might be termed a second freshening period is the result. Records taken from the register of merit have proven definitely that fall freshening results in a much higher production. When a cow calves in early spring, after the first three or four months there is a natural depletion in milk production, coming at a time when there is usually drouthy conditions and short pastures. Thus the lactation period is considerably shortened as compared with fall freshening.

The third advantage in fall freshening is that calves can be raised to better advantage and at a much cheaper cost when dropped in the fall as compared with in the spring.

To begin with, when born in the fall of the year they are not troubled when very young by flies and hot weather, which is a great menace to the successful rearing of calves.

Again when born in the fall, at the time they are ready to go to pasture, which is from five to six months after birth, there is an abundance of pasturage coming on in the spring. However when born in the spring they suffer from the heat of the summer at a young and tender age, and in addition, at the time they are ready to go to pasture they come into the winter months.

WORK ON PECOS POWER PLANT

Work is in progress on the \$250,000 addition to the Texas-Louisiana power plant at Midland and will be completed by January 1. A 2,500 horse power engine will be installed.

SEVEN MILES OF PAVING AT CROCKETT

Crockett now has in progress a paving program of business and residence streets which, when completed, will give the town seven miles of brick and concrete paving.

OKLAHOMA-DALLAS HIGHWAY CONTRACT LET

Contract for bridges and drainage work on the Louisville gap of the highway between Dallas and Oklahoma City has been let and work is to start right away.

NEW BRIDGE OPENED TO TRAFFIC

The new bridge over the Sabine River at Gladewater has been opened to traffic. The bridge is of steel and concrete and is over 400 feet long. It was built at an expense of \$83,000.

UPTON COUNTY SITE RETAINED BY RANKIN

Rankin remains the county site of Upton county. At a special election held recently on a proposal to remove the county site to McCaney there were 376 for removal and 442 against.

REPUBLICANS TO HAVE PRIMARY

The Republican party of Texas will hold a primary election for the nomination of candidates next July. The 1930 primary will be the second the Texas Republicans have held, their first one having been held in 1926.

THREE SISTERS CLASSMATES

Three sisters are members of the Freshmen class at Baylor College, Belton. The sisters are Misses Ruby, Jewel and Lois Webb, of Lamesa. Misses Ruby and Jewel are twins and are 17. Miss Lois is 15. All were graduated in June from the Lamesa High School.

NEW COURT HOUSE FOR MIDLAND

Bonds were recently voted for the construction of a combined court house and jail at Midland. The new structure will cost \$295,000 and the building will be in architectural harmony with the two office buildings, hotel and hospital recently erected in the same vicinity.

AIRPORT AT TEXARKANA

The airport at Texarkana was recently opened. The airport is about three miles from the city and represents an investment of about \$50,000. The field has 190 acres and is said to be one of the most favorably situated in the country.

GOVERNMENT PURCHASES SITE OF DICK DOWLING FORT

The Federal government has purchased about eleven acres of land at Sabine Pass, including the site of the historic Dick Dowling Fort, from the Union Sulphur Company, New York, and will erect a quarantine station at a cost of \$375,000.

CONGRESSMAN TO RETIRE

Hon. Claude Hudspeth, congressman from the El Paso district, has announced that he will retire from Congress at the close of his present term. He takes this step on the advice of his physicians. Mr. Hudspeth has been in public life 28 years, having served in the State Senate before his election to Congress. There are already several applicants for the place held by Mr. Hudspeth.

JACKSONVILLE MILK PLANT IN OPERATION

The Jacksonville Concentration plant, serving Cherokee county and adjoining communities for the Tyler Milk Products Company, was opened for business recently and began buying milk to be shipped by truck to the Tyler plant.

Milk received by the Jacksonville Concentration plant, which cost upwards of \$20,000, will be stored there as it is received, kept cool and transferred daily by large glass-lined trucks to the Tyler plant.

PRICES IN TEXAS IN 1840

From a copy of the Morning Star, printed in Houston and bearing date of 1840, the following items regarding prices of commodities was taken. The Morning Star, by the way, was the first daily paper printed in Texas, the first issue making its appearance April 8, 1839. Prices were quoted on the market page as follows:

Butter, from 75 to 90 cents a pound; corn, from \$2.75 to \$3.00 per bushel; lard, 35 cents a pound; nails, 18 to 19 cents a pound; salt, \$6.00 to \$7.00 a barrel; rectified whiskey, \$1.75 to \$2.00 per gallon.

IMPROVEMENTS ON HIGHWAYS 1 AND 9

The Howard County Commissioners' Court is expected shortly to call an election on a \$900,000 bond issue for improvement of highways Nos. 1 and 9. Highway No. 1 is the Bankhead running east and west through the county. The other thoroughfare connects Big Spring, county seat of Howard county, with Lamesa on the northwest and Sterling City on the southwest.

NEW DORMITORIES FOR UNIVERSITY OF TEXAS

The Board of Regents of the University of Texas have announced that plans have been perfected for the erection of eight buildings on the University grounds. Seven of the buildings will be dormitories and one a large dining hall and recreation building. The approximate cost of the building will be \$1,500,000. The dormitories will be self-financing.

FASTED 41 DAYS TO CURE ECZEMA

D. B. Harrison, of Chambers county, was afflicted with eczema of the scalp, which did not yield to treatment. He concluded to try fasting for the troublesome malady and says he fasted 41 days, during which time he ate no solid food and took nothing into his stomach except a little lemonade and soda water. He says the disease disappeared entirely before the end of his fast.

TO BUY LLANO SCHOOL LAND

The Commissioners' Court of Llano county has accepted the proposal of Cecil Taylor, acting for himself and Henshaw & Henshaw, of San Antonio, for the purchase of 17,712 acres of Llano county school land, located in Tom Green county. The bidder proposes to pay \$20 per acre for the land.

The contract entered into between Llano county and Taylor provides that the acceptance or refusal of the proposition be submitted to the voters of the county in the form of a referendum.

MOUNT CALM TO HAVE REFINERY

Construction of an oil refinery at Mount Calm, Hill county, to assure an outlet for the community's production is announced.

The refinery will have a 500-barrel capacity and will be so built that additional units may be added as required. It is to be built through the co-operation of the Commercial Club and R. C. Poole, cashier of the First National Bank there, who raised the money for the site, and L. D. Mitchell and associates of San Antonio.

The site of the refinery adjoins the right of way of the Cotton Belt Railway about one quarter of a mile from the center of the town and within half a mile of the producing wells.

Oil wells in the Mount Calm territory are reported to be producing 125 barrels daily now. Within a few weeks new wells are expected to be in operation.

FIGHTING MINISTER REBURIED

The body of Rev. James C. Wilson, a veteran of the Mier expedition to Mexico in 1842, a State senator and for whom a county in Texas is named, was removed from an unmarked grave five miles from Gonzales, and reburied in the State Cemetery at Austin recently. Born in Yorkshire, England, in 1818, Mr. Wilson settled in Brazoria county in 1837.

After serving under General Alexander Somervell and capturing Laredo for the Texans, he joined Colonel William S. Fisher's company and participated in the siege of Mier. He was captured by the Mexicans in that battle, and after being driven to the castle of Perote, on the road from Mexico City and Vera Cruz, he was offered his freedom if he would claim English citizenship, but refused, saying he owed his allegiance to Texas. He finally escaped.

Mr. Wilson served in the Texas Legislature from the Matagorda district after Statehood, and at the end of his term renounced politics and became a Methodist minister. He died in 1861.

PLAN CONFEDERATE MONUMENT AT WACO

Mary West Chapter, United Daughters of the Confederacy, has announced a drive for \$25,000 memorial to be erected for Confederate veterans by the chapter.

The lawn of the new city hall, contract for which has already been awarded, is being considered, permission already having been granted to use this site.

FORT SAM HOUSTON

Fort Sam Houston, San Antonio, is one of the largest military posts maintained by the United States. It has 12,000 officers and men in its area and, at the average cost of \$1,100 for each soldier's upkeep, the total receipts from that source are more than \$13,000,000 a year, exclusive of civilian employees and additional capital investments. The federal military plant at San Antonio, including flying fields and target ranges, is of an estimated value of \$26,831,326.

FIRST NEWSPAPER IN TEXAS

The first newspaper in Texas, of which any information is available, was the Texas Republican, which made its first appearance at Nacogdoches in August, 1818. Only a few issues of the paper were printed. The paper was established by General James Long, and was edited by Horatio Bigelow and Eli Harris. The next newspaper printed in Texas was the "Texas Gazette," published at San Felipe, de Austin, which was at that time the capital of Stephen F. Austin's colony. The Gazette was edited and published by Godwin Brown Cotten, and the first issue was dated September 25, 1829. Copies of most of the issues of this paper are on file in the library of the University of Texas.

NAMES OF TEXAS HEROES LISTED

The names of 749 members of the two Texas divisions who were killed in the World War and are buried in Europe, together with other data about the Texas organizations, was inserted in the Congressional Record at the request of Senator Morris Sheppard. The statement also shows the organization to which these soldiers belonged, the places of burial, and later will be accompanied by the Texas addresses of these soldiers.

This list, prepared by the Secretary of War, does not include the names of Texas soldiers whose bodies were returned to the United States for burial. The secretary's summary tells the part the troops played in the great conflict and where each unit was engaged. The Thirty-Sixth Division, which was the Texas Natural Guard organization, trained at Camp Bowie, participated in the St. Mihiel and Meuse-Argonne offensive and the battle casualties were 591 killed and 1,993 wounded.

The Ninetieth Division was composed of drafted men from Texas and Oklahoma, trained at Camp Travis. These units participated in the Villers-En-Haye offensive sector (Lorraine) St. Mihiel offensive, Puvellente offensive sector (Lorraine) and Meuse-Argonne offensive, with a total of 1,496 killed and 6,053 wounded.

The number of individuals who gave Texas as their residences on entering the military service, exclusive of the navy and marine corps, was 169,776.

WEEVIL-PROOF PEA PLANT AT ATHENS

It was in Athens that the plan of taking steps to keep the weevil out of the peas originated, the method being originated by J. B. Henry, of that place. He walked most of the way to his home in Denton county and there took up work on his father's farm and ranch.

DAIRY FACTS

By J. W. RIDGWAY

Former Director of Dairy Department, A. & M. College.

(Any subscriber of this newspaper who has a question to ask about his dairy cattle should write Mr. J. W. Ridgway and he will be glad to answer it free of cost. Address Box 1612, Fort Worth, Texas.)

Probably 80 to 85 per cent of the cows are freshened throughout this section in the spring of the year, this being the most natural time for parturition. However, it has been definitely proven that there is a decided advantage in breeding cows to freshen in the fall of the year rather than in the spring. Such advantages may be summarized as follows:

To begin with, a cow freshening in the fall is at the peak of her production throughout the months when her product will bring the highest market price. There is a difference of approximately eight to ten cents a pound in butterfat during the fall and winter months as compared with the spring and early summer months. This difference in price is brought about because of the over-production during the spring and summer months.

Secondly, it is a known fact that a cow freshening in the fall of the year will produce from 20 to 25 per cent more milk than a cow freshening in the spring. This condition is brought about owing to the fact that a cow for the first few months will produce heavily due to the stimulation of freshening. About the time that a cow is going off when freshening in the fall, there

is a second stimulant due to the early spring grasses, and what might be termed a second freshening period is the result. Records taken from the register of merit have proven definitely that fall freshening results in a much higher production. When a cow calves in early spring, after the first three or four months there is a natural depletion in milk production, coming at a time when there is usually drouthy conditions and short pasturage. Thus the lactation period is considerably shortened as compared with fall freshening.

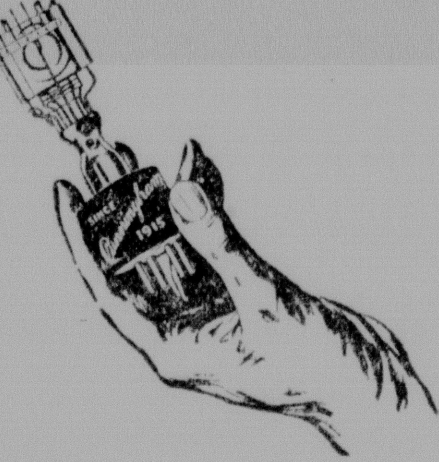

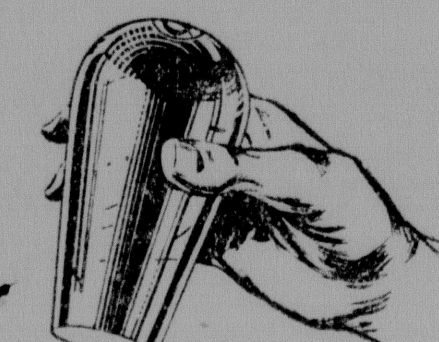

The third advantage in fall freshening is that calves can be raised to better advantage and at a much cheaper cost when dropped in the fall as compared with in the spring. To begin with, when born in the fall of the year they are not troubled when very young by flies and hot weather, which is a great menace to the successful rearing of calves.

Again when born in the fall, at the time they are ready to go to pasture, which is from five to six months after birth, there is an abundance of pasturage coming on in the spring. However when born in the spring they suffer from the heat of the summer at a young and tender age, and in addition, at the time they are ready to go to pasture they come into the winter months.

This briefly summarizes the three distinct advantages of fall freshening as compared with spring freshening.

A LITTLE FUN Jokes to Make You Laugh

Forehanded
Maud—What happened when your father told your sweetie he ought to put something aside for a rainy day?
Lois—Well, a little later dad missed his rain coat.

Short But to the Point
Teacher—"Now, Johnny, what stirring speech did Paul Revere make when he finished his immortal ride?"
Johnny—"He said 'Whoa!'"

California Optimism
New Yorker (incredulously): "And you mean to say that in California you have three hundred and sixty-five days of sunshine a year?"
The man from Los Angeles: "Exactly so, sir, and that's a mighty conservative estimate."

A Soft Answer's Effect
"You seem able bodied and healthy," she remarked coldly; "you ought to be strong enough to work for your meals."
"True enough, lady, he replied, "And you seem beautiful enough to be in the movies, but evidently you prefer the simple life."
The tramp got his dinner.

Fifty-Fifty
"Johnny," said his mother, severely, "some one has taken a big piece of ginger cake out of the pantry."
Johnny blushed guiltily.
"Oh, Johnny," she exclaimed, "I did not think it was in you."
"It ain't all," replied Johnny. "Part of it's in Elsie."

Home Training Helped
Chief of Police—"Did you give him the third degree?"
Sergeant—"Yes, we brow beat and badgered him with every question we could think of."
Chief—"And what did he do?"
Sergeant—"Why, he just dozed off and kept repeating, 'Yes, dear, yes dear, you are perfectly right!'"

Strategy in a Chicken House
Hens had been missing regularly from Ben Zoate's chicken house, so one night he kept watch and saw what looked like a large negro entering the small building. Ben trailed the man inside where he saw the figure crouched in front of a roost. The negro, hearing Ben approach, clasped his hands, dropped to his knees and exclaimed, piously:
"Good Lord, dis yere darkey can't go nowhere to pray any more 'thout being 'sturbed!'"

Rapid Calculating
"How much are yer fish, Mr. Goldstein?"
"Eight cents a pound, Mrs. O'Brien."
"I'll take two of them. How much will they be?"
"Let's see: Eight pounds—eight times eight are eighty-four. Take them for seventy-five cents, Mrs. O'Brien."
"Thank ye, Mr. Goldstein, I'll do that. Ye're always good to the Irish, I'll say that for ye."

The Jewish Soldier's Challenge
A Jewish soldier was doing guard duty. "Halt," he challenged. "Who goes there?"
"A friend," came the answer.
"Advance," said the soldier, "and give the discount."

A Snappy Retort
Angry Motorist: "Some of you pedestrians walk along as if you owned the streets."
Irate Pedestrian: "Yes, and some of you motorists drive about as if you owned the car!"

She Had the Right-of-Way
After the locomotive had smashed a flivver at the crossing, a flapper rose from the wreckage, uninjured, and powdered her nose. The engineer and others gathered around.
"Why in the world didn't you stop when you saw the train coming?" asked the engineer.
The flapper was indignant.
"I sounded my horn before you blew your whistle. Why didn't you stop?"

Lest We Forget
"Dear Clara," wrote the young man, "pardon me, but I'm getting so forgetful. I proposed to you last night, but really forgot whether you said yes or no."
"Dear Will," she replied by note, "so glad to hear from you. I know I said 'no' to someone last night, but I had forgotten who it was."

A Family Trait
At the annual prize day of a certain school, the head boy rose to give his recitation.
"Friends, Romans, countrymen," he vociferated, "lend me your ears!"
"There," commented the mother of a defeated pupil, sneeringly, "that's Mrs. Biggs' boy! He wouldn't be his mother's son if he didn't want to borrow something."

Patience in Business
Three boys entered a village confectionary. The rather gruff proprietor said to the first boy, "What do you want, my boy?"
"A dime's worth of bull's-eyes, please."
The old man climbed a ladder, brought down the jar that contained the bull's-eyes, made up the packet and returned the jar to the shelf. Then he asked the second boy what he wanted.
"A dime's worth of bull's-eyes please."
"Why didn't you say so before?" said the old man, irritably, as he went for the ladder again. "Do you want a dime's worth of bull's-eyes, too?" he demanded of the third boy.
"No," replied the third boy.
The old man climbed to the shelf again, brought down the jar, made up the second packet of bull's-eyes, restored the jar to the shelf, and once more put the ladder away.
"Well, my boy, what do you want?" he demanded of the third boy.
"A nickel's worth of bull's-eyes," came the answer.

POULTRY FACTS

BROILERS—THE NEW MEAT INDUSTRY

A new "industry" within an industry is with us—"Winter Broiler Production." Overnight, we find poultrymen producing thousands of broilers in the "dead" of winter.

A better understanding of the brooding necessities of chicks, a newer knowledge of feeding, and the advent of battery brooders to lower the brooding cost per chick, all have made this industry possible. Today we find some men specialists in this work—producing many thousands of broilers a year. The big broiler producer quite universally uses battery brooders, at least part of the way. The bulk of winter broilers, however, are produced in smaller batches of several thousand, by poultrymen who are utilizing at that season equipment that would ordinarily lie idle.

While there is yet much to learn about this industry, still in its infancy, there are a few definite fundamentals known to be vital for success with winter broilers.

The first of these is inherited vigor. A chick low in vitality as it hatches will die, no matter how you care for it—no matter how ideal conditions are—no matter what it is fed. Many chicks are hatched from early pullets that have molted and returned to laying again. If that pullet flock is run down, the chicks will wilt and die like flies, the first week. Prominent broiler men say that chicks from old hens stand out in vigor and in growth.

Rhode Island Reds and Barred Rocks are the popular winter broiler breeds, although there is no reason why any of the heavy varieties would not be suitable. Weights desired are two to two and a half pounds in heaves.

The next vital known fact is that brooding temperatures are quite clearly defined. Chicks that are moist and not fluffed out need a temperature of 98 to 100 degrees Fahrenheit in the compartment. Chicks that have dried off need a temperature of 95 degrees Fahrenheit. There can be little variation from the following schedule:

Age	Compartment Day	Temp. Night
1-3 days	95°-100°	95°-100°
End 1st week	92°-95°	95°-98°
End 2nd week	90°	92°
End 3rd week	85°	87°
End 4th week	80°	82°

(Room temperature average 5 degrees lower than above schedule.)

Room temperature in the heated room type of battery brooding should average 5 degrees lower than the compartment temperatures. Variations of 5 to 10 degrees from this schedule will lead into difficulties.

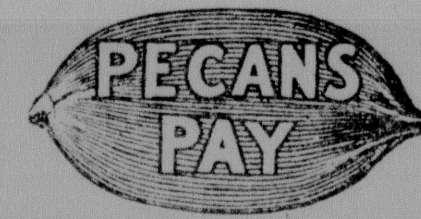

There are two distinct types of battery brooders. One type is to heat each compartment or each deck separately. The other type is to heat the entire room and keep the temperature uniform throughout by the use of fans. Drafts should be avoided at all times. The fans distributing the warm air should never blow directly on chicks. Upper decks can be kept warmer for young chicks by directing the warmest air on the general level of upper decks. Fresh air must be brought in and old air expelled without producing drafts.

Humidity must be considered along with temperatures. Warm air holds more moisture than cold air. In the winter, cold air from outside carries a certain amount of moisture. On bringing it inside and warming it up, the amount of moisture has remained the same, but the air has expanded and humidity is lowered. So, we find this warmed air dry, due to the higher temperature. Warm, dry air saps the vitality of chicks. To remedy this, have moisture available, so the warm air can pick it up.

A third vitally known fact is that it takes a good ration to get rapid uniform growth, uniform feathering, good pigment, and to keep the birds on their legs—especially in battery rearing. That is why any old ration thrown together will not do the work. Perfection in the balancing of rations is put to the extreme test—for the birds get only what is given them in the feed.

A commercial all mash feed, containing potent cod-liver oil, rich in vitamin D to protect battery raised chicks from rickets, is getting best results for many delving in this new phase of poultry meat production. An outstanding ration in this class contains wheat germ, corn germ meal, alfalfa leaf meal, dried buttermilk, corn meal, wheat middlings, linseed meal, meat scrap, bone meal, calcium carbonate, salt and cod liver oil. This shows the variety of nutrients that have been used to make this ration efficient at giving life, health, and finish to chicks under conditions so foreign to a chicken's inherited life and growth requirements.

Such a ration produced two to two and a fourth pounds growth in nine and a half to ten weeks. It grows them uniformly well-feathered and with good pigment.

Make Your Land Worth \$1,000 an Acre---

Book Showing You How is FREE

Books with photographs showing what you can do on your land with our better rooted paper-shell pecan trees. Make your land worth \$1,000 or more per acre in a few years. Cost \$10 to \$40 per acre.

TEXAS FARM NEWS

Alphonso Habarta, a county club boy of Brazos county, reports net returns of \$217.99 on 500 baby chicks from the first of January to the first of September. He sold 208 fliers for \$108.24, killed seven for home use, caponized five and selected ten cockerels for breeding purposes. He now has 249 pullets for layers. His total cost was \$154.25.

The world supply of wheat for the 1929-30 season is estimated at about 3,950,000,000 bushels, or about 360,000,000 bushels less than the supply for the previous season, by the Bureau of Agricultural Economics. The report says the world's production is considerably less than the world consumed last year. It is probable that Europe will take nearly as much wheat as last season.

Mr. Klossel, of Runnels county, found early fall plowing very helpful in this year's crop. He plowed his land six to seven inches twice last fall and harvested 75 bushels of oats to the acre this year. County agents over the State advise early deep fall plowing to increase the water-holding capacity of the land, and the plowing under of as much green crop and weed growth as possible.

A national market situation favorable to the sweet potato producers of the Southwestern States, combined with a smaller crop than last year, has resulted in considerably better prices for this commodity this year. Most of the crop has been sold at prices ranging from \$1 to \$1.50 per bushel, compared to 75 cents to \$1 last year. Trucks moved much of the crop from the eastern counties to West Texas.

In order to add impetus to the dairy movement now well under way in Smith county, and to provide farmers a means of obtaining a higher grade of dairy cattle, a County Cattle Finance Association has been effected and is under the management of experienced live stock men. More than forty of the leading business men of Tyler are joined in the association, which has already distributed many high-producing cows among the farmers of the county.

The avacados will eventually become one of the most profitable crops in the Rio Grande Valley, is the contention of Lon V. Hill, one of the Valley pioneers. Mr. Hill is preparing to plant a large acreage near Lavalita. The first unit of 1,000 avacado trees will be put out during the winter. Approximately three years have been devoted by Mr. Hill to the selection and propagation of the first 1,000 trees.

Splendid yields of Nortex oats and Denton wheat are reported from Jack county. The county agent reports that J. E. Francis, of the Ferrin community, made 53 bushels of Nortex oats per acre drilled in old cotton stalk land, while ordinary oats sowed on well-prepared land yielded only 35 bushels per acre. Where Nortex oats were drilled on well-prepared land the yield was correspondingly high. Fred Gildwell reports a yield of 29 1/2 bushels of Denton wheat per acre, where the variety he had been using yielded only 15 bushels under the same conditions. Denton is a soft winter wheat adapted to North Texas, and is an improved strain of Mediterranean.

A. E. Nelson, a dairyman of Taft, San Patricio county, says stock beets have nearly if not fully the value of ensilage as a bulky succulent feed to keep cows in condition in the hot summer months and to maintain their milk flow. He has been feeding the beets to his herd of thirty cows and intends planting them both in spring and fall each year. He says they yield about forty tons to the acre and will keep over summer in the ground.

Poultry experts say hens may catch cold, even in warm weather, if kept in poorly ventilated houses. The county agent of Nueces county reports that a flock of 250 white leghorn hens on a Mr. Shannon's farm in that county quit laying recently on account of colds. Lack of ventilation on one side of the poultry house was found to be the cause. When this was corrected and the hens dosed on salts and the drinking water disinfected the hens returned to 50 per cent egg production in a short time.

J. N. Raney, a dairyman of Madison county, finds that blood tells in milk cattle. He has two cows that look so much alike he can hardly tell one from the other, but there is a vast difference in the yield of milk and the profit therefrom. One is a registered cow he bought last year for \$175. She produces four gallons of milk a day, from which a profit of \$41.50 a month is obtained above the cost of feed. The other cow gives a gallon and a half of milk a day, from which a profit of only \$15 per month above the cost of feed is had. Both cows are fed a balanced ration and graze on a rich Bermuda grass pasture.

Farmers near Elgin who have heretofore made every possible effort to bid their land of Johnson grass, now welcome it, for it is proving splendid stock feed and is being baled and sold at good prices. This grass, when baled, is bringing the land owners from \$25 to \$30 per acre.

In spite of the dry weather, farmers around Pittsburg, Camp county, realized more than \$10,000 on their pea crop the past season. Most of the peas grown were of the cream and black-eyed varieties, though there were some whippoorwills. The yield was fairly satisfactory and the prices good.

The simplest and most effective means of ridding a poultry flock of lice and other parasites, according to the Farm Journal, is to paint the perches with a 40 per cent solution of nicotine sulphate just before the birds go to roost at night. The fumes arising will quickly kill the pests without injury to the fowls.

It still costs 20 cents a pound to raise cotton yielding from 100 to 140 pounds an acre, according to cost of production studies made by the Bureau of Agricultural Economics of the United States Department of Agriculture. The cost studies were made in representative cotton States for the crop of 1928. The figures are of great interest to Texas, where the ten-year average production is about 134 pounds of lint per acre and last season's was 138 pounds. For the whole South the yield per acre was 152.9 pounds. The crop last season sold for around 17 to 18 cents a pound, and the inevitable conclusion is that the farmer lost money on cotton. A third of a bale an acre costs 16 cents a pound, a half bale an acre only 13 cents a pound.

Mohair producers of Southwest Texas recently met at Uvalde and formed a Co-operative Market Corporation. The object is to standardize the mohair and goat industry that it may obtain the benefit of the Federal Agricultural Act.

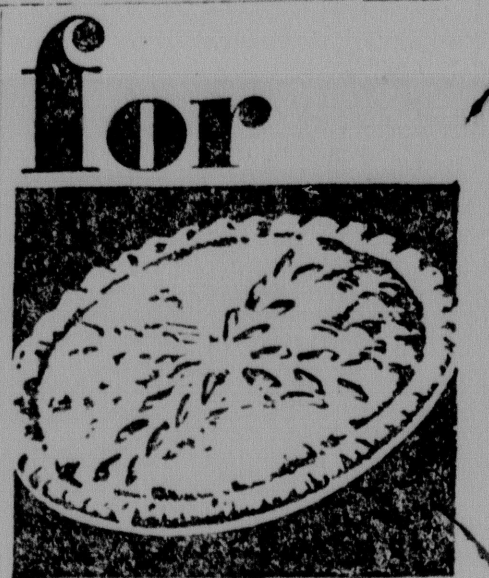

A well known authority on dairying says a good rule for determining the grain ration for a dairy cow is to give one pound of grain a day for every pound of butterfat produced in a week. Or, the grain mixture may be fed in the proportion of one pound to each three pints or pounds of milk produced daily. A cow producing 40 pounds or more should have a grain ration of one pound to each three and one-half or four pounds of milk.

The watermelon season in Parker county was one of the best known in the history of this crop. In addition to more than 500 cars sent out by rail, the heaviest truck shipments ever known have been made. Prices the first half of the season ranged from \$300 to \$400 a car, and \$150 to \$200 a car the latter part of the season. Many growers realized from \$100 to \$200 an acre, and a few yields of from \$250 to \$300 an acre are reported.

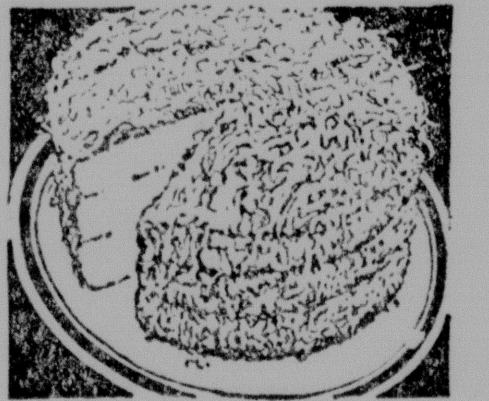

It pays handsomely to feed hens during the summer months, according to the records of 204 demonstration poultry flocks reported by county and home demonstration agents to the Extension Service of A. & M. College. Eggs were produced by some 30,000 hens in these flocks for 12 cents per dozen feed cost during June and July. The average number of eggs laid each month per hen was about fourteen, and the profit per hen above feed cost was a little more than 22 cents each of these months. The greatest gain will come, however, this fall and winter, for the well-fed hens will then be producing when eggs are high in price, whereas hens poorly fed last summer will probably defer their laying until spring.

Henderson county reports fine progress in crop diversification, which is bringing increased prosperity to the county. Brownboro, Poyner and Chandler combined shipped 169 cars of tomatoes this year, which netted the growers approximately \$900 per car. Athens alone shipped 125 cars of peaches this season, of an average of 420 bushels per car. The peaches brought the growers \$1.25 per bushel. Three hundred cars of watermelons were produced in the county, bringing the growers \$250 per car. The black-eyed and cream pea crop totaled about 60 cars, yielding the growers something like \$2,000 per car.

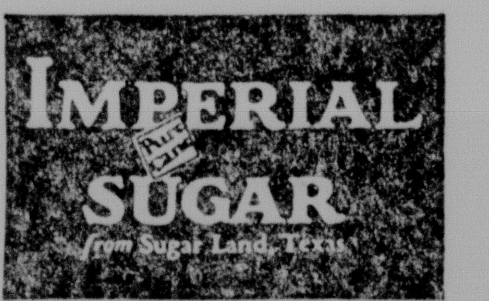

Farmers are drawing dividends on paper shell pecans gathered from native trees which were budded a few years ago to better varieties. C. D. Speece, of Clay county, reports that he has sold \$17,400 worth of improved pecans since 1925 from 145 acres which he began topping and budded in 1918. Two small trees budded in 1922 to Halberts produced five pounds of nuts each in 1924, and by 1928 this production had increased to 25 pounds per tree. A large tree budded in 1925 with 160 Halbert buds began bearing in 1927, and in 1928 yielded 50 pounds of nuts, which were sold for \$25. M. O. Patton, of San Saba county, says he has received more than \$200 from nuts sold from one tree with an 11-year-old Burkett top, which before working was practically worthless. L. J. Pipes, of near Cleburne, sold 4,000 pounds of improved pecans last year from 80 trees at an average of 40 cents a pound.

UNTIL now, radio reception has not kept pace with broadcasting.

Almost from the advent of radio the broadcasting stations have put the greatest artists on the air. But the means available to hear them in the home have been inadequate.

It has remained for Brunswick to design and build a set that would receive broadcasts without loss of quality—that would realize the dream of the radio industry which is "Studio Quality" Radio Reception—that would enable the listener-in to hear a program exactly as though he or she were in the studio from which it was being broadcast.

It is only natural that "Studio Quality" Radio Reception should be a Brunswick achievement. For Brunswick has spent many years and many millions perfecting the reproduction of music.

THE PROOF OF "STUDIO QUALITY" RADIO RECEPTION

Every Brunswick dealer can prove "Studio Quality" Radio Reception in his own store—demonstrating the Brunswick Radio to you as no other set can or will be demonstrated.

He will re-create for you a Broadcast made at 12:11 midnight, May 4th last, at the Studio of WABC, New York City.

You will hear this Broadcast just as though you had been in the Studio of Station WABC on that date. And, at the same time, you will hear the same program just as it was received through a stock model of the NEW Brunswick Radio. And so, for the first time, you can compare the pre-microphone studio performance of great artists with the work of these same artists as it sounds when received through the NEW Brunswick Radio.

TEXAS FARM NEWS

Alphonso Habarta, a county club boy of Brazos county, reports net returns of \$217.99 on 500 baby chicks from the first of January to the first of September. He sold 208 fliers for \$108.24, killed seven for home use, caponized five and selected ten cockerels for breeding purposes. He now has 249 pullets for layers. His total cost was \$154.25.

The world supply of wheat for the 1929-30 season is estimated at about 3,950,000,000 bushels, or about 360,000,000 bushels less than the supply for the previous season, by the Bureau of Agricultural Economics. The report says the world's production is considerably less than the world consumed last year. It is probable that Europe will take nearly as much wheat as last season.

Mr. Klossel, of Runnels county, found early fall plowing very helpful in this year's crop. He plowed his land six to seven inches twice last fall and harvested 75 bushels of oats to the acre this year. County agents over the State advise early deep fall plowing to increase the water-holding capacity of the land, and the plowing under of as much green crop and weed growth as possible.

A national market situation favorable to the sweet potato producers of the Southwestern States, combined with a smaller crop than last year, has resulted in considerably better prices for this commodity this year. Most of the crop has been sold at prices ranging from \$1 to \$1.50 per bushel, compared to 75 cents to \$1 last year. Trucks moved much of the crop from the eastern counties to West Texas.

In order to add impetus to the dairy movement now well under way in Smith county, and to provide farmers a means of obtaining a higher grade of dairy cattle, a County Cattle Finance Association has been effected and is under the management of experienced live stock men. More than forty of the leading business men of Tyler are joined in the association, which has already distributed many high-producing cows among the farmers of the county.

The avacados will eventually become one of the most profitable crops in the Rio Grande Valley, is the contention of Lon V. Hill, one of the Valley pioneers. Mr. Hill is preparing to plant a large acreage near Lavalita. The first unit of 1,000 avacado trees will be put out during the winter. NOVEMBER

November—the month of golden autumn tints and the first bleak days of winter! Some folk like spring better than fall, but I believe both are equally lovely. Spring is the awakening of life, when the tender young of mother nature put forth their smiling faces; fall is the fulfillment of mother nature's dream and the young are now her full grown children, glorious, yet radiant. Winter is somewhat the period of rest. With the human family it is the period for study, when we prepare ourselves for the coming of spring and the working season of summer, so that we may harvest in the fall.

SUNSHINE FOR SHUT-INS CLUB NEWS

This has been a rather slow month for club news. There were not so many applications for membership as in past months, due, I am sure, to the fact that there have been so many things to do. I hope November will be a banner month for applications. If you are not yet a member, read herewith the purposes of our club. Any reader of this page can join our happy band, known as the "Sunshine For Shut-Ins Club." Our motto is: "I Want to Bring Happiness to Others." We are trying to bring happiness to the unfortunate of this world by sending them a message of cheer through a letter, or a little gift, that should not cost more than ten cents. We have a list of Shut-Ins that are crippled, or confined to bed, or wheel chair, with some kind of affliction, or that are blind. Each month their names and addresses are printed on this page and each club member is assigned a Shut-In to whom he or she is to send sunshine. There are no fees or dues of any kind at any time, the club being free for all who want to bring happiness to others. Do you want to do this?

If you want to be a member of our club list in the membership coupon and mail to Aunt Mary, Box 1012, Fort Worth, Texas.

Club News

Here is a very encouraging letter and I wish I might have the pleasure of printing one like it every month. Doesn't this make you happy? Doesn't it make the club worth while?

Lola Hallman, Anson, Texas, writes this encouraging letter: "I am now out of bed and you may take my name from the Shut-In list. The little club has brought me more sunshine than I thought could be put into a club. I want to bring sunshine to others now that I am not a Shut-In, so please send me a membership card. Hoping that the other Shut-Ins are much improved and the club may have many years of success."

(We are very happy about your recovery, Lola, and so happy that we were able to brighten your dark days. We are glad to have you as a member now as you know the value of sunshine.)

Mathilda Oman, Anson, Texas, says: "I enjoy reading the poems and letters that are printed on the Boys and Girls page. I think the Sunshine Club is so nice that I wish to become a member. I am also sending in the names of two Shut-Ins."

The following letter gives one an idea of the sorrow and darkness that is all around us and shows where we can best spread sunshine:

"I've filled out the coupon and am sending it to you in this letter. I want to join your Shut-In Club, but I am not able to send a penny. I am a helpless wheel chair Shut-In. Never outside only as my invalid husband takes me out which, of course, is not often. We are very poor, have nothing except what may be given to us."

I shall be pleased to get letters, but can't answer unless stamp is enclosed. My husband is an invalid and I am helpless, so you see it is furnished for me to write unless stamp is furnished.

I have been a Shut-In 22 years. If I don't have to pay anything I shall be pleased to join your club. Please excuse this letter; I must be very saving with my writing paper, so must write on both sides of paper. A WHEELCHAIR SHUT-IN."

Aunt Susan, Galveston, Texas, wrote her usual lovely and cheerful letter. Her letters are a constant source of pleasure and encouragement for Aunt Mary and I hope she will long continue to spread much Sunshine and human understanding.

This month I received a rather unusual request and while we do not, as a rule, put anything on this page of direct personal appeal, yet I am sure this letter will meet with the approval of all the club members.

Mable Brown, Hamlin, Texas, one of our most cheerful Shut-Ins, sent Aunt Mary a little book entitled "A Shut-In Friend," which was written and compiled by herself. It is the story of her life and an appeal for more Christianity in this world. It is a very lovely little book and Aunt Mary certainly enjoyed reading it. Mable sells this little book for a very small sum and with the money she tries to bring sunshine to others who, like herself, must be indoors all day away from God's sunshine. Any reader of this page who would like to read her book will please communicate with Mable at the above address.

(Send us all the poetry you like Mable. I am sure all of us will enjoy reading it; and we will print as much of it as possible on this page.)

Exie Timpkins, Antlers, Okla., writes: "I wish you would thank the sunshine members who have written to me lately. I have not answered all my letters, but I enjoyed them everyone. I am sure they will not blame me for neglecting to write them because I have been so upset about the loss of my dear sister, the 29th of July. We miss her

so. Some one sent me two newspapers—one the "Alabama Times" and the other "Movie Romance." I can't imagine who had them sent unless it was some of the club members. I am surely thankful to the one who sent them. Love and best wishes.

Other new members are: Gladys Alexander, Tanglewood, Texas; Irene Choat, Gatesville, Texas.

Shut-In List

Here are the names and addresses of the Shut-Ins and the letters before the names of the members who are to write to them this month. May you send much sunshine:

"A"—Sadie Favors, Route 2, Winona, Texas. Age 16. In bed.
"B"—Lillian Sollette, 625 East Oscar, Tyler, Texas. Age 19. In the house.
"C"—Emma Marie Zaludek, Route 1, Box 105, Ennis, Texas. Age 19. In house.
"D"—Mrs. Johnnie Towery, Soper, Okla. Age 53. In a chair.
"E"—Bobby Griffith, Lexington, Texas. In bed.
"F"—Joe Morrison, Lexington, Texas. Blind.
"G"—Jimmie Dugger, London, Ky. In bed.
"H"—Mable Brown, Route 1, Hamlin, Texas. Age 28. In a chair.
"I"—Jewell Quattlebaum, Leody, Okla. Age 18. In bed.
"J"—Mrs. Cora Woodward, San Saba, Texas. Age 58. In a chair.
"K"—Alfred Good, Whon, Texas. In bed.
"L"—Katie Tompkins, Box 72, Antlers, Okla. Age 17. In a chair.
"M"—Cora Maud Antrell, Route 6, Mt. Pleasant, Texas. In bed.
"N"—Josephine Saladin, Box 263, Anson, Texas. In bed.
"O"—Clay Bean, Troup, Texas. Age 48. In bed.
"P"—Zelmer Arthur, Ship, Ky. Cripple.
"Q"—Mrs. J. A. Grimes, Blackwell, Texas. Age 71.
"R"—Pearl Elsworth, 1105 First Ave., Alpena, Mich. In bed.
"S"—Rosa Lee Yeaton, Box 22, Claude, Texas. In bed.
"T"—Ernest Moreland, Tanglewood, Texas. Age 40. In bed.
"U"—Alice Beonick, Stillwell, Okla. In bed.
"V"—Sat Beonick, Stillwell, Okla. Route 1. Cripple.
"W"—Mrs. Aynie Miller, Stillwell, Okla. Route 1. Cripple and blind. Age 67.
"X"—Mrs. Osborn, Route 1, Box 31, Stillwell, Okla. Blind. Age 82.
"Y"—Carrie Peterson, Route 1, Aline, Okla. Age 43. In the house.
"Z"—Clyde McKinney, General Hospital, Wichita Falls, Texas. Age 29. In bed.
"A"—Lucile Gilbreath, Route 2, Robstown, Texas. Age 19. In a chair.
"B"—Mrs. W. R. Stevens, Cost, Texas. Age 75. In a chair.
"C"—Mrs. Emma Goss, Cedarvale, Okla. Age 59. Paralyzed.
"D"—Verna Stricklen, Blair, Okla. Age 27. In the house.
"E"—Claude West, Box G, Clinton, Okla. In bed. Age 23.
"F"—Waudine Young, Route 2, Jansboro, Texas. Cripple. Age 9.
"G"—Frank Warren, Route 3, Huntington, Texas. Age 40. In bed.
"H"—Virgie Allen, 500 West Eighth Street, Ada, Okla. Age 19. In the house.
"I"—Albert Gandy, Route 2, Athens, Texas. Age 18.
"J"—Ella Hill, Ravenden, Ark. Age 67. In a chair.
"K"—J. E. Martin, Carter, Texas. Age 56. Blind.

Be sure and send your sunshine to these Shut-In members. Remember, they are depending on you to do your part. Also remember, Shut-Ins, you are to answer as many letters as you can. The members like to know you receive their sunshine. We would like for you to send a letter to Aunt Mary, Box 1012, Fort Worth, Texas, and tell us what you think of the club. Let us know if you are receiving the sunshine the members send. Mention the names of those that send you sunshine.

LOVELY POEMS

Here is a choice poem from the "The Tempest," by William Shakespeare:

The Fairy Life

Where the bee sucks, there suck I
In a cowslip's bell I lie:
There I crouch, when owls do cry;
On the bat's wing I do fly
After summer merrily,
Merrily, merrily, shall I live now,
Under the blossom that hangs on the bough!

Come unto these yellow sands,
And then take hands:
Courtship when you have kiss'd
The wild waves hist,
Foot it neatly here and there;
And, sweet Sprites, the burthen bear.
Hark! Hark!
Bow-wow.
The watch-dogs bark;
Bow-wow.
Hark! Hark! I hear
The strain of strutting chanticleer
Cry, cock-a-diddle-doo!

LITTLE JOURNEYS

How many of us have seen the famous "Liberty Bell" that is now located at Philadelphia and is kept as one of the most sacred relics of American history? Following is the history of this famous bell:

The famous Liberty Bell weighs about 2,000 pounds; was made in London in 1752, and was ordered by the Pennsylvania Assembly for the State House, then located in Philadelphia.

When the Continental Congress declared the independence of the American colonies from Great Britain, on July 4, 1776, the old bellman, in his enthusiasm and ecstasy, according to the story, rang the bell for two hours. In 1835, it cracked under a stroke of the hammer, and has remained impaired ever since. It has been transported to a number of State expositions, and the most care taken to preserve it as one of our hallowed national relics. The bell contains this famous inscription: "Proclaim Liberty throughout all the land unto all the inhabitants thereof.—Levit. XXV, 10."

Many times we hear the term "Dark Horse." Here is a little history concerning its origin: "Dark horse," a frequent phrase in sporting and political parlance, and indicating one who up to a certain time keeps in the background, suddenly comes to the front and snatches victory from the hands of others. The phrase was used by Thackeray in his "Adventures of Philip."

Said Philip, referring to some talk about a candidate for parliament: "Well, bless my soul, he can't mean me. Who is the dark horse he has in his stable?"

Lovely hair!

Modern hair dressers add beauty to your hair by graceful lines and contours. It is just as important to keep your hair soft, lustrous, abundant, rich in color.

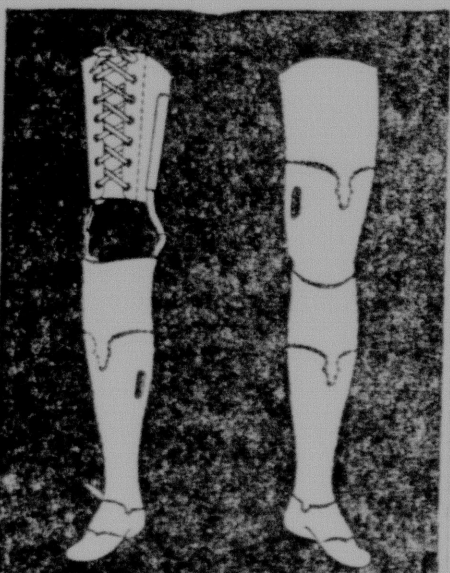

Millions of girls and women are doing this at home with the easy help of Danderine. It is so simple to use. All you do is put a little on your brush each time you arrange your hair.

Instantly Danderine brings out the natural color of dingy, lifeless hair; makes it more sparkling and lustrous than brilliantine; makes it easy to manage; holds it in place.

The consistent use of Danderine dissolves the crust of dandruff, stops falling hair; tends to make the hair grow long, silky and abundant. Five million bottles used a year!

The right way to redye Finest Silks

Textile manufacturers always use special dyes for silk or wool. They know that is the only way to secure the most perfect results. The makers of Diamond Dyes are the first to enable home users to follow this plan.

Next time you want to dye some of your more valuable articles of pure silk or wool, try the special Diamond Dyes in the blue package. They will give these materials clearer, more brilliant colors, with greater depth and permanence than any "all purpose" dye. These special Diamond Dyes are just as easy to use as ordinary dyes. Like the white package Diamond Dyes, they contain three to five times more aniline than other dyes. That's what makes them go on so smoothly and evenly, without spotting or streaking. That's the secret of their brilliance; their resistance to sunlight, wear, and washing. The white package of Diamond Dyes is the highest quality dye prepared for general use. It will dye, or tint, silk, wool, cotton, linen, rayon (artificial silk), or any mixture of materials. The blue package is a special dye for silk or wool only—with it you can dye your valuable articles of pure silk or wool with results equal to the finest professional work. When you buy—remember this. The blue package dyes silk or wool only. The white package will dye every kind of goods, including silk or wool. Your dealer has both packages.

DIAMOND DYES

Sun Proof
EASY TO USE —
BEST RESULTS

5 in 1 HAIR TONIC

HOME PROBLEMS.

FIXING A GOOD LAWN

The fall of the year is about as good a time to build a good lawn as the spring (some prefer it). But any time is best for the housewife if she can't get it attended to at any other time. There is nothing so hard on the housekeeper's nerves as the dust and dirt that is blown in from a "dirt" yard, or mud that is tracked in during rainy weather. Some days she cannot help but feel, "What is the use?" But a smooth velvety yard is both restful to the eye and a tired back, as well. Here is the way to achieve it:

The proper foundation is the first and most important step. Grass will grow in most any kind of soil if given intelligent care. Grass does not necessarily require a very rich deep soil, as the roots do not go deep. By adding a thin layer of good soil over a poor soil a good growth of grass may be had.

If the yard is large, it is best to plow and then remove the surface rock and trash as they interfere with cutting of the grass later on. After plowing the yard should be well harrowed or raked into a smooth bed. Care should be taken not to plow when the soil is too wet or large lumps will result that are hard to break up; it is necessary to have perfectly smooth surface, free from clods. After the raking or harrowing a good lawn roller is a valuable asset, as the surface can be rolled perfectly smooth. If the area is small use a spade or fork instead of a plow to turn the soil, but whatever method is used see that the surface is smooth and even before sowing the seed or setting out grass roots. This is advisable because after the grass is once established it is very difficult to smooth the surface and the grass is very hard to cut where there are bumps and a poor surface.

Bermuda grass, being the favorite grass for the Southern States, and really the most satisfactory for our long dry summers, is the best to plant. Bermuda may be started either from seeds or sodding with the roots and runners taken from a place where there is a healthy growth. There are two or three varieties of Bermuda, some having long blades and some short blades. Where the yard is to be

kept closely clipped the short blade is the more satisfactory. Where it is to be grazed, the long blade is the best. Some people keep a goat or sheep in the yard to keep down the grass. However, where there are children it is best to mow; and this also gives the yard a more uniform appearance. We have found that by both sodding and sowing of seed we could soon have a most attractive yard. After the yard was raked and rolled into shape we put rows of sod three feet apart across the full length of the yard. We then sowed seed by hand, quite thinly all over the yard; a thin layer of good soil was added as a top dressing and lightly rolled. We kept the surface moist with a daily spraying with a fine spray. This should be done every day when there is no rain, as the top soil dries very quickly and the seeds and young growth will die. In a month we had a very presentable growth of grass, and in two months the lawn was almost covered.

A smooth, grassy lawn not only adds to the appearance of a home but to the comfort as well, as it keeps dust and dirt from blowing in the house and gives the family a lovely place to spend idle hours. It is worth all the time and money spent in planting and keeping it in shape.

After the first year it is usually advisable to either burn off the dead grass or add a top dressing of fresh soil. We think a top dressing is the best, as the dead grass acts as a fertilizer to the soil and promotes the growth of new grass. However, one should be careful in selecting this top dressing and be sure that it is free from weeds, rocks and trash.

Fertilizers are sometimes added successfully. However, barnyard manure is as a rule unsatisfactory, as it contains so many weed seeds. In buying commercial fertilizers be sure and buy only from reliable concerns and follow their instructions carefully. Too much fertilizer may result in burning or killing of the grass, while too little will be a loss, as little benefit will be noticed in the growth.

Whatever you do, develop an attractive yard. It will pay big returns in comfort, health and happiness of the family.

HOUSEHOLD SUGGESTIONS

Here are a few household suggestions that may help to lighten the tasks of housewives.

When the blouses of the young son of the household become a trifle tight at the neck, short of sleeve, or worn at the cuffs, I cut the sleeves off above the elbow and hem them, then these pieces are used to face the underside of the neck opening. A sport collar was formed by turning it back to the second button. In this way he had several extra sport blouses with only the expense of a little extra time.

Instead of sewing the ribbon ties at the neck of dresses, it is very convenient at washing time to sew a small flat eye where one usually sews the ribbon. Then on the end of each piece of ribbon sew a small flat button and run the ribbon under the eye. The but-

ton keeps it from slipping through the eye and yet lies flat and makes no lump at the neck.

When putting away handkerchiefs it is a help and many times a comfort if a clean handkerchief is put in coat or dress pocket to match the color of the dress or handbag. Then you are sure, not to merely have a fresh one but to have one that matches your costume.

When putting up pears, two drops of oil of cloves to a quart of fruit adds much to the flavor and does not discolor the fruit as clove buds are apt to do.

During house cleaning time, or when repairs or painting is being done in the house, it is wise to have all doors that stick, or do not close properly, repaired so as to work easily and less noisily.

GOOD RECIPES

Graham Muffins.

One cup graham flour, one-half teaspoon salt, three and one-half teaspoons baking powder, one and one-fourth cups milk, two tablespoons melted shortening, one cup flour, two tablespoons syrup, one egg. Mix and sift dry ingredients; add well beaten egg, milk and shortening. Mix thoroughly. Half fill greased muffin pans and bake in a hot oven 20 to 30 minutes.

Mashed Parsnips With Cream

Wash and trim tops and tips of roots of medium sized parsnips; cover with boiling water and cook slowly until soft. Drain and cover with cold water and slip off skins with hands. Return to stew pot and mash thoroughly; then run through a pure strainer. There should be two and one-half cups pulp. Reheat and add three tablespoons butter, moisten with hot, rich cream to the consistency of mashed potatoes. Season delicately with salt and pepper. Beat until very light. Serve at once.

Imperator Potatoes

Wash, pare and shape potatoes with an olive shaped French vegetable cutter. Parboil one minute, drain and fry a golden brown in deep fat, drain on brown paper, sprinkle with salt and serve as a garnish with fish, roast meat or as a hot vegetable with cold meats.

Tomato Bouillon With Oysters

To one large can tomatoes add one and one-half quarts bouillon or chicken consommé, one tablespoon chopped onions, a tiny bit of bay leaf, three cloves, one-half teaspoon celery seed, one-half teaspoon peppercorn, and one sprig parsley. Cook 20 minutes, strain, cool and clear with the white and shell of one egg; strain again. Heat two cups oysters in an omelet pan, when plump and soft part curled, remove oysters with a skimmer to bouillon. Serve in hot cups with croutons of bread.

Celery Au Gratin

Wash, scrape the outer stalks of celery, cut in one inch pieces. Cook in boiling salted water until soft. There should be two cups. Add two tablespoons finely-chopped milk red peppers that have been parboiled 10 minutes (discarding seeds and veins). Add one cup thin white sauce, to which add one-fourth cup grated cheese. Turn into a buttered baking dish, cover with buttered crumbs and bake in the oven until crumbs are brown.

Cranberry Pie

Line a pie pan with a rich pastry. Cut large cranberries in halves, there should be two cups. Mix with one and one-half cups sugar; add two tablespoons cold water and two tablespoons currant jelly. Mix well and turn into pie pan; dot over with one tablespoon butter and sprinkle with one tablespoon flour. Moisten edge with cold water and spread with top crust. Press edges and flute with fingers. Bake 35 minutes in hot oven. Sprinkle with powdered sugar and serve hot.

Sweet Potato Anna

Pare rather small, medium-sized sweet potatoes, cut in one-half inch slices, lengthwise, keeping potatoes in their original shape. Fasten securely by running two wooden skewers (tooth picks) dipped in butter through each parred potato. Parboil 10 minutes; drain and bake in hot oven, basting with drippings from roast or with melted butter. Remove skewers and arrange potatoes around roast tenderloin.

Stuffed Cabbage

Cut a slice off the top of a smooth, well-formed cabbage, and hollow out the cabbage. Soak cabbage shell in cold salted water for an hour. Mix 1 pound pork sausage, 1 cup bread crumbs, 1/4 cup water and 1 slightly beaten egg. Pack this mixture into cabbage shell. Tie in a piece of cheesecloth, place on a rack in a steamer and cook about two hours. Serve with tomato sauce.

A WAGON IS A TRAILER

The assistant attorney general has ruled that a loaded farm wagon drawn behind a tractor, truck or other motor vehicle on the public highways is a trailer, and its owner should pay the regular license fee assessed against that type of vehicle.

The law passed at the recent session of the Legislature requiring license of all trailers applies to thousands of wagons in which cotton is hauled to market behind automobiles, according to the opinion rendered by the assistant attorney general and addressed to the State Highway Commissioners.

POWER INDUSTRY DEVELOPMENT

The growth of the power industry in recent years in Texas has been remarkable. In the consumption of electricity Texas leads all Southern States and stands eighth in the States of the nation.

Manufacturers of power are now looking to the farm home for a great future market. Already 8,700 of the farm homes of the State are receiving current from central generating stations. Nearly all of the 8,700 farm homes began receiving current during the last five years.

CLEAVE TO GOD — "Ye that did cleave unto the Lord your God are alive every one of you this day." Deut. 4:4.

Secret of Removing Wrinkles Now Solved

As dainty and youthful a complexion as you ever saw can be yours by following this marvellously simple plan. Get just two ounces of castor from your druggist. Mix in half pint of water with tablespoon of glycerine. This forms a rich dairy cream, that you spread thinly around eyes, temples, forehead and cheeks. The skin absorbs this thoroughly when rubbed in gently. Eyes tighten, under dead skin vanishes, wrinkles fade out, and you'll be astonished to see how smooth, youthful skin appears.

Modern hair dressers add beauty to your hair by graceful lines and contours. It is just as important to keep your hair soft, lustrous, abundant, rich in color.

Millions of girls and women are doing this at home with the easy help of Danderine. It is so simple to use. All you do is put a little on your brush each time you arrange your hair.

Instantly Danderine brings out the natural color of dingy, lifeless hair; makes it more sparkling and lustrous than brilliantine; makes it easy to manage; holds it in place.

The consistent use of Danderine dissolves the crust of dandruff; stops falling hair; tends to make the hair grow long; silky and abundant. Five million bottles used a year!

The right way to redye Finest Silks

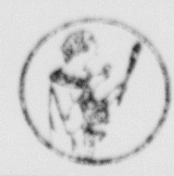

Textile manufacturers always use special dyes for silk or wool. They know that is the only way to secure the most perfect results. The makers of Diamond Dyes are the first to enable home users to follow this plan.

Next time you want to dye some of your more valuable articles of pure silk or wool, try the special Diamond Dyes in the blue package. They will give these materials clearer, more brilliant colors, with greater depth and permanence than any "all purpose" dye. These special Diamond Dyes are just as easy to use as ordinary dyes. Like the white package Diamond Dyes, they contain three to five times more aniline than other dyes. That's what makes them go on so smoothly and evenly, without spotting or streaking. That's the secret of their brilliance; their resistance to sunlight, wear, and washing. The white package of Diamond Dyes is the highest quality dye prepared for general use. It will dye, or tint, silk, wool, cotton, linen, rayon (artificial silk), or any mixture of materials. The blue package is a special dye for silk or wool only—with it you can dye your valuable articles of pure silk or wool with results equal to the finest professional work. When you buy—remember this. The blue package dyes silk or wool only. The white package will dye every kind of goods, including silk or wool. Your dealer has both packages.

DIAMOND DYES

Sun Proof
EASY TO USE — BEST RESULTS

5 in 1 HAIR TONIC
"Stops Dandruff"
5 in 1 HAIRCOMB OIL
"Controls the Hair."
Taken place of Brilliantine.
5 in 1 SHAMPOO
"Keeps your Scalp Healthy."
MAGIC SNOW
(Mentholum, Greaseless Vanishing Cream)
Prevents Sunburn, Tan and Chapped Skin. Men, it is fine for after shaving—Ladies find it a wonderful powder base.

HOME PROBLEMS.

FIXING A GOOD LAWN

The fall of the year is about as good a time to build a good lawn as the spring (some prefer it.) But any time is best for the housewife if she can't get it attended to at any other time. There is nothing so hard on the housekeeper's nerves as the dust and dirt that is blown in from a "dirt" yard, or mud that is tracked in during rainy weather. Some days she cannot help but feel, "What is the use?" But a smooth velvety yard is both restful to the eye and a tired back, as well. Here is the way to achieve it:

The proper foundation is the first and most important step. Grass will grow in most any kind of soil if given intelligent care. Grass does not necessarily require a very rich deep soil, as the roots do not go deep. By adding a thin layer of good soil over a poor soil a good growth of grass may be had.

If the yard is large, it is best to plow and then remove the surface rock and trash as they interfere with cutting of the grass later on. After plowing the yard should be well harrowed or raked into a smooth bed. Care should be taken not to plow when the soil is too wet or large lumps will result that are hard to break up; it is necessary to have perfectly smooth surface, free from clods. After the raking or harrowing a good lawn roller is a valuable asset, as the surface can be rolled perfectly smooth. If the area is small use a spade or fork instead of a plow to turn the soil, but whatever method is used see that the surface is smooth and even before sowing the seed or setting out grass roots. This is advisable because after the grass is once established it is very difficult to smooth the surface and the grass is very hard to cut where there are bumps and a poor surface.

Bermuda grass, being the favorite grass for the Southern States, and really the most satisfactory for our long dry summers, is the best to plant. Bermuda may be started either from seeds or sodding with the roots and runners taken from a place where there is a healthy growth. There are two or three varieties of Bermuda, some having long blades and some short blades. Where the yard is to be kept closely clipped the short blade is the more satisfactory. Where it is to be grazed, the long blade is the best. Some people keep a goat or sheep in the yard to keep down the grass. However, where there are children it is best to mow; and this also gives the yard a more uniform appearance. We have found that by both sodding and sowing of seed we could soon have a most attractive yard. After the yard was raked and rolled into shape we put rows of sod three feet apart across the full length of the yard. We then sowed seed by hand, quite thinly all over the yard; a thin layer of good soil was added as a top dressing and lightly rolled. We kept the surface moist with a daily spraying with a fine spray. This should be done every day when there is no rain, as the top soil dries very quickly and the seeds and young growth will die. In a month we had a very presentable growth of grass, and in two months the lawn was almost covered.

A smooth, grassy lawn not only adds to the appearance of a home but to the comfort as well, as it keeps dust and dirt from blowing in the house and gives the family a lovely place to spend idle hours. It is worth all the time and money spent in planting and keeping it in shape.

After the first year it is usually advisable to either burn off the dead grass or add a top dressing of fresh soil. We think a top dressing is the best, as the dead grass acts as a fertilizer to the soil and promotes the growth of new grass. However, one should be careful in selecting this top dressing and be sure that it is free from weeds, rocks and trash.

Fertilizers are sometimes added successfully. However, barnyard manure is as a rule unsatisfactory, as it contains so many weed seeds. In buying commercial fertilizers be sure and buy only from reliable concerns and follow their instructions carefully. Too much fertilizer may result in burning or killing of the grass, while too little will be a loss, as little benefit will be noticed in the growth.

Whatever you do, develop an attractive yard. It will pay big returns in comfort, health and happiness of the family.

HOUSEHOLD SUGGESTIONS

Here are a few household suggestions that may help to lighten the tasks of housewives.

When the blouses of the young son of the household become a trifle tight at the neck, short of sleeve, or worn at the cuffs, I cut the sleeves off above the elbow and hem them, then these pieces are used to face the underside of the neck opening. A sport collar was formed by turning it back to the second button. In this way he had several extra sport blouses with only the expense of a little extra time.

Instead of sewing the ribbon ties at the neck of dresses, it is very convenient at washing time to sew a small flat eye where one usually sews the ribbon. Then on the end of each piece of ribbon sew a small flat button and run the ribbon under the eye. The button keeps it from slipping through the eye and yet lies flat and makes no lump at the neck.

When putting away handkerchiefs it is a help and many times a comfort if a clean handkerchief is put in coat or dress pocket to match the color of the dress or handbag. Then you are sure, not to merely have a fresh one but to have one that matches your costume.

When putting up pears, two drops of oil of cloves to a quart of fruit adds much to the flavor and does not discolor the fruit as clove buds are apt to do.

During house cleaning time, or when repairs or painting is being done in the house, it is wise to have all doors that stick, or do not close properly, repaired so as to work easily and less noisily.

GOOD RECIPES

Graham Muffins.

One cup graham flour, one-half teaspoon salt, three and one-half teaspoons baking powder, one and one-fourth cups milk, two tablespoons melted shortening, one cup flour, two tablespoons syrup, one egg. Mix and sift dry ingredients; add well beaten egg, milk and shortening. Mix thoroughly. Half fill greased muffin pans and bake in a hot oven 20 to 30 minutes.

Mashed Parsnips With Cream

Wash and trim tops and tips of roots of medium sized parsnips; cover with boiling water and cook slowly until soft. Drain and cover with cold water and slip off skins with hands. Return to stew pot and mash thoroughly; then run through a pure strainer. There should be two and one-half cups pulp. Reheat and add three tablespoons butter, moisten with hot, rich cream to the consistency of mashed potatoes. Season delicately with salt and pepper. Beat until very light. Serve at once.

Imperator Potatoes

Wash, pare and shape potatoes with an olive shaped French vegetable cutter. Parboil one minute, drain and fry a golden brown in deep fat, drain on brown paper, sprinkle with salt and serve as a garnish with fish, roast meats or as a hot vegetable with cold meats.

Tomato Bouillon With Oysters

To one large can tomatoes add one and one-half quarts bouillon or chicken consommé, one tablespoon chopped onions, a tiny bit of bay leaf, three cloves, one-half teaspoon celery seed, one-half teaspoon peppercorn and one sprig parsley. Cook 20 minutes; strain, cool and clear with the white and shell of one egg; strain again. Heat two cups oysters in an omelet pan, when plump and soft part curled, remove oysters with a skimmer to bouillon. Serve in hot cups with croutons of bread.

Celery Au Gratin

Wash, scrape the outer stalks of celery, cut in one inch pieces. Cook in boiling salted water until soft. There should be two cups. Add two tablespoons finely-chopped milk and peppers that have been parboiled 10 minutes (discarding seeds and veins). Add one cup thin white sauce, to which add one-fourth cup grated cheese. Turn into a buttered baking dish, cover with buttered crumbs and bake in the oven until crumbs are brown.

Cranberry Pie

Line a pie pan with a rich pastry. Cut large cranberries in halves, there should be two cups. Mix with one and one-half cups sugar; add two tablespoons cold water and two tablespoons currant jelly. Mix well and turn into pie pan; dot over with one tablespoon butter and sprinkle with one tablespoon flour. Moisten edge with cold water and spread with top crust. Press edges and flute with fingers. Bake 35 minutes in hot oven. Sprinkle with powdered sugar and serve hot.

Sweet Potato Anna

Pare rather small, medium-sized sweet potatoes, cut in one-half inch slices, lengthwise, keeping potatoes in their original shape. Fasten securely by running two wooden skewers (tooth picks) dipped in butter through each parred potato. Parboil 10 minutes; drain and bake in hot oven, basting with drippings from roast or with melted butter. Remove skewers and arrange potatoes around roast tenderloin.

Stuffed Cabbage

Cut a slice off the top of a smooth, well-formed cabbage, and hollow out the cabbage. Soak cabbage shell in cold salted water for an hour. Mix 1 pound pork sausage, 1 cup bread crumbs, 1/4 cup water and 1 slightly beaten egg. Pack this mixture into cabbage shell. Tie in a piece of cheesecloth, place on a rack in a steamer and cook about two hours. Serve with tomato sauce.

A WAGON IS A TRAILER

The assistant attorney general has ruled that a loaded farm wagon drawn behind a tractor, truck or other motor vehicle on the public highways is a trailer, and its owner should pay the regular license fee assessed against that type of vehicle.

The law passed at the recent session of the Legislature requiring license of all trailers applies to thousands of wagons in which cotton is hauled to market behind automobiles, according to the opinion rendered by the assistant attorney general and addressed to the State Highway Commissioners.

POWER INDUSTRY DEVELOPMENT

The growth of the power industry in recent years in Texas has been remarkable. In the consumption of electricity Texas leads all Southern States and stands eighth in the States of the nation.

Manufacturers of power are now looking to the farm home for a great future market. Already 8,700 of the farm homes of the State are receiving current from central generating stations. Nearly all of the 8,700 farm homes began receiving current during the last five years.

CLEAVE TO GOD — "Ye that did cleave unto the Lord your God are alive every one of you this day." Deut. 4:4.

Secret of Removing Wrinkles Now Solved

As dainty and youthful a complexion as you ever saw can be yours by following this marvellously simple plan. Get just two ounces of spirit from your druggist. Mix in half pint of water with tablespoon of glycerine. This forms a rich dairy cream, that you spread thinly around eyes, temples, forehead and cheeks. The skin glows, this wrinkle when rubbed in gently. Pores tighten, outer dead skin flakes, wrinkles fade out, and you'll be astonished to see new, smooth, youthful skin appear.
